

Chapter 1 : Bridges to the Past | Max Shores

Below is a present list of Alabama covered calendrierdelascience.com are currently eleven historic covered bridges remaining in the U.S. state of calendrierdelascience.com those, six remain at their original locations.

Alabama Road Trip No. The sheltered bridge hid the rushing water from the horse and the courting couple from the eyes of the world. Notice how the entrance resembles a barn – all the more to encourage a perhaps unwilling steed into the shelter of the bridge. In the s, an uncovered bridge might last 10 to 12 years, but a covered bridge – well, it just might last for more than a century. All three bridges are listed on the National Register of Historic Places, with Horton Mill Bridge taking the honor of being the first Southern covered bridge to be added to the register. All have been restored to once again support car traffic – though with a single lane and a speed limit of 5 mph. Horton, Old Easley and Swann: Bridges to a Simpler Time and Place Thurman Horton helped build the first of the bridges to bring Sand Mountain customers to his mill and general store. Rising 70 feet, Horton Mill Bridge stands as the highest covered bridge above any U. The original structure was built in Forty years later, another Horton, Talmedge this time, led the construction of the bridge we see today. Look for the bridge five miles north of Oneonta on Alabama Highway A tin roof kept the rain from dampening the spirits of many a traveler who crossed the Old Easley Covered Bridge. The smallest and oldest of the bridges, its single span is perhaps the most picturesque. The Tidwell family built it, Zelmer and his uncle Forrest, undoubtedly to provide a shorter path home. The bridge sits three miles west of Oneonta, 1. The third bridge was called Swann on one side and Joy on the other, depending on which community you called home. Perched over a scenic gorge, the bridge connected the town of Cleveland to the community of Joy. The triple spans of the Swann Covered Bridge stretch feet, making it the longest covered bridge in Alabama and one of the longest in the U. It rises 27 feet above the rocky riverbed of the Locust Fork, a tributary of the Black Warrior River. It lies one mile off Alabama Highway 79, near Cleveland. On Saturday, vendors line the streets selling arts and crafts, homemade items and delicious festival food. Live entertainment sends toe-tapping music from the main stage through town. Friends of the Locust Fork River, a river preservation society, lead a three-hour walk along the river from Swann Bridge to Powell Falls and back. Experience Other Area Attractions Travel from the river gorges to the mountain overlook. Palisades Park perches atop Ebell Mountain and offers views of a deep valley and forested ridges. The 1,foot elevation over limestone bluffs is a popular spot for rock climbing. More than 90 routes crisscross the and foot drops with ratings from 5. Bouldering invites those who enjoy climbing closer to earth. Eight nature trails guide you through trees and wildflowers. Want a slower pace? Fishing, tube floats and swimming holes provide fun for families. The National Park Service has placed this wild and free river in the top 2 percent of all rivers nationwide for recreational uses. Challenge races to wildflower walks invite people to enjoy this mile stretch of water. The grounds offer picnic tables, hiking trails, a playground and an Olympic-size swimming pool. You can also pan for gemstones. The bridge site is also a park that features picnic grounds, a dogtrot cabin, gristmill and hiking trails. Talladega County is home to two covered bridges. It is located at Grist Mill Park. Both bridges span scenic Talladega Creek. In west Alabama, the Alamuchee-Bellamy Covered Bridge was built of hand-hewn heart pine and wooden pegs in Where To Stay While the covered bridges return you to simpler times, Capps Cove Bed and Breakfast continues the 19th century theme with its quaint cabins. Escape to 20 acres of babbling brooks, lush gardens and picket fences. Take the time to walk along the creek and enjoy a fire on a stone hearth. Cafe on Main Main St.

Chapter 2 : List of covered bridges in Alabama - Wikipedia

Sure, a bridge may be "just a bridge," but there's something quite special about covered bridges. What makes these structures so special is the history behind them. Sadly, many covered bridges in Alabama are no longer standing. However, many still are. Here are 10 of the most beautiful covered.

