For decades, an outstanding feature distinguishing United States copyright law from that of the rest of the world has been an emphasis on formalities, among other things a requirement that the public be given formal notice of every work in which copyright is claimed. This facet of the law has origins in the original Copyright Act of Many of the formalities under the and Acts have been lifted with the accession of the United States to the Berne Convention, via passage of the Berne Convention Implementation Act of Before , federal copyright was generally secured by the act of publication with notice of copyright, assuming compliance with all other statutory conditions. United States works in the public domain on January 1, remained in the public domain under the Copyright Act. As of March 1, , the effective date of the Berne Convention Implementation Act, copyright notice, among other things, was prospectively eliminated as a condition to copyright protection. However, where a copyright notice is required, essentially for all published Pre-Berne content, and its omission is not excused, the legal consequence is to inject the work into the public domain. In doing so, no representation of affiliation, association or the like is intended, unless otherwise stated. Place suitable blocking under frame to raise front wheel several inches off the floor. For best results, use a hydraulic center stand on a level surface. Refer to Touring Model Service Manual and remove front wheel, fender and brakes. Refer to Touring Model Service Manual and remove headlamp nacelle. Loosen fork cap bolt from fork tube plug at top of fork tube, but do not remove. Standing at front of vehicle, loosen pinch bolt with lockwasher on right side of lower fork bracket, but do not remove. Spray glass cleaner on fork tube above the rubber fork stop. After lubricating surfaces, move fork stop up fork tube until it contacts bottom of upper fork bracket. Holding fork slider to prevent fork from dropping, remove fork cap bolt from fork tube plug. Slide fork tube down and out of upper fork bracket, fork stop, lower fork bracket and slider cover. Thread fork cap bolt back into fork tube plug to prevent loss of oil while handling. Move forks to bench area. Place suitable drain pan on floor beneath vise. Repeat Steps to remove left fork. Left And Right Fork-Disassembly 1. Remove nuts, lockwashers, flat washers and axle holder from studs at end of fork slider. Clamp end of tool in vise in a horizontal position with plastic knobs facing toward you. With the fork cap bolt topside, clamp fork tube between rubber pads on inboard side of tool. Tighten knobs until fork tube is securely held. Remove fork cap bolt from fork tube plug. Remove quad ring seal. Save bolt but discard quad ring seal. Using wrench flat, slowly unthread fork tube plug from fork tube. Be aware that fork tube plug is under spring pressure, so have a firm grasp on plug as the last thread is turned. Remove fork spring from fork tube. Remove fork assembly from fork tube holder. Turning fork upside down, drain fork oil into drain pan. For best results, slowly pump fork tube and slider at least 10 times. Install fork spring back into fork tube. Place a shop rag on the floor, and turning fork assembly upside down, press end of spring against rag. While compressing spring to prevent rotation of damper tube, remove 6mm screw from end of fork slider. Use air impact wrench for best results. Remove and discard fork spring. Remove and discard damper tube. Remove wear ring and rebound spring. Do not expand or stretch retaining clip to remove from fork tube or clip may become bent or distorted. Using pick tool, remove retaining clip between fork slider and fork tube. Remove fork tube from fork slider. NOTE To overcome any resistance, use the fork tube as a slide hammer, that is, first push fork tube into fork slider and then pull it outward with a moderate amount of force. Repeat this sequence until fork tube separates from fork slider. Slide fork oil seal, slider spacer and slider bushing off end of fork tube. Discard fork oil seal and slider bushing. Remove the lower stop. Right and Left Fork-Assembly Exercise caution to avoid scratching or nicking fork tube. Damaging tube can result in fork oil leaks after assembly. See Service Parts Illustration. Install wear ring removed in step With the wear ring topside, slide new damper tube into fork tube, so that tube end drops through hole at bottom of fork tube. Install lower stop at end of damper tube. Install fork slider in fork tube holder. Slide fork tube into fork slider. If necessary, obtain new slider bushing 14 Part Number , not included. Coat slider bushing ID with clean fork oil. Slide slider bushing down fork tube. Slide slider spacer down fork tube until it contacts slider bushing.
