Chapter 2 : 12 Tips for New Drivers That You Can™t Learn in a Driving School

Our 50 Best Tips to Make Your House Super Clean. We've got a trick for every corner of your home (it's just what we do).

If your iPhone is your main communication device, you spend a surprising amount of time with the keyboard. But do you know about the 3D Touch gesture that will transform the keyboard into a trackpad? Read on to find out all the best tips and tricks for the iPhone keyboard. Then, you can swipe in any direction and the cursor will move accordingly. Selecting text on a touchscreen is hard. So is precise control over the cursor. This feature solves both problems. You can even use this feature to select text. This is where you can expand any short text snippet into a word, sentence or even a paragraph. This can be handy if you need to type your address or a specific chunk of text frequently for your work. Once you create a Text Replacement snippet, it will sync between all your Apple devices automatically using iCloud. Type in the expanded text in the Phrase section and type the snippet in the Shortcut section. Now, when you type the shortcut, it will automatically expand into the phrase.

Shift Key Gesture If you want to quickly capitalize a single letter, just swipe from the Shift key over to any letter. When you lift the finger, iOS will input the key in a capital form. The rest of the keyboard will then go back to the normal mode. This is a neat way to avoid double-tapping the Shift key every time you want to enter a single capitalized letter.

Numbers Key Gesture Similarly, you can swipe from the number key to reveal the numbers and punctuation shortcuts. For instance, you can type in a question mark or a common quickly using this gesture. In fact, iOS has amazing support for speech to text. And it works really well. Tap and hold on the Globe icon and then tap Keyboard Settings. From this page, scroll to the bottom and then tap on the toggle next to Predictive. Tap and hold on the Globe icon and from the bottom row, select the icon to dock the keyboard either to the left or the right edge. To go back to the full-width keyboard, tap on the arrow in the empty space next to the docked keyboard. And the utility they provide outweighs the reliability issues. Our favorite third-party keyboard for iOS is Gboard. It gives you a Google search bar, gesture typing, emoji replacement, emoji search, GIF search and more, all in one keyboard. Then open the keyboard, tap and hold on the Globe icon and select your newly installed keyboard to switch to it. The Globe key is also how you cycle between all the installed keyboards. Share with us in the comments below.

Chapter 3 : Tips and Tricks Archives - Page 3 of 3 - Beauty Tips Home

In this post, we will tell you about some tips and tricks on the MIUI 9 that will enhance your experience. MIUI 9 comes with features such as Lock screen enhancements, better notification.

This post offers you some cool Edge Browser Tips and Tricks that will help you get the best of this new web browser and its features, in Windows. Instead, you will find three dots, called Ellipses. You click on the Ellipses to open the More actions menu that contains options to tweak Microsoft Edge. You have to click on Settings to reach the main settings. Advanced options are also to be found in a separate menu when you click on the option saying Advanced Options. Using these, you can tweak Edge settings. If you wish to change the default settings in Edge and make it more comfortable, read our article on how to customize Edge. Some people prefer to use dark themes, especially at nights or in the dark, as it is considered to cause lesser strain on the eyes. Using dark themes limits the intensity, conserves battery and makes it easier to work long hours. Read Enable Dark Theme in Edge for details. But you can always change the default search engine and even add additional search engines to the browser. You can include Google or any other search engine in the list of Edge browser. You just have to open the search engine page and then go to Settings menu using the Ellipses towards the top right corner of the screen. Then follow the instructions as explained in our article on how to change Default Search to Google in Edge. The process is same for adding any search engine and search providers. You can set your favorite website, blog or search engine as your home page or you can set a blank page too. Like all web browser, the new Microsoft Edge in Windows 10 too lets you set a single home page or multiple homepages. Such browser keyboard shortcuts will help you use Edge in a smarter way. Although the feature is pretty basic, it is good enough and meets the purpose. Like most browsers, Edge also supports Form-fill. This feature remembers your oft-filled information and offers to fill the web forms automatically for you. More on this at Manage Passwords and Form-Fill. Some of you may not find any use for the Home button, but there are others who like to have a Home button, visible on the browser interface. Edge allows you to add a Home button. This post will show you how you can import Favorites and Bookmarks into Edge. Customize Edge New tab page to suit your requirements. It lets you take notes, write, highlight directly on web pages or scribble on the web. Go here to learn how to make Web Notes in Edge. Cortana, powered by Bing, is built directly into Windows. This means that things users can do with the voice assistant on Windows 10 and Windows 10 for Phones is possible in the Edge web browser. Click on the button towards ON state to display the Favorites bar. This option is not available as a context menu item, as in Internet Explorer. This will automatically launch the tools undocked. As a Developer, you might be excited to use the Network tools. It will instantly open that web page. If you are an IE lover and want to use it, see this post on how to open Internet Explorer in Windows. Just visit the website using Edge and click on the 3-dotted More actions link to open the menu. Here click on Pin to Start, and its icon will get pinned to the Start Menu. You can then resize it or choose to turn it on or off of live tiles. The Edge address bar will auto-hide. To make it appear, simply move the mouse to the top edge. You might want to also take a look at some of the features of Edge browser, so that you become completely familiar with all that the web browser has to offer. There are also some new security features in Edge you may want to take a look at. Having done this, you might want to also take a look at and configure. Having done this, you might want to also take a look at the following:

