

Chapter 1 : 20 Questions About Patriots - PatsPropaganda

20 Questions About Patriots July 16, by Mike Dussault We're a mere 10 days away from the opening of Patriots training camp, one of the most exciting times of the football season, when hope springs eternal, no one has gotten severely injured yet and every team has a shot at the Super Bowl.

MikeReiss where do you feel we go at 23 and 31? Evans or Vander Esch do you like better? One of his issues is going to be medical. He wears that neck brace for a reason. MikeReiss any chance the Patriots target the Packers pick at 14 if they want to trade up? I assume would push us to 3rd seed in this prediction? So that would come down to tiebreakers. Looking at the first half of schedule makes things very difficult to determine the strength of it. MikeReiss â€” Jon SaveTeamCasey April 20, Jon, I think it has generally been challenging to get a good read on the first part of the schedule in recent years -- especially with the Patriots, because they are often still making significant changes to their roster at that time. That can mean taking a short-term hit of sorts, with the hope of a long-term gain. From a Patriots perspective, the way I look at the start of the season is that the team needs to stay afloat in the first quarter of the year and be careful of digging itself too big of a hole. Things usually start to settle down after that. MikeReiss will Brady or Gronk lost their Captain title as a result of missing voluntary workouts? MikeReiss what did tom do or not do compared to years past in regards to officially "committing" to upcoming season? Time," and the team might naturally have some questions with how Brady views his future at this time. Special teams is the epitome of starting from the bottom. Taking away kickoffs, they take away one of the best ways for a player to make a team. Terrell Davis made his impact on special teams. Many players have, so why take that away? So limiting kickoff returns has been a goal of sorts for the league. That is what is driving this discussion.

Chapter 2 : Patriots lack urgency once again as questions mount - New England Patriots Blog- ESPN

The long, curious offseason is finally just about over in Foxborough. On July 26 the Patriots will open training camp on the practice fields behind Gillette Stadium. Fans and media alike will convene on the lush green fields to see Bill Belichick, Tom Brady, Rob Gronkowski and the rest prepare.

That kind of contribution will need to be replaced, with home run hitter Michel being the top candidate. Is Julian Edelman still Julian Edelman? Who Replaces Cooks and Amendola? There are tons of receiver options and no telling who emerges. Will Malcolm Mitchell ever be healthy? Can Jordan Matthews catch 80 balls? The opportunity is there for him to be a player Tom Brady leans on. Who Starts at Left Tackle? If Hightower can play 16 games, the entire team will be a full step better. Who Replaces Malcolm Butler? Still, cornerback is a hard position to predict and the team has great depth. Can Danny Shelton be Alan Branch? Is Elandon Roberts just a guy? Can the Pats get more athletic in the middle of the field? Will veteran safeties get off to a better start? That is unacceptable considering the experience and contracts of those three. They must get out of the gate better this season. How good can he be now with Hightower back and more freedom on the field? In his third year with the team he might break out as a star. What 2nd Year Players Make the Leap? Who makes strides this season could determine the ceiling of the defense. Any rookies ready to step in? Can Ryan Allen hold of Cory Bojorquez? Is Stephen Gostkowski Coming to the End? Will Brian Flores add his own touch to the defense? I still expect the defense to be conservative, to take away big plays and focus on tackling rather than complex blitz schemes and packages, but will there be some unique new flares thanks to Flores? It will take time to see them develop.

Chapter 3 : Exams – A Patriot's History of the United States

Patriots training camp questions: Will rocky offseason carry over for AFC champions? Ever since the calendar flipped to , the New England Patriots have been dealing with constant adversity.

