**Chapter 2 : 21 Lost Gentleman Traditions That Still Apply Today**

*A Gentleman at the Table will give any man the knowledge he needs to maneuver any dining situation - from a casual meal of fried chicken at his mom's house to a seven-course dinner at the finest restaurant in the world.*

How To Be a Gentleman Guide to Table Manners How To Be a Gentleman Guide to Table Manners As often as we sit at a table to eat a meal, one would assume we automatically know and practice proper dining etiquette; when the reality is, most men are clueless about table manners. Sure, we know we should chew with our mouths closed, and never talk with a full mouth, but what about everything else? Image is not just about clothing and fashion, but manners, as well. Table manners are about consideration and respect for others—two things that are never out of style. If not, always bring a gift; which you can do even if you bring food. If they are drinkers, a nice bottle of wine will do. Flowers or a box of candy are good choices, also. Turn your cell phone OFF. Avoid talking and texting while at the table. Pull the chair out for any woman who will be sitting next to you, if she is unaccompanied by a man. No need to stand for other men. Within the first few minutes of sitting at the table, place your napkin on your lap. The napkin should never be tucked into your shirt like a bib, or into your pants to protect your lap. Opening the napkin halfway is sufficient, yet opening it completely is acceptable, also. Use it to wipe your mouth whenever you feel the need. When leaving the table for any reason, fold the napkin so any soiled areas are hidden, and place it on the table to the left of your plate. Always wait for others to be seated before you start eating. If there are at least three people seated and the hostess gives the okay to begin eating while the food is hot, go right ahead. If there is a group of only four people at the dinner, wait for everyone to be seated before digging in. Always pass food to the right. It will keep order to the flow of things, and will ensure the food is passed to everyone. When passing the salt, always pass the pepper along with it. Did I mention never reach across the table? Take an average size portion of food. Taking large portions of food is rude, especially if it means others may lose out on getting some. Taking seconds is very complimentary to the cook. The type of dinner affair will determine how many utensils are at your place setting. The silverware is usually set in the order of the courses served: If soup is served, use the soup spoon, which is the largest spoon. If all else fails, check and see which utensils the other folks are using and follow their lead. No need to panic or be intimidated. Help yourself to butter before you begin eating, so your knife is clean. Never put used silverware on the table. But, not knowing what to do with it can be a dilemma. The same goes for the salad fork and plate. If there is only one fork for the entire meal and you need to save it after finishing your salad or appetizer, place the fork on the dinner plate. When finished eating the meal, set your knife and fork on the plate in the same position as mentioned above, but angle them, so that the handles are at the 4 on a clock. Normally, the dessert silverware is served with the dessert. Be sociable and join in the conversation. Seriously, keep your mouth closed when chewing, and wait until you swallow to speak. These are possibly the two most important rules. Act civilized, no matter how hungry you are, by sitting up straight and bringing the food to your mouth. And no need to rush. When cutting meat, cut one bite size piece at a time and eat it. When eating soup, tilting the bowl to get the last spoonfuls is acceptable. Never pick the bowl up and drink from it. Just take your time and eat carefully. That includes blowing out the other end, too. The only thing worse than that is everyone knowing it was you! Say excuse me whenever you leave the table during the meal. Always remember to thank your hostess, and your waitress or waiter if in a restaurant. Politeness goes far when showing your appreciation to those responsible for your dining pleasure. Be sure to say good-bye to your hosts. If this happens, call the following day, apologize for not saying good-bye and thank them for having you. When going out to dinner with other people besides your date, politely discuss how payment of the check is going to be handled before ordering. I know it can be uncomfortable, but it beats the awkwardness of trying to work it out after the meal. Asking for separate checks is totally fine. Practice makes perfect, and in time, table manners will become second nature to you like so many other habits. Everyone notices and appreciates a well mannered guy.

