Afghanistan – In a Nutshell unabridged Reviews Afghanistan, with its poppies, forbidding geography, earthquakes and internecine clashes, has been invaded since the fourth century. This history ends with the present invasion by Nato forces and explains the tensions between Russia, USA and Britain that led to it. As they crossed the snows of the Hindu Kush, they were massacred by Pashtun tribesmen, leaving a single British survivor to tell the story. If only all guides to complex subjects were as clear, compact and impartial. I flew in on Ariana Airlines and it was a truly terrifying experience. After 30 years of war, the Afghan national carrier leaves a lot to be desired. The plane was old, overloaded and there were no life vests. During check-in the passengers staged a protest. The ground staff were insisting there was too much luggage: Despite the concerns, the passengers won and all the bags made it on. And so we took off from Dubai in an old plane, heavy and overloaded, donated by India. As we spluttered into the sky my fear of dying in a plane crash was replaced by the very real fear that I might actually survive. It was the sort of folly that even youth fails to disguise. It was, for the first-time visitor, truly awesome. Snow-capped mountains ringed the city and I still remember how clear and blue the sky was. As the plane swooped down into the basin I saw adobe huts dotting the mountains. It was a truly marvellous sight, although the beauty was somewhat spoiled by the groaning engines and the number of passengers using their mobile phones as the plane came into land. I arrived in Kabul with nothing but the name of a hotel where I knew journalists stayed. I headed there in a taxi with illusions of making my name as a foreign correspondent. I spent my first night alone in the bar. My university dissertation had been on the Taliban and Afghanistan, and I fancied myself as a bit of an expert, a notion that was short-lived. Undeterred by how little I knew about the country, I boarded a local bus and headed up to the northern city of Mazar-e-Sharif. It should have taken around eight hours, but the Salang tunnel, a marvel of Russian engineering, was closed for repairs and the journey actually lasted more than thirty hours. We spent the night on a mountain pass: And there was, so the rumour went, the likelihood of a bandit attack just ahead.

Chapter 2 : Nutshell Library Books, Book Price Comparison at bookstores

The first edition of "Afghanistan in a Nutshell" was introduced in October -- only a month after the terrorist attack on U.S. cities. It was listed on the LA Times bestseller list soon after -- kicking off the growing Nutshell Notes book series (which also includes titles on Pakistan, Islam, Iraq and Israel-Palestine).

We will no doubt hear from Shane McMahon on his World Cup thievery, and there are a few Survivor Series teams that will need to be formed. Best Match of the night: The main event was good, but the action after was better. Though, honestly, flip a coin, both matches were enjoyable. Also have to give an honorable mention to Mysterio versus Almas. Worst match of the night: Crowd Chants of the Night: The easiest one to hear? Star of the Night I could go so many different ways. You could have gone with Jimmy and Jey Uso. You could have gone with New Day. Spot of the Night: Not a move at all, but I really enjoyed the show of respect at the end of the tag team battle. The Usos were victorious, and following the match, the teams shook hands and Jimmy and Jey offered them the first spot on their Survivor Series team. Nice and classy move, considering the battles these two teams have had. Maybe a minor one, but Nikki Cross made a surprise debut as she came out to challenge Becky Lynch. The Nikki Cross debut, even if not permanent yet was nice. Announcing most of the three Survivor Series teams is big news too. That will be one to watch, to see where they go with Rose moving forward. Honestly, not a whole lot to complain about here tonight. A very good show, in my opinion. Really, from start to finish, this show hit the notes it needed to hit. The opening tag match was very good. Almas and Rey, it could have been longer, but it was satisfying. Shane addressed his win at Crown Jewel, and they used that to leap into the Survivor Series match planning. The whole show worked. After the final bell: With talk of the show suffering from lower ratings, a strong performance on air has to help. One thing I liked is that this show felt much more focused on forming the Survivor Series teams, which they have all but one team set. My big gripe about Survivor Series an overall gripe, not a SmackDown gripe is that hype for the show has been slow to materialize. I get it, the overseas fans have money to spend and all that, but Survivor Series should have been getting more attention as far back as a month ago, at least.