You can feel that buzz all the way up here. Tone down that buzz, guys! The Patriots are coming off a Super Bowl loss. It feels like it happened five years ago, but it was only about four months back. Time sure does go slow coming off a Super Bowl loss. But the team is going to go ahead and move forward with trying to play and actually win in the season. When will Tom Brady show up to offseason practice? Regardless of what else is going on, the dude loves playing football. And with three OTA practices this week in Foxboro, the time seems right for Brady to end his silent protest and go back to doing what he was put on the earth to do: How well will Julian Edelman perform in his return from injury? Forget all the off-field drama. This is probably the most important aspect of the Patriots. People around the country may forget, but Julian Edelman is a truly dynamic offensive threat. In the slot or out wide, in 1-on-1 coverage, he cannot be covered. At 32 years old, can he be the uncoverable monster that he was from ? Can Gronkowski stay healthy again? The yin to the Edelman yang, it really would be something to see these two guys stay healthy for a whole season together. Uncoincidentally, the Patriots won the Super Bowl that year. The duo of Edelman and Gronkowski combined for 15 catches, yards, and two touchdowns in that win over Seattle. And everything said about Edelman being impossible to cover with one man applies to Gronkowski. And while he has a reputation for suffering serious injuries, he did stay healthy in back-to-back years in and . If he can do it again in and , and if the Patriots can be full Voltron with No. Will Jason McCourty be perfect for the defense? Classic Belichick, outsmarting the system yet again. He could end up being the most important pickup of the offseason. Can Sony Michel continue the trend of rookie running backs whooping butt? Kareem Hunt out of Toledo!! Alvin Kamara led all NFL running backs in receiving yards. Kamara was tied for second among NFL running backs in receiving touchdowns, along with fellow rookie Christian McCaffrey. Leonard Fournette carried the Jacksonville offense. Dalvin Cook averaged nearly 5 yards per carry. Tarik Cohen was electric. These guys play all different styles, but the point is this: Expectations should be plenty high for Michel, who amassed over 4, yards in 47 games at Georgia, and who was drafted higher than all of those guys from last year except for Fournette and McCaffrey. Is Malcolm Mitchell healthy? He worked through knee injuries in college and was a pleasant surprise for the Patriots in his rookie season of . He was arguably the most reliable receiver in the historic fourth-quarter comeback against Atlanta in the Super Bowl. But then a knee injury delayed the start of his sophomore season. And then his rehab seemed to be taking forever. Jeff Howe says the knee is still receiving attention. Mitchell is a perfect picture of perseverance for many reasons, though, so perhaps this is just another hurdle that he intends on clearing. How good can Isaiah Wynn be? Talking offensive line play is not always the sexiest choice, but the Patriots do kind of need their top pick from the draft to step in and be a player right away. Gronkowski gets all the health questions, but Hightower has certainly earned them too. The man plays a bruising style of football, and the human body is not always receptive to such activity. What if Derek Rivers is an impact player? Folks, let me tell you one thing: Derek Rivers is a humongous man. Not at all small. Putting aside size, Rivers is probably flying under the radar because he missed his entire rookie season with a torn up knee. But this is a fella who recorded 14 sacks in his senior season at Youngstown State and 27 sacks over 39 games in his final three collegiate seasons. Speaking of impact defensive linemen, you should be more excited about Trey Flowers in his fourth NFL season. Short of throwing a parade for this man down Main St. Trey Flowers is the most underrated defensive player in football. Can the Patriots overcome the mean words said by Cassius Marsh? But it must be. Are the Pats doomed now? I mean, Cassius Marsh said he almost quit football because his time in Foxboro was so sad and painful. Pats are doomed, man. Oh, nothing gets the juices flowing like a good old-fashioned punter competition. And folks, it looks like we have one brewing in New England. Ryan Allen has been, legitimately, pretty awesome at his job for five seasons. And do you know who will probably punt in the NFL for pennies? Remember, Allen got his job in a similar way. Can Stephen Gostkowski cool it with some of the missed kicks in big games? Stephen Gostkowski is,

