Toggle Highlight Setting Up a Child Device This section explains how to set up a child device and register it to the parent device. If your parent device or your child devices have multiple network interface cards NIC , add a host-route entry by Command Line Interface CLI following the instructions below. On the parent device in the CLI: Make sure the parent device is operational. Log on to the management console. Make sure that you are logging on to the parent device management console. On the child device, do the following: Log on to the management console of the child device. On the Deployment Settings screen, select Child Device and specify the IP address, port, logon user name and password for the management console of the parent device. Note The logon user account that you specified must have full administration rights. On the parent device, do the following: Go to System Status. Verify that the child device appears under Managed Services and that a green check mark appears under Connection. Select Redistribute all or Only redistribute to approved senders. Tip Trend Micro recommends choosing Redistribute all. Note If you registered an EUQ-enabled child device to its parent device, add senders to the approved senders list, and then re-distribute EUQ data. Some of the newly added approved senders might not appear. Trend Micro recommends the following: After redistributing EUQ, the administrator informs all end users to verify that the newly added approved senders are still available. That the administrator notifies all end users not to add EUQ approved senders list when the administrator is adding a child device and redistributing EUQ.

This is a list of books around the Amstrad CPC sorted by the language in which they are written.

Joyce Library Having checked various closets with PCW related books and sorted out the duplicates, I did a quick inventory as well and herewith publish the listing for the benefit of all. The list below refers only to PCW dedicated books unless stated otherwise , no software handbooks and manuals, and contains title, author, publisher, year indication for e. Plus the contents of the cover and, in some cases, comments from me. The latter does not mean that the relevant book is, or the others are, inferior, just an indication of the value I think can be attributed to that book. The listing is sorted alphabetically on title. Alec Rae, Future Publishing, English pages The essential handbook for beginners and experienced users alike. Step by step guides to using the various features of the program. Illustrated examples of the results you can expect from you work with MicroDesign. Practical help and advice on how to get the very best from MicroDesign. Ian Sinclair, Glentop, English pages. This book is designed for the more experienced users of LocoScript, who are making intensive use of the package. Readers will find this book an invaluable aid to using LocoScript. It offers a thorough examination of the more sophisticated features of LocoScript, enabling the software to be utilised to the full. The cut, copy and past facilities are fully described to enable more elaborate formats to be created. This process is further enhanced by the description of how to produce new layouts and templates. Disk problems are discussed and methods of overcoming them offered. Mit zahlreichen Beispielen und ausfuehrlichen systemspezifischen Daten zur internen Speicherorganisation und zu Schnittstellen. Need it presented in understandable and easy to read bit size chunks? Then this book is for you! Digital Research Commodore reprint, approx. Rogers, Phoenix Publishing Ass. Dit boek is bedoeld voor iedereen die van mening is dat op de CPC-computer geen goede grafische toepassingen verwezenlijkt kunnen worden.