While the concepts of knighthood and honor have long been out of fashion, some of the behaviors from that time still have meaning and purpose. The core concepts of the knight and the gentleman are similar: Protect the weak and defenseless, show compassion and mercy, speak the truth, and be courteous to others, especially women. So what are some of the actual behaviors of a true modern gentleman? Opens Doors A gentleman holds the door for others to go in. He definitely opens the door for women and lets them go through first. Not only is being on time courteous, but it shows that you value their time. Walks closest to the Curb Walking close to the curb and putting yourself between a woman and any potential danger is what a gentleman does. It is a minor thing and costs you nothing, but can earn you valuable points with people. A gentleman sacrifices even small things like personal comfort for a short commute. Offers His Arm When out on a date, and you and your date are walking, offer your arm. It is classy, and women like to walk arm-in-arm with a gentleman. Has Table Manners Appropriate table manners mean a lot and show that you are not some uncouth barbarian. If you are at a BBQ joint, then by all means use your fingers and get messy. But, if you are eating at a restaurant with silverware, then use them; that knife and fork are there for a reason. Also, put your napkin on your lap. It shows refinement and class. Is Not Rude to People Even if the service is horrible, take the high road and be polite. Picks up the Check A gentleman reaches for the check, and in most cases should insist on paying. When he picks up the check, whether for a date or for friends, he never expects something in return. Is Attentive When someone is talking, you should be listening and listening closely. Look at the speaker and listen to what they are saying. A gentleman also notices how others look. Compliment a woman sincerely. Keeps his Word If a gentleman says he is going to be somewhere or do something, he does it. It is that simple. Do what you say you are going to do. Keeps a Secret If a gentleman is told something in confidence, then that information goes into the vault. Does Not Kiss and Tell Nobody needs to know what your significant other looks like without clothes, how good they are in the sack or what freaky things they like. Keep it to yourself. A gentleman never hurts a woman. The only exception to this is if a woman is trying to kill an innocent person. Outside of extreme circumstances, a man should never lay his hands on a woman in anger. It shows patience and courtesy. Is Honest A gentleman tells the truth even if it hurts him. Honorable people tell the truth, always. A gentleman is trustworthy. Gets Stuff Done A gentleman knows how to do stuff and gets those things done. Gentlemen know how to do things and can get those things done. He is a jack of all trades, a Renaissance man, or the most interesting man in the world. Bravery, courage and fearlessness are the hallmarks of a gentleman. He stands up for the downtrodden, he protects women and children, and he risks his life to save the lives of others.

Tweet on Twitter Hooray! What type of player do you want to be? Do I want to win at all costs? This is not an article about that. Understandably, this kind of image is one that dissuades people from coming to events. Whilst the majority of people who go to events are there to have a great time, meet up with friends and push little models around it is true that in recent years there has always been some kind of drama surrounding the players at the top tables. Photo by Tirachard Kumtanom on Pexels. Not about how to win. The two are not mutually exclusive and it is certainly possible to do both at the same time. So why should anyone care how I play? Playing decently usually equates to less stress. Tournaments are usually stressful enough with time constraints, the pressure to do well, making time to eat and drink so that anything which makes for a stress free game has got to be good. So you might give them a mulligan at some point during the game and they may well give you one in return. Or they may just tell their friends what an awesome and cool person you were which is fine as well see point 2, above. Basically what goes around comes around back to the reputation thing. Photo by Pixabay on Pexels. Option 1 " this person is a roadblock on my way to winning the tournament and I need to win to ensure my path to 40K glory marches on unimpeded. Remember your opponents at a tournament may not know your army as well as you so be prepared to show the rules that you are using. Keep a consistent cocked dice roll policy. Some people try and balance another die on top of the slightly cocked one which is also cool. Whatever you pick keep it consistent. In this case just do your best and there are things you can do to help your opponent " separating hits from misses with dice rolls is one. There is nothing wrong with asking your opponent to show you in the rules how they are doing something or if they mind just explaining the thing that just happened. Pick one way to play and stick with it. However for reasons given a little later I typically try and help during the game if I think my opponent would benefit from making another decision. In my experience just about everyone will say yes but you never know. They did and we ended up with a great back-and-forth game that I only barely won. It could also be something minor though like forgetting to fire all models in a unit, or they move on to the psychic phase having forgotten to move a unit. Photo by Gratisography on Pexels. You can have a perfectly good game of 40K without correcting mistakes along the way and at the end of the game you can shake hands on a well fought out battle. You can help make your opponent a better player. We tend to learn how to be better when we make mistakes and by pointing out mistakes as they happen during the game you can help your opponent improve right there and then. Our hobby is ultimately a pretty small community and ultimately the more people that play the game the better. In conclusion " have a good time At its very core 40K is a game. Some of us can get a little carried away though and lose perspective of that. People often ask me why most of my armies are painted pink with flowers and the answer is really very simple. It makes me smile.