statistically, one of the best kickers of all time. He ranks third all time in career field goal percentage Atlanta, in an indoor stadium. He seemed to be locked in during the playoffs, only missing a yard prayer before halftime in the divisional round, but the Super Bowl was not great. Gostkowski gets a pass or at least 99 percent of a pass for his missed field goal, which clanged off the upright after a bad snap by Joe Cardona, but his missed PAT? That thing was brutal. Never had a chance. You will puke real vomit. Again, Gostkowski is great. But those big-game misses? They need to go away. They are not good. How will Patriots take advantage of new kickoff rules? The NFL changed the touchback rule a couple of years ago, and always the opportunist, Belichick exploited the rule change. Frankly, the changes are too boring to explain in-depth. You can look at this picture if you want. Speaking of fun â€” Will Cordarrelle Patterson restore some excitement to the return game? Patterson has five return touchdowns and an average of Is Trent Brown the largest human being on earth? Is Trent Brown â€” all 6 feet, 8 inches, and pounds of him â€” the largest human being on earth? Nobody can say for sure. Trent Brown meets with reporters. Just have to see on Sundays. Can Marcus Cannon return to form? Among the unlikeliest developments out of Foxboro in recent years was the emergence of Marcus Cannon as the best right tackle in football in He only played seven games last year, due to ankle and foot injuries, but the Patriots absolutely need the version of Cannon to return. Forget about the question of who replaces Solder. The better question is can Cannon replicate Cannon? Does Mike Gillislee get a look at all this year? He was probably jumping for joy when the Patriots signed him away from the Bills as a restricted free agent. And when Gillislee scored three touchdowns in Week 1, the world was his oyster. He scored another touchdown and ran for 69 yards on 18 carries the next week, too. He was a big part of the offense!

Chapter 4 : New England Patriots: 5 burning questions in

DETROIT -- All week long, the New England Patriots talked about playing with more energy and urgency, and then they came out and did none of that in the first half of their loss to the.

Patriots tight end Rob Gronkowski leaves the field after defeating the Indianapolis Colts, in Foxborough. Led by Tom Brady, who completed 34 of 44 passes for yards and three touchdowns, including the th of his career, the Patriots beat the feisty but overmatched Indianapolis Colts Thursday night, Julian Edelman and did his Julian Edelman things in his return from missing the last 23 meaningful games, Josh Gordon tantalized in a limited role, and backs Sony Michel game-icing yard touchdown run and James White combined for total yards. An offense that looked waif-thin just two weeks ago now appears to have options to envy. Still, some questions remain. The defense, which shut down the Dolphins in what appeared to be a statement of pride Sunday, allowed three touchdowns to Colts tight ends while quarterback Andrew Luck threw for yards. Overall, it was an encouraging performance that put the Patriots over. But it was far from a flawless one. But this one sure was fun from the start. While acknowledging that I probably missed several good things out of utter obliviousness to the line play, I counted at least five. It began with a Brady dart to Edelman for 9 yards on the first play from scrimmage, a welcome-back-Jules moment you got the sense would have happened even if he were triple-covered. There was Michel 98 rushing yards overall picking up a couple of yards on third and short to prevent a three-and-out and keep the chains moving. He also moved into eighth place in receiving yards by a tight end on the play, passing Pete Retzlaff, a s-era Eagle whom Belichick probably could write a book about. There were back-to-back passes to White this counts as two good things that turned a first-and into a first-and-goal. White finished with 10 catches for 77 yards and a touchdown, his second straight stellar game as a pass catcher. I do believe Frank Reich will do a good job once there are a few more horses on his roster. Four plays later, White made the confetti rain. Overall, Brady was 9 for 9 on the drive, completing passes to five different receivers Edelman, Gronkowski, Phillip Dorsett, White, and Patterson. This game marks the first time Gronkowski and Edelman have been on the field together since November 27, The Patriots won that game, Malcolm Mitchell had two. You know what realization surprised me even more? That Edelman and Brandin Cooks never played a meaningful down together, since Edelman suffered his knee injury in preseason last year. Would have been fun to watch them together. He did have his struggles Thursday. Brady now has six interceptions this season, just two fewer than he had last year and four more than he had in , when he missed four games due to the Deflategate nonsense. But both of his picks Thursday night should not go on his ledger. Maybe receivers should start being credited with a half-interception, a negative version of pass rushers splitting a sack. His second catch was a reminder of how great he can be. I am not comparing him to Randy Moss. I will not compare him to Randy Moss. Kicking indoors at Lucas Oil Stadium has been beneficial to prolonging his career. But then, the Brady origin story never gets old. When Buck and Aikman discussed the Boston sports Mt. Also, when they referred to McCourty, they rarely said which one. Jason has been playing pretty well too, you know. One more note regarding Fox: It was cool to see Brady warmly greet Jacoby Brissett in the postgame. But this old sentimentalist would have liked to see if he said hello to Vinatieri. Sometimes I struggle to understand why Belichick considers Patrick Chung as irreplaceable as anyone on the Patriots defense. But his importance was evident in his absence in the loss to the Lions, and it certainly was in his presence Thursday night. But his best moment might have been his Daniel LaRusso-quality crane kick aimed at two of his co-conspirator teammates after the interception. I should note Pennington was pretty good even after he lost whatever fastball he had. I should also note he was selected by the Jets picks before Brady in the draft. The Red Sox-Yankees rivalry:

