Perhaps the rear fog lamp is different for those with the option package with the LEDs? A radar has been added to the Active Safety suite of systems along with a Lane Assist function. Could save you from making some sketchy maneuvers Oddly enough, no auto braking Distance warning function General notes The distance warning function can help you to minimise the risk of a collision with a vehicle ahead or reduce the effects of such an accident. If the distance warning function detects that there is a risk of a collision, you will be warned visually and acoustically. Starting the engine also switches on the distance warning function. Important safety notes Observe the "Important safety notes" section for driving safety systems more. In particular, the detection of obstacles can be impaired if there is: Following damage to the front end of the vehicle, have the configuration and operation of the radar sensor checked at a qualified specialist workshop. This also applies to collisions at slow speeds where there is no visible damage to the front of the vehicle. Function To switch off: Indicator lamp To switch on: Indicator lamp goes out. The distance warning function issues a warning at speeds: The distance warning lamp then lights up in the instrument cluster. An intermittent warning tone will then sound and the distance warning lamp will light up in the instrument cluster. Brake immediately in order to increase the distance from the vehicle in front. Due to the nature of the system, particularly complicated but non-critical driving conditions may also cause the system to display a warning. With the help of the radar sensor system, the distance warning function can detect obstacles that are in the path of your vehicle for an extended period of time. There are two different On Board Computers as well. The first is monochromatic like the The other is a colour LCD. Even though the first has a lot of functions in itself, that second one is pretty comprehensive Miss Mercedes is offline.
