Literary genre and List of literary genres A literary genre is a category of literary composition. Genres may be determined by literary technique , tone , content , or even as in the case of fiction length. They also must not be confused with format, such as graphic novel or picture book. The distinctions between genres and categories are flexible and loosely defined, often with subgroups. The most general genres in literature are in loose chronological order epic , tragedy , [1] comedy , novel , and short story. They can all be in the genres prose or poetry , which shows best how loosely genres are defined. Additionally, a genre such as satire might appear in any of the above, not only as a subgenre but as a mixture of genres. Finally, they are defined by the general cultural movement of the historical period in which they were composed. In popular fiction , which is especially divided by genres, genre fiction is the more usual term. In literature , genre has been known as an intangible taxonomy. This taxonomy implies a concept of containment or that an idea will be stable forever. The earliest recorded systems of genre in Western history can be traced back to Plato and Aristotle. Lyric poetry , the fourth and final type of Greek literature , was excluded by Plato as a non-mimetic mode. Essentially, the three categories of mode, object, and medium can be visualized along an XYZ axis. Genette continues by explaining the later integration of lyric poetry into the classical system during the romantic period , replacing the now removed pure narrative mode. Lyric poetry, once considered non-mimetic, was deemed to imitate feelings, becoming the third leg of a new tripartite system: This system, which came to "dominate all the literary theory of German romanticism and therefore well beyond" 38 , has seen numerous attempts at expansion or revision. However, more ambitious efforts to expand the tripartite system resulted in new taxonomic systems of increasing scope and complexity. Genette reflects upon these various systems, comparing them to the original tripartite arrangement: Taxonomy allows for a structured classification system of genre, as opposed to a more contemporary rhetorical model of genre. Film genre The basic genres of film can be regarded as drama, in the feature film and most cartoons , and documentary. Most dramatic feature films, especially from Hollywood fall fairly comfortably into one of a long list of film genres such as the Western , war film , horror film , romantic comedy film , musical , crime film , and many others. Many of these genres have a number of subgenres, for example by setting or subject, or a distinctive national style, for example in the Indian Bollywood musical. Music genre A music genre is a conventional category that identifies pieces of music as belonging to a shared tradition or set of conventions. The term is now perhaps over-used to describe relatively small differences in musical style in modern rock music , that also may reflect sociological differences in their audiences. The artistic nature of music means that these classifications are often arbitrary and controversial, and some genres may overlap. There are several academic approaches to genres. Green lists madrigal , motet , canzona , ricercar , and dance as examples of genres from the Renaissance period. Moore, state that genre and style are two separate terms, and that secondary characteristics such as subject matter can also differentiate between genres. Geographical origin is sometimes used to identify a music genre, though a single geographical category will often include a wide variety of subgenres. Several music scholars have criticised the priority accorded to genre-based communities and listening practices. For example, Laurie argues that "music genres do not belong to isolated, self-sufficient communities. People constantly move between environments where diverse forms of music are heard, advertised and accessorised with distinctive iconographies, narratives and celebrity identities that also touch on non-musical worlds. Genre, and numerous minutely divided subgenres, affect popular culture very significantly, not least as they are used to classify it for publicity purposes. The vastly increased output of