The Patriots, fresh off losing Super Bowl 52, have lost some luster in NFL free agency. Cornerback Malcolm Butler, running back Dion Lewis and left tackle Nate Solder all cashed in with big.

Patriots Replay Sat Nov 10 Sun Nov 11 Reigning Patriots Champion Michael Skimbo will attempt to defend his Madden title against some of the best Madden players from the online tournament. Monday, Jul 16, On July 26 the Patriots will open training camp on the practice fields behind Gillette Stadium. Fans and media alike will convene on the lush green fields to see Bill Belichick, Tom Brady, Rob Gronkowski and the rest prepare for yet another possible Super Bowl run. But, Belichick and his team also have plenty of questions to answer between now and a possible postseason run. With 10 days to go till camp officially opens, here are 10 questions facing the Patriots. Are they all in? Brady skipped voluntary OTAs. Josh McDaniels almost left for the Colts job. Plenty of Patriots key cogs seemingly had a lot to think about this offseason. Now, as they prepare to get back to work, are they all in for what it takes to build a championship team? Now, it looks like massive veteran trade addition Trent Brown and undersized rookie top pick Isaiah Wynn will battle it out for the left tackle job. That leaves a big hole opposite Gilmore " as well as questions in the slot " that will see competition from Eric Rowe, Jason McCourty and a litany of young players. How do the depth receivers stack up? Brandin Cooks and Danny Amendola take more than combined catches with them to L. Chris Hogan will need to take it to the next level, as it looked like he was doing before getting hurt last fall. Jordan Matthews is probably next in line to win a big role. Can Hightower stay healthy? But the Pro Bowl veteran needs to prove he can stay on the field, which he said this offseason is his main focus in Without Hightower the linebacker position has a clear lack of depth and proven playmaking ability. What does Flores do on D? But Matt Patricia had put a clear stamp on the unit over the years, building a relationship with his players and helping pull it all together pretty successfully even with a lack of talent at times. It will be interesting to see how the respected young coach handles his new role for a unit that has personnel questions and struggled mightily last time we saw it on Super Bowl Sunday. That led to the trades for Kony Ealy and Cassius Marsh that turned out to be disasters. Free agent Adrian Clayborn should bring veteran stability. Trey Flowers is hitting his prime in a contract year. Deatrich Wise is a year-wiser. Derek Rivers may even add some punch coming back from a torn ACL. Optimistically, there could be more answers to questions about the pass rush this season. Still, all need to prove they can stay healthy and be productive enough to overcome the loss of Dion Lewis. Michel was a committee guy at Georgia, but could the rookie end up being the top dog in his first season in New England? It will be noteworthy to see if the star playmakers get raises or new deals, and what those contracts look like. Belichick has used those sessions effectively in recent years. That could change how he plans out his practice sessions as well as how he uses personnel " young and old " in preseason action. Will the lack of joint practices have an adverse effect on the team-building process?

