

Chapter 1 : 31 Days of Holiday Wreaths | Martha Stewart

Come Christmas, let your house be filled with magic and cheer. Show off your festive spirit to your neighbors and dinner guests with one of these easy-to-make (or easy-to-buy!) winter wreaths.

The wreath frame can be as small or as large as you like, and there are several options for the type of frame to use. Frame options are metal frames, foam frames, grapevine frames, willow frames, or fake pine bough frames from the Dollar Store. If the frame is ugly, not to worry. It can be covered or painted to match the color of the ornaments chosen. Getting tinsel garland or ribbon to wrap the wreath is optional, but using either of these materials will help to hide an ugly wreath frame by wrapping the frame. Spray painting with a coordinating color is another option. Select your ornament balls in a variety of coordinating colors and sizes from tiny to large. Selecting both shiny and matted ornaments will add to the dimension and interest of the wreath. To make a wreath like the one pictured you would also need to get glittered snowflakes and about a dozen optional shaped ornaments. Now that you have all of your supplies assembled, it is time to begin the base of the wreath. Spread out the newspaper to protect your work surface from dripping hot glue. A piece of aluminum foil under the glue gun is also a good idea. I have found it easiest to add a wire to the wreath form prior to gluing on the ornaments if this is how you plan to hang the wreath. When waiting until the end, if using glass ornaments, the balls will often break when trying to tie on a hanger. Remove all of the metal ornament caps. Select the large ornaments you want to use for your wreath base. One you are happy with your selection begin gluing each ball onto the wreath. If using a foam wreath, put glue all around the ornament spout and stick it into the foam. Hold the ball until you are sure it is not going to fall off when you let go. Do this all around the outside perimeter of the wreath. On any other type of form, be sure you have the form lying on the newspaper with the back facing up to you. Glue each ornament with the spout facing out and down towards the inside of the wreath. Next, follow the above step the same way on the inside of the wreath. Now that the outside and inside of the wreath are finished, carefully flip the wreath over so that you are now looking at the front view. Glue the ornaments on randomly, beginning with the largest size, to fill in the first layer on the front. Once the front bottom layer is glued on use the medium and smaller sizes to randomly fill in the gaps. When building a wreath, the larger ornaments will be the base and the smaller sizes will be used at the end to fill in the gaps. Make it as large as you like while retaining the circular shape. Again, if there are any gaps fill them with a smaller sized ornaments. Adding silver Mardi Gras beads, garland, or silver jingle bells are options that will really add to the festive look of your Christmas wreath. If using bead strands, now is the time to weave the beads around the ornaments and glue them down. This can also help to fill small gaps around the larger ornaments. The last step is to add the ribbon bow. Now proudly hang your fabulous creation! Have a look at the gorgeous ornament wreaths examples I have selected to show you located in the photo gallery below. Each pack comes with an excellent assortment of designs, colors, and shapes that are all coordinated to go together on a wreath or a Christmas tree. Gold sheet, Etruscan artwork, 6th BC. From a tomb near Tarquinia. Wreaths were a design used in ancient times in southern Europe. The most well-known are pieces of Etruscan civilization jewelry, made of gold or other precious metals. Symbols from Greek myths often appear in the designs, embossed in precious metal at the ends of the wreath. Ancient Roman writers referred to Etruscan corona utilis, which were wreaths with their leaves sewn onto a background. The plants shown making the wreaths in Etruscan jewelry include ivy, oak, olive leaves, myrtle, laurel, wheat and vines. Wreaths were worn as crowns by Etruscan rulers. The Etruscan symbolism continued to be used in Ancient Greece and Rome. Roman magistrates also used several other prominent Etruscan symbols in addition to a golden wreath crown: Olive wreath and Laurel wreath A replica bust of Apollo wearing a laurel wreath. The wreath that was commonly used was the laurel wreath. When he pursued her she fled and asked the river god Peneus to help her. Peneus turned her into a laurel tree. From that day, Apollo wore a wreath of laurel on his head. Laurel wreaths became associated with what Apollo embodied; victory, achievement and status and would later become one of the most commonly used symbols to address achievement throughout Greece and Rome. Laurel wreaths were used to crown victorious athletes at the original Olympic Games [5] and are still worn in Italy by university students who just graduated. For example, oak leaves symbolized wisdom, and were associated with Zeus , who according to Greek mythology made his decisions while resting in an oak grove. The Twelve Tables , dating to BC, refer to funeral wreaths as a long-standing tradition. A five-candle Advent wreath in the chancel of a Christian church top and a Christmas wreath adorning an American home, with the door chalked for Epiphanytide and the wreath hanger bearing a placard of the Angel Gabriel bottom Harvest wreaths, a common household decoration today, are a custom with ancient roots in Europe. The creation of harvest wreaths in Europe can be traced back to ancient times, and is associated with animistic spiritual beliefs. In Ancient Greece, the harvest wreath was a sacred amulet, using wheat or other harvested plants, woven together with red and white wool thread. The harvest wreath would be hung by the door year-round. A harvest wreath was carried to Pyanopsia and Thargelia by young boys, who would sing during the journey. The laurel or olive wreath would be hung at the door, and then offerings were made to Helios and the Hours. It was hoped that this ritual would bring protection against crop failure and plagues. Wreaths are made of different shapes and sizes, using harvested grain plants, fruit and nuts. The wreath is then brought to a church for a blessing by a priest. The tradition includes a procession to the family home from the church, with a girl or young woman leading the procession and carrying the wreath. The procession is followed with a celebration and feast. Advent and Christmas wreaths[edit] In Christianity, wreaths are used to observe the Advent season, in preparation for Christmastide and Epiphanytide , as well as to celebrate the latter two liturgical seasons. For every Sunday of Advent, starting with the fourth Sunday before Christmas, he would put a white candle in the wreath and for every day in between he would use a red candle. While Advent wreaths are erected on stands or placed on tables, Christmas wreaths are often hung on doors or walls. Evergreen wreaths were laid at the burial place of early Christian virgin martyrs in Europe, the evergreen representing the victory of the eternal spirit over death. A young woman of the same age as the one being mourned would lead the funeral procession, carrying a wreath of white flowers to represent the purity of the deceased, and "that eternal crown of glory reserved for her in heaven". Flowers represented life and resurrection. Specific flowers were used in funeral wreaths to represent particular sentiments. Cypress and willow were used for crafting wreath frames, and were associated with mourning by the Victorians. Wreaths may also be laid in memory of persons lost at sea, either from an accident or due to navy action. In a memorial service at sea, the wreath is lowered to the water and set adrift. Wreaths worn as crowns[edit] See also: Wreath attire A wreath may be used as a headdress made from leaves, flowers and branches. It is typically worn in festive occasions and on holy days. Wreaths originally