Prior to steel and concrete construction, bridges were made of wood. They deteriorated quickly, and covering them to protect the floor of the bridge, and its supporting structure from the elements became the thing to do. Many, if not all, are now on the National Register of Historic Places , and are protected by volunteer groups such as Friends of Covered Bridges. Most of these old bridges were built over small streams, branches, and other tributaries in an effort to connect small communities for trade, worship, and social gatherings. At one time, Alabama was home to over 35 covered bridges that enhanced transportation. Of those, only eleven remain. This page shows only the three I was able to visit prior to relocating to central Florida; those 3 are all in Blount County, Alabama. Unfortunately, the link to that website is no longer working. Here is a new link for more information, unfortunately the widget to make the link clickable also seems to be broken at this time: It is near Alabama Highway 77, near the town of Waldo. Currently the highest covered bridge above a river in the United States, this bridge is on Alabama Hwy. The original bridge was built by Mr. Thurman Horton in , so that his customers from Sand Mountain could get to his mill and store. It was rebuilt slightly upstream from the original site in . The bridge was added to the National Register on December 29, . Additional restoration was done in . It was closed due to vandalism in , reopened in . Restoration began again in . Another good resource for information about historic sites in Alabama is National Register of Historic Places in Alabama. Front entrance to Horton Mill Bridge during the current restoration project. This is a side view near the entrance of the bridge, showing the pretty lattice-pattern used by the builder, Mr. Thurman Horton, in . Here you see into the bridge. Soon you will be allowed to walk through this picturesque bridge. It was built in b by Zelmer C. It was located on property owned by the Swann Farms, so it became known as the Swan Bridge, but many residents called it the Joy Bridge, because it was on the road to Joy. The bridge was restored by the Blount County Commission in . Again needing funds for restoration, the bridge was added to the National Register of Historic Places on August 20, . It was later closed to motor vehicle traffic in , after a routine inspection and, after complete rehabilitation, it was again reopened to traffic in October of . It was so weakened from weather and age, not even foot traffic was allowed. No visit to the Swann Bridge would be complete without taking my own photo of this iconic view of this famous bridge. This is a side view of the entrance to the bridge, showing the barricades as well as the new spring leaves still emerging. Of the three covered bridges still in existence in Blount County, this one is the oldest and the shortest. Built in , by Zelmer C. Tidwell and Forrest Tidwell, this bridge was in continuous use until it was closed in , after a routine inspection found it to be unsafe. The bridge was listed on the National Register on August 20, , having previously been listed on the Alabama Register of Landmarks and Heritage on March 3, . My Photos of the Easley - Rosa Bridge Click thumbnail to view full-size Construction barricades at entrance to the bridge. On this bridge, too, even foot traffic was believed to be dangerous. Looking through the barricades into the bridge. A side view of one entrance. It really was a pretty bridge; and it will be again. The construction supports during restoration. People all over the world love history. Are you a history buff? Do you love old architecture, including bridges? Please feel free to share any information you may have about these bridges, or covered bridges in general. Thank you for visiting, and please let me know you stopped by.

Chapter 3 : Blount County Alabama's Covered Bridges - Appalachian History

Covered Bridge Map Interactive map of the authentic covered bridges in Alabama.