Thirty-eight thoughts on the Patriots' victory over the Colts 1. We've finally seen them in full, at least when they have the football. Led by Tom Brady, who completed 34 of

It must be fall. We saw it last season too, when the Patriots got worked over by the Chiefs in the opener and generally started slow. The issues early this season are plentiful. In the first half of the season opener it worked. Phillip Dorsett and Cordarrelle Patterson have never been reliable receivers. The Patriots need better talent at receiver. Julian Edelman will help when his four-game suspension is over. Maybe Gordon will too. But it still seems light. You have to wonder if they regret trading Brandin Cooks. This is probably related to the receiver problem. Why not double Gronkowski? Nobody else should scare a defense. Rex Burkhead and Sony Michel have both dealt with injuries. Burkhead and Michel are averaging 3. That has to improve. This happened last season too and the Patriots overcame it. That was also with defensive coordinator Matt Patricia, a respected defensive coach who figured some things out after a rough start. Maybe this staff will mine the same improvement as the season goes on. However, not having a difference-making pass rusher is an issue yet again. After a good Week 1, the Patriots have one sack in two weeks. In the 10 quarters since, Brady has yards and three touchdowns. Brady is 25th in the NFL in passing yards. He had just yards against a mediocre Lions defense on Sunday night. Maybe it all stems from the lack of depth at receiver, Gronkowski being taken out of the game and the running game struggling. But at some point Brady will slow down. No year-old quarterback has ever had any significant success. We all know how this is likely to end up. The Patriots will get production out of someone at receiver, things will open up for Gronkowski, the running game will come alive and Brady will look fine. Until then, we can wonder if this is finally the year they take a big step back. Here are the power rankings after Week 3 of the NFL season: Arizona Cardinals , LW: It was painful watching them blow a lead on Sunday. San Francisco 49ers , LW: The 49ers were last season before Jimmy Garoppolo started. Just a crushing blow. Oakland Raiders , LW: They led in the fourth quarter of road games against the Broncos and Dolphins. They lost all three, of course. Are they wearing down because of the age of the roster? Was it just a couple of tough road assignments in Weeks 2 and 3? Houston Texans , LW: Buffalo Bills , Last week: But the Bills destroyed a very good Vikings team on the road. New York Jets , LW: He was of for yards, no touchdowns and two interceptions. And the Browns would likely be Detroit Lions , LW: New York Giants , LW: Manning, and the Giants, really needed that. Dallas Cowboys , LW: Seattle Seahawks , LW: Their schedule is much, much easier than it looked a few weeks ago. The Seahawks probably should go against the 49ers and Cardinals this season. Indianapolis Colts , LW: The Colts are playing very well, despite their record. You get the feeling that staff is getting the most out of the talent on hand. Tennessee Titans , LW: Atlanta Falcons , LW: The Falcons have taken on some injuries on defense, the most recent being safety Ricardo Allen, but the defense should be that bad. Washington Redskins , LW: How can you reconcile the horrendous Week 2 home performance against the Colts with what we saw from Washington in Week 3 against the Packers? Also, year-old Adrian Peterson is on pace for 1, rushing yards. Chicago Bears , LW: But he is still missing way too many easy passes. Maybe he always will. The defense is really good, however. Tampa Bay Buccaneers , LW: Pittsburgh Steelers , LW: Cincinnati Bengals , LW: Green is out for any significant amount of time with a groin injury, the Bengals offense might be in trouble. Denver Broncos , LW: New Orleans Saints , LW: Los Angeles Chargers , LW: The good news is receiver Mike Williams looks like the difference maker the Chargers hoped they were getting when they took him in the top 10 last year. Baltimore Ravens , LW: Steelers is always pretty good entertainment. Now that the Steelers picked themselves up off the mat and got a win, the Week 4 showdown should be even more interesting than usual. Miami Dolphins , LW: Minnesota Vikings , LW: Green Bay Packers , LW: In three games the Packers have given up 23, 29 and 31 points against the Chicago, Minnesota and Washington offenses. New England Patriots , LW: The same can go for the Ravens, Bears or plenty of other teams. Carolina Panthers , LW: Jacksonville Jaguars , LW: How could someone be this inconsistent? Philadelphia Eagles , LW: He went of for yards, one touchdown and one interception. He moved around well and the Eagles have to feel like it will only get better.