Chapter 4 : 13 MIUI 9 Tips and Tricks That You Should Know

Windows The best tricks, tips, and tweaks Windows 10 is chock-full of handy, hidden new features worth exploring. Check out the best tips and tricks here.

Be sure to click the Cortana search bar on the Windows taskbar first and provide your name to set Cortana up. To use it, just type a question into the location bar at the top of the Edge window or on the New tab page. Cortana offers quick answers to questions.

Sharing Web Pages The Edge browser has an integrated sharing feature with a Share button on its toolbar. Tapping the Share button will open the system Share panel. If you want to share on Twitter, install the Twitter app. You can also tap the title of the page in the Share panel and choose to share a screenshot of the current web page rather than a link to it. The icon looks like a book.

Reading List Microsoft Edge includes a reading list feature, too. Use this to save articles you want to read later without cluttering your favorites list. To do this, just click or tap the star icon on the address bar. Select the Reading list heading and add the page to your reading list. Use the tools to draw on, highlight, erase, add notes, and copy individual parts of a web page. The Save button allows you to save the note to Microsoft OneNote, your favorites, or your reading list. You can also use the Share button to share your marked up note.

They should be easy to find now that much of the clutter from Internet Explorer has been stripped away. Open the menu from the toolbar and select New InPrivate window to open a private-browsing mode window. Edge allows you to open the menu and select Pin to Start to pin the current web page to the Start menu or Start screen as a tile, allowing you to open it quickly. Clicking or tapping the tile will open the web page in Edge, not its own browser window. If you do need to open a web page with Internet Explorer, you can just tap the menu button and select Open with Internet Explorer. For example, you may need to do this if you need to use a legacy web app that requires a browser plug-in like Java or Silverlight. Like many other modern Windows 10 apps, Edge includes a dark theme as well as its default light theme. This is the only browser plug-in that works in Microsoft Edge. Microsoft Edge uses Bing by default, but you can have it use any search engine you like as long as that search engine offers an OpenSearch plug-in. For example, you can enable a Home button to quickly take you back to your preferred home page. You can also configure which web pages Edge opens when you launch it, and what exactly appears when you open a New tab page.

Selecting furniture for your home is a real challenge when you want to have all the classy and lavish furniture but in [].