**Chapter 5 : 20 Things A True Gentleman Does Differently**

*A Gentleman at the Table will give any man the knowledge he needs to maneuver any dining situation - from a casual meal of fried chicken at his mom's house to a seven-course dinner at the finest restaurant in the world. It includes.*

This is a stylized, studied novel, about a stylish gentleman, written in elegant style. The Count is a surprising character – he is a gentleman and a gentle man, yet he can handle a gun and is not afraid to use it which is a hugely enjoyable moment! He is as intriguing and multi-faceted as the rest of the gallery of charming rogues working in the hotel. Readers will find this novel very entertaining and suspenseful – and the best bit, I can assure you, is the ending, and in order to understand it, you will have to remember what you read right at the start of the novel. The hotel is a kind of bubble in which time has been suspended, but it also represents the city in miniature. Outside the hotel, the world moves on in Communist Russia, but inside, tradition and the lifestyles of the wealthy travellers remain – from seamstresses and flower shops and bars on site, labyrinth rooms and corridors, vast expanses of marble and gilt, to immaculate, superbly well informed and experienced waiters in the restaurant and bar. Change creeps in subtly – the ballroom is now not used for debutantes but for political meetings, and Party officials replace the management. There are many themes woven through the novel – Russian music, art, literature, poetry, freedom of expression, classic movies, the founding of the USSR, and since the book covers the period to , it is also a view on the history of the city and the changes in society. The Count is a likeable character, a gentleman of leisure who has – unrepentantly – fallen out of favour with the Bolsheviks, and who has some handy gold coins stacked in the legs of one of his pieces of furniture with which to maintain his lifestyle. As a former member of the aristocracy, he is under house arrest in the hotel for the rest of his life. Into this hot-house scenario, people come and go – a little girl, Sofia, her mother, Nina, employees, guests, lawyers, lovers, reporters, political agents and secret police. The Count treats them all with the same old-world civility which is the mark of a true gentleman. How does it end? Does the Count ever get out and into the real world? Does he die in the garret they have given him in the hotel? Read it to find out. Hotel novels and setting Above: Photos of the actual Metropol Hotel and surroundings. The Metropol Hotel, a five-star establishment , does actually exist, located exactly like where it is described in the novel, opposite the Bolshoi Theatre, and if this were a way of promoting the hotel, it was cleverly done. He portrays the hotel, which is almost a character in itself, as beautiful, glamorous, intriguing and a refuge for all kinds of people. But if the lights of the Kremlin shimmered brightly, like all earthly lights before them they were diminished in their beauty by the majesty of the constellations overhead. Photos of Moscow and Russia at their most beautiful by Mike F. So does the Count, who lives by strict punctuality – there is time to have a drink, a time to sleep, a time to walk, a time to sit and think. What had lingered with him was the sight of the tea service on the table beside the folded paper. For he understood every aspect of the scene at a glance. Then he had settled himself down on the couch to while away a civilized hour before it was time to dress for dinner. In other words, what the Count had observed in suite was not simply an afternoon tea, but a moment in the daily life of a gentleman at liberty. And of course, the Count is not at liberty. And I would not accept the tsarship of all the Russias in exchange for being in this hotel at that hour. The Rules of Civility The author raises the question of what makes a man a gentleman. This showed the man that the Count knew of his brutishness, but in showing off his marksmanship, the Count was no gentleman. And this moment tainted the rest of his life. With its beautifully restored staircase and moldings, its marble fireplaces and French doors, its adroit mix of antique and Art Deco furniture, Mr. Towles looks very Russian with his beard and curly moustache – in fact he looks like Tsar Nicolas II. His own website pretty much tells you everything you need to know about him.