Chapter 7 : Q&A Recap: Jeff Howe on your Patriots questions â€” The Athletic

The Patriots are off to a start, which will lead to inevitable â€” and likely premature â€” questions about their demise. The Patriots are off to a start, which will lead to inevitable.

Print The New England Patriots capped off a season that would have been remarkably successful for pretty much every other team in the NFL, despite a bevy of injuries to their most important players, and got even better with the acquisition of superstar cornerback Darrelle Revis and adding key players like Dominique Easley, Bryan Stork, and Jimmy Garoppolo in the draft. That there are no pressing questions about their success. There are questions, plenty of questions, too many questions to count! There are 20 questions. Here they are, in no particular order: Who will replace Logan Mankins the player? The immediate solution is to just plug in Josh Kline, who was really impressive in his lone start last season, but is still pretty inexperienced. Two more interesting solutions: Marcus Cannon has been one of the most overqualified backup offensive linemen in the NFL, but has never really had much time at left guard. While not very likely, this option would give the Patriots a helluva left side. And who will replace Logan Mankins the leader? And now the trickier part. Ryan Wendell and Dan Connolly are old Scarnecchia favorites, but their poor play leaves their roster security a bit unsure. The problem is Browner is suspended for the first four games of the year, meaning that one of the Patriots other four CBs will have to take up the role. Ryan has the greater upside of the two, but the Patriots might want to ease him in, as he startled to struggle when his role increased last year. Will the Pats be able to count on Revis Island? Can Tom Brady stay upright? Tom Brady got shellacked last year, taking 40 sacks, his most since Tom Brady is Will Tom Brady settle on a hairstyle? Will Aaron Dobson and Kenbrell Tompkins make the second-year leap? At times last season both rookie wideouts showed flashes, but otherwise their drops and miscommunications with Brady were pretty glaring. The good news is, while raw talent is hard to improve on, learning how to play with your quarterback can be. Speaking of whichâ€” 8. And will Danny Amendola make his second-year leap? The above argument can be just as easily attributed to Amendola, who may be entering his 7th season in the NFL, but only his second with Brady. Will defenses adjust for Julian Edelman? The question is, can Edelman keep it up? Can Rob Gronkowski stay healthy? On to a happier question. What will Tim Wright bring to this Patriots team? Tim Wright was a nice surprise for the Bucs last season, pulling in over 50 catches in a dreadful Tampa Bay offense. Now is Tim Wright the second coming of Aaron Hernandez? Tim Wright plays like a big wide receiver, and uses his size and speed to get open. But what he could be is another big body for Tom Brady to target in the middle of the field. Chances of his becoming a superstar are miniscule, but he should be a very useful piece for this offense. Can the starting linebacking trio stay upright for a whole season? Outside of the starters, the Patriots are unbelievably thin at linebacker. UDFA James Morris seems like a fit long term, but injuries will keep him off the field for the season. As of now, the only other linebacker on the depth chart is rookie Darius Fleming, which seems crazy. Will Stevan Ridley finally fulfill his potential? There is no more frustrating player on the Patriots than Stevan Ridley. But lord, can he not hold onto the ball. With LeGarrette Blount gone from the team and the offensive line in a state of flux, the Patriots will need some help from the running game to allow Tom Brady to work effectively with his receivers. As solid as Shane Vereen and James White could be, neither have the potential of Ridley to be a game changing running back. With his contract expiring at the end of the season, this is the biggest chance that Van Riddles will ever get. Just how much better will Chandler Jones and Rob Ninkovich be with a smaller workload? One of the most discussed storylines from last season was just how much the Patriots used Rob Ninkovich and Chandler Jones. With the team perhaps moving towards more looks at a , and with rookies Dominique Easley and Zach Moore now in the fold, they should get more rest, meaning a bigger and better impact when they are on the field. Will Vince Wilfork return to his old form? As solid as Chris Jones and Seaver Siliga were, neither command the same attention that Wilfork does, even based solely on his size alone. With Wilfork finally back, the Patriots defense looks more than solid again. As long as he can stay healthy, the team absolutely made the right decision in bringing the vet back. Or the team could possibly find a kick returner on the waiver market. My guess would be Vereen to start, though Boyce, who