During the nineteenth and early twentieth centuries, hundreds of covered bridges were constructed in the state, but now only a few remain. Those persistent engineering marvels that still stand have become popular tourist attractions, giving visitors insight into the needs and hardships of our ancestors. Because of their importance to communities, these bridges were used as meeting places for baptisms, weddings, and at least one hanging. Some were strategic participants in the Civil War while others simply served the daily needs of farmers and merchants. Alabama covered bridges featured in "Bridges to the Past" include: In its previous location at Alamuchee Creek, the bridge was where horse thief Steve Renfroe was executed by hanging. Ironically, Renfroe was serving as the county Sheriff when he was apprehended. James Wordlaw Legg donated all materials for the bridge including timber, nails, sand, and rock. Legg was a local mail carrier for the Clarkson Post Office who realized the need to improve transportation in the area. The bridge was moved from its original location in an effort to save it. Like most Alabama covered bridges it is constructed of pine. The remains of a dam and mill can be seen upstream of where the bridge originally stood over Coldwater Creek. Easley Bridge is the oldest of the three remaining covered bridges in Blount County, all of which are still in use. Located in the Rosa community, the bridge spans the Dub Branch. Members of the Tidwell family built all of the Blount County bridges. A wedding took place at the bridge when a couple happened to meet the preacher there after going to Gadsden to get their marriage license. Horton Mill Bridge towers over a deep gorge cut by the Warrior River in Blount County and is the highest covered bridge built over water in the US. Talmedge Horton, a descendant of the family that founded the gristmill for which the bridge is named, helped construct the bridge. He says that it took "fifteen men working from sunup to sundown for a year and a half" to build it. The bridge was built just before the Civil War and a gristmill was constructed there during the war. Both the bridge and the mill have been restored in recent years and are open to the public. Visitors can see corn ground with the original millstones that were imported from France. Turbines turned by water power the mill. Nectar Bridge was the seventh longest covered bridge in the world. It burned in leaving the Nectar community of Blount County with a great sense of loss. The bridge was a community meeting place and the site of large baptism ceremonies. It was also said to have been haunted by the ghost of a mail carrier who had died there. Wagons forded Oakachoy Creek at a location near the bridge before the bridge was built. Ruts worn by wagon wheels can still be seen in the rock. This bridge burned in June, Hand-hewn oak pegs join all the latticework, roof trusses, and substructure. High water and erosion has caused damage to the bridge supports but local citizens hope the bridge can be restored. Swann-Joy Bridge at feet in length is the longest surviving covered bridge in Alabama. It was built on the Swann farm to provide access to the Joy community. The mill has been converted into a restaurant. These maps are available free by calling:

Chapter 4 : Alamuchee-Bellamy Covered Bridge - Wikipedia

Covered bridges seem to exude an undeniable romanticism. Waterways babble below, the roofs above offer cool respite from the summer sun, and soft rays of sunlight peek through the lattice trusses, which frame picturesque views. There's something about covered bridges that makes us want to slow.

One belief was they were built to resemble barns so farm animals would feel more at home and not stampede as they were driven across rushing waters. It is true that covered bridges were estimated to have a life expectancy three times greater than an uncovered bridge. Whatever the reasons they were initially designed, today covered bridges are considered historical landmarks. These romantic structures from a bygone era appeal to our nostalgic side. Covered bridges are the search for them can provide an interesting travel experience. Although Vermont and Oregon have the highest concentration of covered bridges, it is not necessary to head to the Northeast or the Pacific Northwest to find these nostalgic structures. The Southeast is home to numerous covered bridges in the beautiful state of Alabama. Covered bridges in Alabama are scattered throughout the state. Almost all of these structures have historical significance. James Wordlaw Legg, a local mail carrier for the Clarkson Post Office, donated all the materials to build this bridge in to improve transportation in the area. What an excellent community service! The bridge was built before the Civil War and a gristmill was constructed there during the war. Today the bridge and the mill are open to the public. Visitors can see corn ground with the original millstones imported from France. The gristmill at this bridge has been converted into a restaurant. The festival offers many events including a golf tournament, a 5K race and Fun Run, car show, arts and crafts booths and live entertainment. The beauty pageant is a preliminary competition to the Miss Alabama pageant. Moved to the park from its original location at the Gilliland Plantation in Reese City, it is said a wedding took place at the bridge when a couple happened to meet the preacher there after going to Gadsden to get their marriage license! And that brings us back to the most romantic reason for covered bridges kissing! Terri is a freelance writer with regular columns on travel, chocolate and bar reviews.
