We know today that Peter was christened in Newton Ferrers, Devon. See Gee of Devon. This branch contains some fascinating characters. Parish records in Newton Ferrers, Devon show that he was crossing the Atlantic regularly. He may have been related to early Gee of New Hampshire Gee. His son Joshua was kidnapped by the Barbary pirates and held for six years until ransomed. Back in Boston, he used his shipbuilding knowledge to open a shipyard. There is frequently confusion between this and the Old North Church. This branch pronounces Gee with a hard "g", as do Gee of Lyme. The closest related branch is Gee of Leeds and Gee of Leicester. More participants are needed to clarify the relationships. The beginnings of this line have been extensively documented. A story passed down through the Virginia family has the founding Charles as the son of one Thomas Gee of Boston. However DNA results done as part of this study prove that the two families are not related. Ned Gee, Lunenburg County, Virginia. While multiple parallel mutations on a single marker are not common, this marker is one of the most volatile. John<sup>3</sup> went on to found the Tennessee branch, which has been partially documented by Zola Rymer Graf. The earliest records show David using the Gee spelling, records between show him using both Gee and Jay. After , the family seems to have settled on the surname Jay. Deeds show the couple lived in Loudon Co for a time. They had three sons: Jay b also to Minnesota. All descendants are believed to have been active Catholics into the midth century. This information is through the courtesy of the Jay Family Association. The genetics show this family being very closely related to the descendants of Charles Gee d The move from Prince George County north to Maryland would not have been logical. Henry Gee of Henrico. This line has been documented in a series of four articles by Robert E. John<sup>1</sup> signed the Eastchester Covenant in He was born in and married Catherine DeRosselle. This is a textbook story of how DNA can help place lines. This discounted family lore of German ancestry and tied to two published accounts of their ancestor and his brother cutting their way through thick forests and crossing a frozen river on their pioneering journey to Michigan. The DNA study needs more participants before clarifying the relationships.
