

Chapter 1 : SBCC - State Building Code

Uniform Plumbing Code Soft Cover. The edition of the Uniform Plumbing Code (UPC®) represents the most current approaches in the plumbing field. It is the fifth edition developed under the ANSI Consensus process is designated as an American National Standards by the American National Standards Institute (ANSI).

Exam content information Effective Jan. The amendments play a vital role in how plumbing installations are performed in Washington. You are urged to study them thoroughly. The Journey Level and Residential Specialty examination consists of 3 parts: Technical and general trade knowledge: This part of the exam is questions on plumbing code taken from Chapters 1 through 10 and 15 and Code application knowledge for waste and vents: This part of the exam is a waste and vent sizing exercise taken from Chapter 7. You will be provided with a drawing of a building showing elevated views of plumbing fixtures along with the illustrated piping for the vents, waste, and cleanouts that are needed to drain and vent these fixtures. You will provide fixture units and pipe sizes. Use minimum sizing as allowed by the UPC along with maintaining aggregate venting. Code application for water piping: This part of the exam is a water pipe sizing exercise taken from Chapter 6. You will be provided with a drawing of a building showing elevated views of plumbing fixtures along with the illustrated piping for the hot and cold water distribution system. You will provide the fixture units and pipe sizes. Use minimum sizing as allowed by the UPC. The exam is closed book, but tables The Backflow Specialty examination contains questions relating to safety, regulatory, operation, and trouble shooting of backflow prevention assemblies. Examination application information Applications for examinations must be processed by the Tumwater office at least two 2 weeks prior to the examination date. This allows adequate time for verification and notification by mail if application is accepted.