popular culture in the age of electronic media encourages dividing cultural products by genre to simplify the search for products by consumers, a trend the Internet has only intensified. Linguistics[edit] In philosophy of language , genre figures prominently in the works of philosopher and literary scholar Mikhail Bakhtin. In this sense, genres are socially specified: Norman Fairclough has a similar concept of genre that emphasizes the social context of the text: Genres are "different ways of inter acting discursively" Fairclough, Rhetoric[edit] In the field of rhetoric , genre theorists usually understand genres as types of actions rather than types or forms of texts. Miller argues that these "typified rhetorical actions" p. Building off of Miller, Charles Bazerman and Clay Spinuzzi have argued that genres understood as actions derive their meaning from other genres "that is, other actions. Bazerman therefore proposes that we analyze genres in terms of "genre systems", [11] while Spinuzzi prefers the closely related concept of "genre ecologies". Combining rhetorical genre theory with activity theory , David Russell has proposed that standard English composition courses are ill-suited to teach the genres that students will write in other contexts across the university and beyond. Plato divided literature into the three classic genres accepted in Ancient Greece: Poetry is further subdivided into epic , lyric , and drama. The divisions are recognized as being set by Aristotle and Plato ; however, they were not the only ones. Many genre theorists added to these accepted forms of poetry. Classical and Romance genre theory[edit] The earliest recorded systems of genre in Western history can be traced back to Plato and Aristotle. He described Plato as the creator of three imitational, mimetic genres distinguished by mode of imitation rather than content. These three imitational genres include dramatic dialogue, the drama ; pure narrative, the dithyramb ; and a mixture of the two, the epic. Plato excluded lyric poetry as a non-mimetic, imitational mode. He then uses two additional criteria to distinguish the system. The first of the criteria is the object to be imitated, whether superior or inferior. The second criterion is the medium of presentation: Essentially, the three categories of mode , object , and medium can be visualized along an XYZ axis. Genette explained the integration of lyric poetry into the classical system by replacing the removed pure narrative mode. Lyric poetry , once considered non-mimetic, was deemed to imitate feelings, becoming the third "Architext", a term coined by Genette, of a new long-enduring tripartite system: This new system that came to "dominate all the literary theory of German romanticism " Genette 38 has seen numerous attempts at expansion and revision. However, more ambitious efforts to expand the tripartite system resulted in new taxonomic systems of increasing complexity. Genette reflected upon these various systems, comparing them to the original tripartite arrangement: Culture[edit] Genre is embedded in culture but may clash with it at times. There are occasions in which a cultural group may not be inclined to keep within the set structures of a genre. Individuals, Institutions and Ideology". Amy Devitt further expands on the concept of culture in her essay, "A Theory of Genre" by adding "culture defines what situations and genres are likely or possible" Devitt Genre not only coexists with culture but also defines its very components. Genres abound in daily life and people often work within them unconsciously; people often take for granted their prominence and ever present residence in society. Individuals may find themselves shaping the rhetorical situations, which in turn affect the rhetorical responses that arise out of the situation. Because the social workers worked closely with different families, they did not want to disclose many of the details that are standard in the genre of record keeping related to this field. Giving out such information would violate close cultural ties with the members of their community. Audiences[edit] Although genres are not always precisely definable, genre considerations are one of the most important factors in determining what a person will see or read. Genre creates an expectation in that expectation is met or not. Many genres have built-in audiences and corresponding publications that support them, such as magazines and websites. Inversely, audiences may call out for change in an antecedent genre and create an entirely new genre. The term may be used in categorizing web pages , like "news page" and "fan page", with both very different layout, audience, and intention Rosso, Subgenre[edit] A subgenre is a subordinate within a genre. For example, if a fantasy story has darker and more frightening elements of fantasy, it would belong in the subgenre of dark fantasy ; whereas another fantasy story that features magic swords and wizards would belong to the subgenre of sword and sorcery.

Basic characteristics[edit] The nature of Romanticism may be approached from the primary importance of the free expression of the feelings of the artist. Samuel Taylor Coleridge and others believed there were natural laws the imaginationâ€™”at least of a good creative artistâ€™”would unconsciously follow through artistic inspiration if left alone. The concept of the genius , or artist who was able to produce his own original work through this process of creation from nothingness, is key to Romanticism, and to be derivative was the worst sin. This particularly in the effect of nature upon the artist when he is surrounded by it, preferably alone. In contrast to the usually very social art of the Enlightenment , Romantics were distrustful of the human world, and tended to believe a close connection with nature was mentally and morally healthy. Romantic art addressed its audiences with what was intended to be felt as the personal voice of the artist. So, in literature, "much of romantic poetry invited the reader to identify the protagonists with the poets themselves". The application of the term to literature first became common in Germany, where the circle around the Schlegel brothers, critics August and Friedrich , began to speak of romantische Poesie "romantic poetry" in the s, contrasting it with "classic" but in terms of spirit rather than merely dating. Friedrich Schlegel wrote in his Dialogue on Poetry , "I seek and find the romantic among the older moderns, in Shakespeare, in Cervantes, in Italian poetry, in that age of chivalry, love and fable, from which the phenomenon and the word itself are derived. Margaret Drabble described it in literature as taking place "roughly between and ", [24] and few dates much earlier than will be found. In English literature, M. Abrams placed it between , or , this latter a very typical view, and about , perhaps a little later than some other critics. The early period of the Romantic Era was a time of war, with the French Revolution â€™” followed by the Napoleonic Wars until These wars, along with the political and social turmoil that went along with them, served as the background for Romanticism. The first emerged in the s and s, the second in the s, and the third later in the century. That it was part of the Counter-Enlightenment , a reaction against the Age of Enlightenment , is generally accepted in current scholarship. Its relationship to the French Revolution , which began in in the very early stages of the period, is clearly important, but highly variable depending on geography and individual reactions. Most Romantics can be said to be broadly progressive in their views, but a considerable number always had, or developed, a wide range of conservative views, [31] and nationalism was in many countries strongly associated with Romanticism, as discussed in detail below. In philosophy and the history of ideas, Romanticism was seen by Isaiah Berlin as disrupting for over a century the classic Western traditions of rationality and the idea of moral absolutes and agreed values, leading "to something like the melting away of the very notion of objective truth", [32] and hence not only to nationalism, but also fascism and totalitarianism , with a gradual recovery coming only after World War II. This is most evident in the aesthetics of romanticism, where the notion of eternal models, a Platonic vision of ideal beauty, which the artist seeks to convey, however imperfectly, on canvas or in sound, is replaced by a passionate belief in spiritual freedom, individual creativity. Arthur Lovejoy attempted to demonstrate the difficulty of defining Romanticism in his seminal article "On The Discrimination of Romanticisms" in his Essays in the History of Ideas ; some scholars see Romanticism as essentially continuous with the present, some like Robert Hughes see in it the inaugural moment of modernity , [35] and some like Chateaubriand , Novalis and Samuel Taylor Coleridge see it as the beginning of a tradition of resistance to Enlightenment rationalismâ€™”a "Counter-Enlightenment"â€™” [36] [37] to be associated most closely with German Romanticism. An earlier definition comes from Charles Baudelaire: This movement was led by France, with Balzac and Flaubert in literature and Courbet in painting; Stendhal and Goya were important precursors of Realism in their respective media. However, Romantic styles, now often representing the established and safe style against which Realists rebelled, continued to flourish in many fields for the rest of the century and beyond. In music such works from after about are referred to by some writers as "Late Romantic" and by others as "Neoromantic" or "Postromantic", but other fields do not usually use these terms; in English literature and painting the convenient term "Victorian" avoids having to characterise the