should land on the practice squad, could find his way back onto the roster and as the primary kick returner, potentially. How soon will the team trade Ryan Mallett? I wrote this on Sunday morning and was too lazy to change it after Mallett was actually traded to Houston for a conditional seventh round pick. The fact that they got anything as small as it is in return is comfort enough. On the spectrum between Vereen and Ridley, he sits firmly in the middle. I was thinking White Bread or Wonder Bread, but that seems like a bit of an insult. Who is the second safety on this team? Can the Patriots make it to the Super Bowl? The problem is that the best team in football, as much as I hate to say it, sits in the AFC as well: But can the Patriots beat the Broncos? Yes they definitely could. Would I bet my life on it?

Chapter 8 : New England Patriots: 20 Questions | isportsweb

Nine questions for NFL Week 6: Will unbeaten Rams, Chiefs finally fall? The Chiefs could be in for the toughest matchup yet against the Patriots, while the Rams take on the struggling Broncos.

But the question for the Patriots is whether the year-old will be worth it when the rest of the receiving corps is healthy again. Rex Burkhead and Brandon Bolden will also be looking for new contracts. Like Burkhead, Lewis is 27 years old. He is in the prime of his career. This might make it difficult to sign both players. If the Pats are forced to pick one, which will they prioritize? One interesting additional wrench thrown into the mix, as Duffy noted, is that, unlike Lewis, Burkhead shares an agent with Patriots coach Bill Belichick. Lastly, Solder could re-sign with the Patriots or leave for another " or retire from the game entirely. There have been rumors of the latter since last summer. How will they recover from the coaching brain drain? The Patriots lost more than the Super Bowl this week. The exodus is set to be something unseen by the Patriots since the last time they played the Eagles in the Super Bowl , after which assistants Charlie Weiss and Romeo Crennel left to lead their own teams. Advertisement So who will fill the void beneath Belichick? Is there a quarterback contingency plan? In the real-life matchup of Tom versus Time, Time is eventually going to win. And since trading backup quarterback Jimmy Garoppolo who went on to set the Bay Area on fire , figuratively , the Patriots have no clear successor to Tom Brady, who will be 41 next season. That could be tricky, at least in the short term. Would Gronk really retire? He still made nine catches for yards and two touchdowns. Given his injury history, meeting those thresholds is no guarantee and, as was the case this year , potentially jeopardizes millions in salary each year. How much longer will the trio stick together? Perhaps the biggest question looming over everything is what the future holds for the three foundational pieces of the Patriots dynasty: Brady, Belichick, and owner Robert Kraft. According to Rapoport, the three men were planning to meet sometime this week to hash out those tensions. But during a meeting likely this week, there are issues to hash out.