The Home button is gone, and so is Touch ID. Tap to Wake Just tap on the iPad screen to wake it up. Adjust your face so it lines up with the iPad screen and your iPad should unlock. Just swipe up from the bottom of the screen to unlock the iPad. But the TrueDepth camera is smart enough to figure out your face no matter which direction you hold it in. When the camera is in the bottom, iPad will prompt you to look down to unlock the iPad. Short Swipe up for the Dock To reveal the Dock, you now swipe up just a bit, like two inches and pause for a sec. This will bring up the Dock. To ease the pain, you can use a keyboard shortcut to bring up the Dock: Where you see the time and status indicators for Wi-Fi, BlueTooth and more. When an app is open, just swipe up to bring the Dock, tap and hold on an app, drag the app icon and drop it to the left or the right edge to dock it there. There are a lot more things you can do in Split View. Drag in an app from the Dock and drop it on top of the two active apps. The floating app will stay on top and you can move it to the left or the right. You can dismiss it as well by swiping horizontally off the screen and bring it back later. Drag and Drop lets you select text, images, videos, links and more from one app and drop it in another. One of the most frustrating things in iOS is using copy and paste. Drag and Drop feature takes care of this annoyance. Swipe Horizontally on Home Bar For Recent Apps Swipe right horizontally on the big Home bar at the bottom of the screen to quickly access the most recent app. You can use this gesture to quickly go back to the third or fourth most recently used apps. But remember that if you interact with the app, the sequence resets. Just put it on top of the iPad in Landscape mode and it connects to iPad magnetically. And it starts charging it wirelessly. This way, you can quickly start scribbling without the need to navigate the Notes UI. And it has two actions – a single tap and a double tap. In Notes app, you can use tap to switch to the erase tool. Best thing is that apps will be able to customize this feature. Thanks to the USB-C cable. The iPad Pro can support up to 5K displays. If the app is customized for it, the connected display can work as an independent, external display as well. But in an app like Keynote, the external display will automatically display the slides while your iPad will show you your presentation notes and a preview of the next slide. You can connect a Microphone to record audio, an ethernet port with up to gigabit bandwidth. Printers are not yet supported. In fact, it can even charge your Nintendo Switch! Doing this with Touch ID was easy because you could add up to 10 fingers. But by default, iPad only allows 1 Face ID authentication. View All Keyboard Shortcuts For an App Most of the productivity apps on the iPad support keyboard shortcuts and viewing a list of them is pretty easy. Just press and hold the Cmd key on the keyboard. A nice side effect is that you can take Portrait Mode selfies on the iPad Pro. Open the Camera app, flip to the front-facing camera and select Portrait option. Open the Messages app, go to an iMessage conversation and select the Animoji option. Now from the first option, you can build your own Memoji character by selecting the face structure, nose, eyes, hairstyle and glasses that reflect your look. Use the new Screen Time feature in iOS 12 to know exactly how much time you spent being productive on a given day. Then you can choose to disable certain apps automatically for time being or put up time limits. Share with us in the comments below.

Chapter 6 : Edge Browser Tips and Tricks for Windows 10

The Home's new cooking skills (see tip 3) make it a fine kitchen companion, but a good reason to have one on your bedside table are its strangely addictive relaxation sounds. You can either take pot luck by saying "Hey Google, help me relax", or pick your favourite with "Hey Google, play forest sounds".