period further. In northern Europe, the Early Romantic visionary optimism and belief that the world was in the process of great change and improvement had largely vanished, and some art became more conventionally political and polemical as its creators engaged polemically with the world as it was. Elsewhere, including in very different ways the United States and Russia, feelings that great change was underway or just about to come were still possible. Displays of intense emotion in art remained prominent, as did the exotic and historical settings pioneered by the Romantics, but experimentation with form and technique was generally reduced, often replaced with meticulous technique, as in the poems of Tennyson or many paintings. If not realist, late 19th-century art was often extremely detailed, and pride was taken in adding authentic details in a way that earlier Romantics did not trouble with. Many Romantic ideas about the nature and purpose of art, above all the pre-eminent importance of originality, remained important for later generations, and often underlie modern views, despite opposition from theorists.

Generic Characteristics of Romance Fiction – the Heroine December 18, by Valerie Williamson 2 Comments A successful romance typically features a vulnerable young woman. Image courtesy of Val Williamson, all rights reserved The most successful convention of romance fiction is that by some twist of fate, the heroine finds her social identity threatened or already destroyed. How will she reconstruct it? Romance blockbusters usually feature this vulnerable young woman and tell the story from her point of view. The opening situations that will drive the romance plot are: Some of the classic romance heroines demonstrate this: In her article on the problematic subjects in the series, Mary Bridgeman comments on this: Through her work she begins dating and then marries Max De Winter. This novel is often perceived as a 20th century version of Jane Eyre. Originally published in hardback on both sides of the Atlantic simultaneously, it has never been out of print. Eventually she comes to love him and realises that he loves her. This explicit and sensational historical novel was published first in paperback, then a new strategy for mass-market romance novels. Characteristics of Romance Fiction: After the end of World War One this becomes the first volume of the long-running Forsyte Saga, a recurring dynastic series on radio, television and bestseller lists. The perception of how the hero looks dresses and behaves bestows a particular social identity – this man is the quarry of all chicklit heroines. There are noticeable similarities between this novel and Pride and Prejudice. Circumstances take the heroine, Muriel Roscoe, from the safe life in England to live with her father, the general of a besieged fort in India. She became mentor to the young Barbara Cartland, whose long career produced over romance novels which famously never stepped beyond the bedroom door. The Sheik by E. Hull was the first great erotic popular novel of post-World War One and its film version in became very influential. The heroine, Diana Mayo, experiences kidnapping and being kept prisoner in the desert by the man she eventually loves. The exotic location later becomes a staple of Mills and Boon Harlequin romance fiction. This is the first worldwide bestselling romance rather than horror genre novel with a vampire as hero. The romance between Hulk and Black Widow was interesting, this universe has been weirdly sexless so it was nice to see some tension between the characters. But good moments don't make a good movie. What annoyed me in Age of Ultron was how it just glossed over so many things.

Romanticism (also known as the Romantic era) was an artistic, literary, musical and intellectual movement that originated in Europe toward the end of the 18th century, and in most areas was at its peak in the approximate period
