A mother who is a good role-model gives her children an example worth copying. A mother who teaches values inspires character. A mother who supports her kids strengths builds their confidence. A mother who encourages independence cultivates self-reliance. A mother who applauds effort nurtures perseverance. A mother who accepts her kids shortcomings nurtures resilience. A mother who takes time for her kids helps them build strong relationships. A mother who laughs teaches joy. A mother who takes care of herself holds together her happy family. You know more than you think you do. There are many good things about this book, and each of the 12 simple secrets could be something I pick this book back up to read again. The best thing about this book to me is that it is not a "how to" guide, but it is inspiring with just enough instruction to get you going in the right direction. The reason is that you already know how to be a real mom. There is nothing in this book that is new. Unfortunately, these core secrets of real mothering have been obliterated by the frenzy and mania of commercialized parenting. So trust yourself and those maternal instincts. No one knows your child better than you.
