Mast base MP, assembly for installation Figure 8: Mast base MP, assembly for installation Assembly and Installation a. Check to see that the conversion has been made before beginning installation. Two 6-volt storage batteries, one originally furnished with the truck, and one supplied with the conversion kit, are installed between the front seats to furnish, in series, volt power supply for both the radio set and the vehicular system. Two 6-volt storage batteries are supplied with the conversion kit and are installed one behind each front seat. These two batteries, in series, furnish volt power for operation of the set independently of the 6-volt system of the vehicle. Components of the radio set should be installed as shown in figure 24 and as directed below. Remove the rear seat from the vehicle. Figure 23 shows assembly and details of the mounting. Refer to figure 24 for drilling details and drill the floor, rear and left wall of the vehicle. Install Mounting FT and secure in position with the provided hardware. Reinforce the mounting with the strap item 50 as shown in figure Fasten the loudspeaker to the mounting with the hardware provided. Drill Cabinet CH for installation of the insulators as shown in detail in figure Place the cabinet on the mounting and secure with the hardware provided. Fasten to the floor of the cabinet with the hardware provided. Route the two Power Cords CO to the vehicle terminal box, and secure with clamps as. Use the connectors and bondnuts to bush the power cord at the knockout hole of the terminal box. Mount the brackets and reinforcing plates and secure with the hardware provided. Refer to figure 7 or 8 and assemble the mast base as follows: Place item 1 over the hole in the mast bracket. Place item 2 over item 1. Place item 3 over item 2. Insert item 4 through the hole in the mast bracket. Place item 5 over the flange of item 6. Insert item 6 upward through the hole in the mast bracket. Place items 7 and 8 beneath item 6 and fasten entire assembly in place with items 9 and Screw the mast sections together and secure with the clamps. Fasten the clamps to the male end of the mast sections. Then screw the mast antenna into the mast base. When not in use, carry the mast sections in Roll BG Place over the mast base when the mast sections are not in use. Install with the hardware provided as shown in figure Mount the dynamotor in the dynamotor compartment of the transmitter and secure with the five screws provided. Connections are made automatically by the plug on the rear of the dynamotor chassis which engages the socket in the rear of the compartment. Remove the patch cover on the top of the transmitter, right end, and place the six links in the volt position as indicated by the arrow on the link strap. Secure the transmitter to the right end of Mounting FT with the thumbscrew locking devices. Remove the screws on the outer edge of the front panel of the receiver and the screw in the rear center of the cabinet and remove the receiver chassis from the cabinet. Install the dynamotor on the top of the receiver chassis and lock in place with the snap side fasteners. All connections to the dynamotor are made by the cord terminating in Plug P, when placed in the socket on the receiver chassis. The name plate on the front panel of the receiver should be turned to read volt operation. Secure the receiver to the mounting with the thumbscrew locking devices. Cut Wire W to required length and solder-tin ends. Connect to the terminal on the mast base, pass through Insulators IN and IN, and connect to the antenna terminal of the radio transmitter. Enough slack must be left to permit free movement of all units having shock mounting. Cording or cable likely to rub against sharp edges should be taped with at least two layers to prevent damage. Solder-tin all wire ends.

Chapter 6 : 30 AMP RV Detachable Power Cord

Very happy with purchase as I had a difficult time finding a 30 inch black leather cord necklace. Just wish they made them in brown as well! Item came nicely wrapped in tissue paper as well as in a gift box which is great if someone just wants to purchase the item as a gift and send it to the recipient upon payment.