Since time is of the essence, it is helpful to know the quickest and easiest way to clean the most challenging messes. Fortunately, there are solutions to get things around the house clean without taking away precious time. All you really need is a wet paper towel; well, actually two wet paper towels. Place two damp paper towels on the grill. Then, turn on the grill to the low setting and wait for the steam. After two minutes, turn off the grill, clean up the grime, let the grill cool, and put it away clean. Lemony Clean Chrome Photo Source: It often gets finger prints, soap spots, and unknown substances on it. After time the shiny chrome that you once loved starts to look tired and grimy. The easiest way to remedy this problem and bring back the shine is with a half of a lemon. When you rub the lemon on the chrome, the acid cuts through the grime and brings back the shine. And, your kitchen will smell fabulous! Even though many people no longer drink the sugary beverage, it is still worth having a few two-liter bottles of it around for cleaning the toilet. Coke is much less expensive than toilet-bowl cleaners. All you have to do is pour the Coke in your toilet and wait. The soda chemicals will clean the bowl for you. After a few minutes, flush. If you need to repeat, then repeat. Clean Your Baseboards Photo Source: A dryer sheet will take care of them for you. This is one of the easiest cleaning ideas, as all you have to do is wipe the dryer sheet on your baseboard and appreciate the cleanliness and fragrance that is left behind. This is so easy to do that you could even have your young, school-age kids help get the job done. Well, with this quick tip, you can leave those expensive cleaning products on the shelves at your favorite stores. Instead, buy some cream of tartar and a cleaning sponge. Wet the sponge, put some cream of tartar on it and clean your appliances. All those little holes can harbor gunk and they are difficult to clean. Instead of cleaning each of those little holes, you can get the job done with two household items: Fill the bag with vinegar and tie the bag to your shower head. Make sure the vinegar covers the holes when you put the bag on it. Then, go do something fun for a few hours. When you come back, the vinegar will have cleaned the shower head and made it look like new. Fresh and Clean Mattresses Photo Source: Since we spend so much time in bed, it is a good idea to keep our mattresses clean. So, try this instead. Give the mattress top a good vacuuming. Then, open up a new box of baking soda and lightly dot the mattress with it. Let the baking soda rest so it can absorb oil and odors. Then, vacuum it up after a couple of hours. Safe Cheese Grater Cleaning Image: The best way to clean out the sticky cheese is to use a potato. Peel it by using the grater and the cheese will no longer stick. And, the potato is too starchy to stick, too. A bowl of it does wonders in the microwave. Put a bowl of water and vinegar in the microwave for a few minutes. This will create a steam that loosens the mess on the walls and ceiling of the appliance. Once the timer is finished, remove the bowl and clean the walls. The gunk will come off easily. Have your kids gather up the plastic toys and bring them to the dishwasher. Load them on the top shelf and run the cycle. You can also clean them in the washing machine, if you keep them in a tightly closed pillowcase or a laundry bag. Instead, you can clean your cast iron pans with olive oil and kosher salt. The salt will scrub away the unwanted food stuffs and the olive oil will keep the iron safe. Use a paper towel or a clean kitchen towel to spread the mixture. You can use water to rinse the pot. Then, dry it thoroughly. Quick Clean Blender Photo Source: Instead, wash it on the counter with your dishwashing soap and warm water. Put water and soap in the blender and blend away. Then, rinse it out and the blender will be ready for your next beverage. Clean Your Toothbrushes Photo Source: Again, vinegar does the trick. Put your toothbrush in a cup that has a two-to-one ratio of water to vinegar. Let the toothbrush sit in the mix for 30 minutes. Remember to rinse out the vinegar before you brush. Detail Your Air Vents Image: Most of the time, it takes a lot of work to clean it out with a rag or a paper towel. A trick you can use to easily remove buildup from your vents and even baseboards is by using a scrub brush. This will give your home that deep-cleaned look without much effort on your part. Get the Grease Out Photo Source: All you have to do is rub the chalk on the grease and give it some time to absorb it. Use a damp cloth to wash the chalk and grease

away. Surprisingly, this is a really easy item to clean. All you need to do is rub salt and a little bit of water on it. The burn marks will wipe away and your iron will work like it did the first time you used it. With these 15 tips, you can clean the stubborn spots and items with ease. There is no reason avoid cleaning when all it takes is a few typical household items and a few minutes of your time. Clean Those Yellowed Pillows Image source: Instead of using your fingernails or a dangerous razor blade, Oxyclean and water will get the labels off quickly and safely. Just soak the item in the mixture and after a couple of minutes, the label will slide right off.

Chapter 7 : Top 10 iPhone Keyboard Tips and Tricks

They want to know the benefits, how it can be used, tips about the product, if the company is credible, FAQ, etc. I think something that is really important and will make a company's blog stand out is mentioning the company's promise or mission statement.