Also very highly recommended are the four other "World in a Nutshell" titles from Enisen Publishing: Roarabach has done an incredible job clearly presenting both the history and present conditions of Palestine and Israel in one amazingly compact book. I would highly recommend "Israel-Palestine in a Nutshell" to anyone traveling to either of these countries or if you simply want to familiarize yourself with Palestine or Israel. I thought it was a good try at explaining both sides succinctly. No one can explain the people to whom hate has taken hold Brief and thorough. Moss on Mar 24, Covers both the Palestinian and Israeli positions quite well. It is interesting the different interpretations of the same events by the writers from each side. Even-handed and Concise By Marion Gropen on Nov 16, This compact little book does a very good job of distilling both sides of one of the most confusing conflicts currently brewing. Chock-full of both facts and the historical narrative used to evaluate those facts, this is a valuable addition to the library of anyone wishing to understand how each side sees the region and the issues. At the time, only heavy tomes provided background information and, at best, months after events had occurred and magazines and newspapers only provided brief explanations of the latest incident. The notes simply and concisely explained why Cuban cigars were illegal in the US, why Castro was considered an American pariah, why Cuban boat people fled to Florida and other issues. Initially, only a dozen or so wayward web-surfers hit on the site. The number increased when it was included in Yahoos! Once the image of Elian Gonzales permeated the U. The interest encouraged Amanda to add more countries to the site compelling her to begin doing research on Russia, China, Afghanistan and other places. At the same time, she explored ways to make the non-profitable site into a potentially profitable series of books. Publishing From conception to creation, the production of a book of any size generally takes months or years through a traditional publisher. Nor did it fit with her concept of a primer book series that explained the most current news. Instead, Roraback chose to take the more laborious route of publishing her own books. By owning the publishing company that would produce her books, Amanda would be able to print and distribute books days after the text was completed. With ownership, furthermore, Roraback could ensure that the design and objectives of the ongoing series were maintained and could guarantee that the books would not be discontinued the minute interest waned. Relying on guidance from self-help books on self-publishing and advice from counselors at the Small Business Administration, Roraback legally established Nutshell Notes, LLC with her mother as the obligatory partner , acquired ISBN numbers and developed an extensive business plan “ despite the fact that the project was far beyond her financial means. The Investor In , Roraback got her first of many serendipitous breaks when she met Avo Tavitian, an Armenian gastroenterologist, amateur photographer and generous patron of the arts. Together, they planned to develop a book on immigrants in Los Angeles with Amanda producing the text and Avo Tavitian taking photographs of ethnic communities in the area. In the meantime, Amanda maintained her Nutshell Notes website while helping Tavitian organize his real estate ventures. Outside the auditorium, a string of celebrities were parading in front of cameras on their way to a presentation on Afghan women hosted by Mavis Leno wife of Jay Leno. What struck Amanda the most was the crowd on the other side of the red carpet ropes -- Afghan men and women who were picketing the event. After conducting spontaneous interviews, Roraback learned that while the demonstrators agreed that Ms. Leno had good intentions by bringing the oppressive treatment of women under the Taliban to the attention of the world, they felt that she had missed the larger picture. She quickly transferred the text about Afghanistan from her website onto paper while her neighbor designed a book cover. One of her friends began speaking to local bookstores, another a childhood pal who was teaching geography at a California State University designed maps while her mother and brother helped with editing and fact-checking. In , Roraback finally endeavored to explain the Middle East crisis at the heart of most issues affecting the Muslim world by writing a flip-book presenting the situation from two opposing perspectives. Israel-Palestine in a Nutshell After three years touting the fledgling series at book festivals and independent venues, the books were slowly starting to take off. To help publicize the book and other titles, Roraback toured Los Angeles giving talks on the Middle East crisis to any audience who would listen: The controversy taught Amanda that no issue can be explained in a purely intellectual and objective manner and, at the same time, that every issue must be explained intellectually and objectively “ whether or not her audiences were receptive. About the same time the books were being distributed throughout the U. Iran in a Nutshell Family members and friends still contribute to the production and distribution of the Nutshell Notes books, although Enisen Publishing also employs professional editors, fact-checkers and publicists. Schools In the last couple of years, Amanda Roraback has been working closely with local social
