I always recommend my family and friends to Toyota Town. Thank you for take care of me and family. This best will get you whenever you are going safely. I have regularly hauled 10, lbs. I was a Chevy guy for years, but will never turn back. Toyota all the way baby!!! Gas mileage still between 17 to Pros This truck comes in at number 5 in the top 10 full-size pickup class for good reason. While it does not boast as much as other models have to offer, it does offer excellent pricing. Many full-size truck companies work harder to create a better truck than others and end up with too many extras that daily drivers will not use. While the Tundra does offer extras in its higher end models, the most common ones are simple, easy to use trucks that will appeal to the masses. The interior of the Toy The interior of the Toyota Tundra feels much more like a higher-end car than a full-size pickup truck. All models above the base model were completely revamped for and offer inside luxury. The interiors are made of rugged materials, but still manage to stand out in a classic way. The outside of the Toyota Tundra also got a big upgrade for the new year. The hood was raised, the grill protrudes more and it has a more bulked up look than older models. It is made to look as rugged as it is built. The Tundra was built to excel during both on- and off-road trips. It does just that in all situations. Its quick acceleration speeds pleasantly contradict its abilities when off roading, and it performs just as well in a big city as it would on a winding back road. Despite the size of the cab, the Toyota Tundra performed well above average in all of the brake tests that it was subjected to. While it may not be able to stop on a dime like some smaller model trucks and cars, it is one of the best at coming to a complete stop after a period of long and high acceleration. Instead of focusing on a smooth ride, the creators of the Toyota Tundra focused on more important facts and the Tundra remains one of the most truck-like rides on the market. The V8 powered Toyota Tundra did not just pull a space shuttle for a publicity stunt, the makers of this truck wanted to show potential drivers the towing power that is behind this model. The torque is excellent, and it is able to tow up to 10, pounds. Just because the truck is excellent at towing, does not mean it sacrifices anything when it comes to hauling. Toyota has given drivers options to suit their own specific lifestyle with the Toyota Tundra. With everything from a 2WD V6 engine that is made for drivers looking for a truck that will simply get the job done to a bulked up, luxury full-size truck that features a V8 and 4WD Toyota has given plenty to choose from. All models are available with manual and automatic transmissions. As a full-size truck, the Toyota Tundra is not one of the best vehicles on the market for fuel economy. It gets an unimpressive 17 miles per gallon in the city, and it does not come in a diesel fueled model to help ease the amount of fuel that is used. While the Tundra remains rugged and tough, the looks may come across as cheesy to full-size truck buyers. It does not have the long time practice and craftsmanship put into it that more domestic models offer. Although Toyota provided drivers with the CrewMax cab edition to the Tundra, there is still Although Toyota provided drivers with the CrewMax cab edition to the Tundra, there is still not much comfort in the way of seating.