Edit your home screen: A long press on the wallpaper on any home screen lets you edit the wallpaper and themes, widgets, pages or further settings. This area will also let you add or delete complete screens, so if you want a widgets page, this is where you go. **Get more on your home screen:** You can change the size of the screen grid on which your shortcuts and widgets sit, depending on how dense you want the home screen to be. Long press on the wallpaper and select "home screen settings". Select 4x5 to keep things fairly clear, 4x6, 5x5 or 5x6 to cram more in. We went with 5x5 on the S9. Many widgets are resizable. A long press selects them. When you lift your finger, you can drag the blue box that appears and resize your widget. You can even resize the Google search box. **Customise the navigation bar:** With on-screen controls, the S9 will let you customise the navigation bar as you could on the S8. Want back on the left rather than the right? Lock the navigation bar in place: With a big display, some apps will want to go full screen and the navigation bar will vanish, meaning you need to swipe up from the bottom to bring it back. You can unlock it with another double tap. **Hide the navigation bar lock dot:** Customise the status bar: You can change some of the options on the top display bar. **Allow your home page to work in landscape:** That means you can keep your phone in landscape and flip between videos and games, for example. Just switch this off to get rotation to landscape. Simply drag one app on top of another on the home screen and a folder is created. **Change a folder colour or name:** Open a folder and enter the name you want at the top. To change the folder background colour, tap the palette in the right-hand corner and select a new colour - including completely custom colours. If you no longer want a folder, press and hold and then hit delete. The folder and the app shortcuts will vanish. **Access Bixby Home from the home screen:** It can be accessed via a press of the Bixby button on the side of the phone, but also a swipe to the right from the home screen. **Turn off Bixby Home:** Swipe to the right and the Bixby Home panel will appear. A long press on virtual the on-screen home button will launch Google Assistant. You can then talk to Google and get the full experience as Mountain View intended. Google Now was one of the highlights of Android Lollipop, with Google pulling together loads of information from search and other things going on within your Google accounts, serving up cards of information. There is cross-over with the new Bixby Home, but if you like doing it Google style, then tapping the Google search bar widget will open this page. **Change launcher home screen:** You can easily change the experience of your phone with a different launcher, such as Nova if you want more customisation. Just download the launcher from Play Store and install it. Select "default apps" and then "home screen". **Pocket-lint Samsung Galaxy S9 quick settings tips and tricks** The quick settings area is part of Android where you can access the most frequent settings for your device, like power saving modes, Wi-Fi and Bluetooth. **Instantly access the quick settings and notifications pane from your home screen:** This is off by default, to turn it on long press on the wallpaper and select "home screen settings", then "quick-open notification panel". **Change the quick settings grid size:** You can change the density of the quick settings icons by changing the grid size as you can on the home screen and the apps tray below. Tap the menu button as above and select "buttons grid". **Instantly access device settings from quick settings:** This is a standard Android tip, but great for accessing settings instantly. **Turn off the SmartThings connection notification:** On the S9, Samsung is using the new SmartThings app as a central controller for all connected devices, from smart home to Bluetooth devices and so on, replacing Samsung Connect. You can remove it in the app: **Show all the apps on the home screen:** This is a popular option for some. If you want to remove the apps tray, long press on the home screen and tap "home screen settings". The former removes the apps tray completely, like the iPhone. **Add or remove an apps tray button:** By default there is no apps tray button and you open the apps tray with a swipe. If you want the button back head into the home screen settings as above and select "apps button". Here you can turn it on or off. **Swipe to show or hide the apps tray:** As above, the Galaxy S9 lets you view the apps tray with a swipe up. The apps pages themselves then scroll left

and right. Change the apps screen grid size: The latter will pack more apps in. In the apps tray, hit menu in the top right-hand corner, then "sort". This will give you the option to have alphabetical order. Just tap that option and everything will drop into place. Hit the menu button in the top right-hand corner, then tap "sort". This time, select "custom order". You can now you can drag the apps to the position you want them in. Create an apps tray folder: This can then be repositioned, named or coloured to your preference, so you can have a Google folder, one for smart home, one for games and so on. Search your entire phone: At the top of the apps screen is a search bar for Finder. This will return search results for apps you have installed, but can also search content in apps, like Feedly, Play Music, messages, reminder, calendar and a whole lot more. Tap the finder bar in the apps tray, then hit the menu button on the right then "manage apps" and you can choose where it searches. You can uninstall directly from an app icon. Just long press on the app and a pop-up menu will give you the option to uninstall an app. Add apps to your home screen: Press and hold on the app shortcut in the apps tray. This will let you place a shortcut on your home screen by dragging it to the top of the page, or you can select "add to home" from the pop-up menu that appears. Use normal app icons: Samsung loves putting backgrounds on app icons, turning everything into a squircle. That will return apps to their normal shape. Pocket-lint Samsung Galaxy S9 lock screen and always-on display The lock screen is what you see when your phone is locked. Turn on always on display: This shows when the phone display is in standby, i. If you want it to always show, scroll down and toggle that option on. This will also let you turn always-on display on or off a night depending on your preference. Change always-on display layout: You can customise what you see in always-on display by heading to the section above. You can opt to show the home button or not as well a the clock or information. Change the always-on clock style: There are a range of different clock types for he S9 always-on display. Here you can change the clock both for always-on display and the lock screen. Add a music controller to your lock screen or always-on display: Facewidgets are the name Samsung uses for other information on your lock screen or always-on display.