were made for use with pagan rituals in Europe, and were associated with the changing seasons and fertility. Christianity accepted the symbolism of the wreath based upon its Roman association with honour and moral virtue. The observance of May Day in England includes Maypole festivities, culminating in a race by young unmarried men to climb to the top of the Maypole to capture the May Day wreath perched at the top of the pole. The winner of this contest would wear the wreath as his crown, and would be recognized as the May Day King for the rest of the holiday. Plants traditionally used to make Midsummer wreaths and garlands include white lilies, green birch , fennel , St. The flowers used in making the Midsummer wreath had to be picked early in the morning before the dew had dried; the belief was that once the dew dried, the magical properties of the plants evaporated with the dew. Wreath symbolism in England[edit] By the Renaissance period, wreaths became symbols of political and religious alliances in England. Protestant reformers such as the Puritans saw wreaths and the holidays they were associated with, such as May Day, as being pagan corrupting influences that destroyed healthy Christian morality. Soldiers confiscated wreaths in Oxford on May Day of

Kitty has extensively studied the history, traditions, and celebration of ancient and modern holidays. The Christmas wreath has a deep ancient story. Source History of the Christmas Wreath: Christmas wreaths are one of the most beloved Christmas decorations adorning front doors of homes and mantles today. But where did the idea for the Christmas wreath originate? What is the history of the Christmas wreath and why do we find them to be such an integral part of our Christmas decorating on an annual basis? If we look back to the ancient Celts of Europe, Christmas was celebrated in those times as something known as the Winter Solstice. It is here that we can begin to trace the history of the Christmas wreath. Christmas to the Celts had other names such as Yule and the like; however, the main reasons for celebration was to celebrate the return of the sun or the birth of the god. One of the many decorations that the ancient Celts used in their Winter Solstice traditions and decorations were boughs of holly. Think of the popular Christmas carol "deck the halls with boughs of holly Many Christmas wreaths today are made out of holly or made to imitate holly with its bright green, spiky leaves and flamboyantly red berries. But what about the circular structure of the Christmas wreath? Where did that idea come from? Golden wreaths or coronas were worn only by royalty and to commemorate the Roman gods. The idea of the Christmas wreath being a circle is a powerful symbol that represents many different things, depending on the seasonal holiday you celebrate. If you indeed celebrate Christmas as the birthday of Christ, then the Christmas wreath is said to represent the preparation of the coming of Christ. If you are a Pagan and celebrate Yule, then the Christmas wreath might represent the idea of eternity or divinity. The Christmas wreaths were said to have been constructed of evergreen branches, symbolizing the life of the earth that never truly dies despite the blistery winter winds and chills. Throughout the centuries and in many different cultures all over the world the wreath has been used as a costume piece as a headdress and also to decorate homes and buildings for the winter season and festivities. Since America and Europe have been Christianized, the wreath has become a symbol widely associated with the Christmas season. Think about what the circle means to you and your family, and decorate your Christmas wreath with symbols of love and life. Decorate your Christmas wreath with representations of this past year and the hope of what the new year brings.