Chapter 8 : iPhone X: 20 tips and tricks to master Apple's latest phone - CNET

Posted by Khamosh Pathak on Mar 15, in iPhone Tips and Tricks, Keyboard You use your iPhone to type everything from notes, messages to emails. If your iPhone is your main communication device, you spend a surprising amount of time with the keyboard.

MIUI 9 comes with features such as Lock screen enhancements, better notification management, new gestures, themes, and effects. It is loaded with hidden features too. With this feature, you can use two supported apps simultaneously on the same screen. One app occupies the top position and the other is present below it. To use two apps in the split-screen mode, tap the Recent key on your Redmi device and hit the Split screen option at the top-left corner of the screen. Then, drag the first app to the text that says "Drag items here", followed by tapping the second app. You can change the size of each app screen by dragging the small white line between the two apps. To exit the split-screen mode, drag the white line either upwards or downwards to close the apps. You can easily switch between two recently opened apps by just double tapping the recent key of your device. MIUI 9 comes with a built-in feature to create collages from the gallery. On the Photos tab, tap the three-dot icon in the top-right corner. Hit Collage from the menu. Select the photos and tap OK. You can then customize the layout and the look of your collages. This tab includes the pictures from Camera album. If you want to create collages from other pictures, you will have to add that folder to the Photos tab, which is in our next tip. Add Images to Photos Tab in Gallery To add images from other albums in the Photos tab, navigate to that folder and hit the three-dot icon at the top-right corner. Select Show in Photos from the menu. All the images from this particular folder will now appear under the Photos tab. Erase Background In addition to adding new stickers and other image-editing features, MIUI 9 also introduces a new background or object eraser tool. The tool is present under the Edit options of a photo and lets you remove any unnecessary object from your image. However, when you swipe right from the lock screen it will open three shortcuts – Mi Home, Mi Remote, and Torch. Yes, you can now access the Torch flashlight and Mi Remote directly from the lock screen. Instead of moving or uninstalling apps one by one, you can now select multiple apps. To do so, pinch-in on the home screen. Select the apps by tapping their icons. If you want to move them to a new screen, just hold and drag them to the screens below. If you want to uninstall them, hold and drag them towards the delete icon at the top. However, the feature is slightly buried down. To do so, pinch-in on the home screen and tap on Settings. From Settings, tap Set default screen. Then, tap to choose your default home screen. All you need to do is press the volume up or down button on any screen and then tap the Silent mode toggle inside the Volume controls on the screen to enable it. You can choose to enable either the DND or the Silent mode. The app is not limited to Redmi devices but works on all Android devices. To use Mi Drop , locate the Mi Drop app icon on your home screen. To do so, tap the Recent apps key on your phone and hold the app whose App info you want to open. You have to enable it in the Settings to show it in the Recent Apps. Then, enable Show memory status. By doing this, all the notifications from that app will not clog your notification panel and will appear in a separate folder. Then, on the notification panel, swipe the notification to the left and tap the Unimportant icon at the right corner. These were some of the cool MIUI 9 tips and tricks. Last updated on 19 Apr, Also See.

Chapter 9 : 11 Tips and Tricks for Microsoft Edge on Windows 10

This post offers you some cool Edge Browser Tips and Tricks that will help you get the best of this new web browser and its features, in Windows A home page is a web address that is opened.
