Chapter 1 : APA Citation - Citation - LibGuides at San Jacinto College

The citation style to use is determined by your professor, or if you are submitting a manuscript, by the journal or publisher. However, each discipline tends to use one or two styles.

Some style guides, such as the Chicago Manual of Style, are quite flexible and cover both parenthetical and note citation systems. These may be referred to as citation formats as well as citation styles. A number of organizations have created styles to fit their needs; consequently, a number of different guides exist. Individual publishers often have their own in-house variations as well, and some works are so long-established as to have their own citation methods too: Stephanus pagination for Plato; Bekker numbers for Aristotle; citing the Bible by book, chapter and verse; or Shakespeare notation by play. It is most widely used in history and economics as well as some social sciences. The closely related Turabian style, which derives from it, is for student references, and is distinguished from the CMOS by omission of quotation marks in reference lists, and mandatory access date citation. The Columbia Style was created by Janice R. Walker and Todd Taylor to give detailed guidelines for citing internet sources. Columbia Style offers models for both the humanities and the sciences. Includes sources in electronic format. Used by genealogists and historians. Parenthetical referencing is recommended by both the British Standards Institution and the Modern Language Association. Harvard referencing involves a short author-date reference, e. MLA style was developed by the Modern Language Association and is most often used in the arts and the humanities, particularly in English studies, other literary studies, including comparative literature and literary criticism in languages other than English, foreign languages, and some interdisciplinary studies, such as cultural studies, drama and theatre, film, and other media, including television. This style of citations and bibliographical format uses parenthetical referencing with author-page Smith or author-[short] title-page Smith, Contingencies 42 in the case of more than one work by the same author within parentheses in the text, keyed to an alphabetical list of sources on a "Works Cited" page at the end of the paper, as well as notes footnotes or endnotes. It is available for sale both in the UK and in the United States. It is similar to MLA style, but has some differences. For example, MHRA style uses footnotes that reference a citation fully while also providing a bibliography. Some readers find it advantageous that the footnotes provide full citations, instead of shortened references, so that they do not need to consult the bibliography while reading for the rest of the publication details. In these areas, the term "footnote" is actually used as a synonym for "reference", and care must be taken by editors and typesetters to ensure that they understand how the term is being used by their authors. Legal citation The Bluebook is a citation system traditionally used in American academic legal writing, and the Bluebook or similar systems derived from it are used by many courts. Inline citations allow readers to quickly determine the strength of a source based on, for example, the court a case was decided in and the year it was decided. Sciences, mathematics, engineering, physiology, and medicine[edit] The American Chemical Society style, or ACS style, is often used in Chemistry and some of the physical sciences. In ACS style references are numbered in the text and in the reference list, and numbers are repeated throughout the text as needed. In the style of the American Institute of Physics AIP style, references are also numbered in the text and in the reference list, with numbers repeated throughout the text as needed. Typical citations are listed in-line with alphabetic-label format, e. This type of style is also called an "Authorship trigraph. In one major variant, that used by the American Society of Mechanical Engineers ASME, citation numbers are included in the text in square brackets rather than as superscripts. All bibliographical information is exclusively included in the list of references at the end of the document, next to the respective citation number. The style of the Institute of Electrical and Electronics Engineers IEEE, or IEEE style, encloses citation numbers within square brackets and numbers them consecutively, with numbers repeated throughout the text as needed. In both cases, in-text citations point to an alphabetical list of sources at the end of the paper in a References section. The American Political Science Association publishes both a style manual and a style guide for publications in this field.

Chapter 2 : APA Format and In-Text Citations

Cite right: a quick guide to citation styles--MLA, APA, Chicago, the sciences, professions, and more.

In titles, such as books, articles, or sections of a web document, only the first word, the first word of a subtitle, and proper nouns are capitalized. All other words are lowercased. On the other hand, journals, newspapers, and magazines are capitalized like normal titles only articles, prepositions, and conjunctions are lowercased. In all journal articles, not only is the journal name italicized but so is the volume number. The issue number is not, though. Above is the most basic format for a book. If you have both author and editor, such as in an anthology, see Books. Supernatural horror in literature. When citing in the text it would be Last Name, Year, p. Articles in an online database can be cited one of two ways depending on if they have a digital object identifier DOI or not. DOIs are unique to each article and can usually be found with the rest of the reference information. Not all articles have a DOI. For more a more comprehensive list, see Periodicals. Year Title of article. Title of Periodical, xx x , pp-pp. Framing debates over state lotteries. Policy Studies Journal, 41 2 , Community psychology training in Canada in the new millennium. Canadian Psychology, 51 2 , When citing in the text it would be the same as with a book Last Name, Year, p. When using a website, you must always judge the reliability of the source. Is it by a respectable group or organization or is it owned by a random person? Is the address one you can trust, like. Does it have an author or organization as author? How credible is the author? Does it have a date of publication or update and is it recent? Is the site sponsored by a legitimate organization or agency? Is the sponsor organization generally considered to have bias? For a complete list of the different types of web-based sources, see Internet Sources. You want to try and find as much information as possible when using a page off a general website as opposed to using a document or report posted online. You want to try and get author, date posted or updated, title of the page, and URL. An organization can be the author. If you are missing the author, move the title in front of the year. If you do not have a date, put n. Title of the page. If a normal author is listed, the format follows the same as books or articles, minus the page number Last Name, Year. If an organization with a long name is listed, an abbreviation or shortened form may be used EPA, If a title is in place of an author, a shortened version one to three words may be used, but make sure there is no confusion with another source.

Chapter 3 : APA Abbreviations // Purdue Writing Lab

Students can use citation generators like BibMe, Citation Machine, or EasyBib, but you must ALWAYS check your citations using the resources below: Easy Writer (in the reference collection, PEL) by Andrea Lunsford has excellent guides and sample citations/papers for MLA, APA, and Chicago/Turabian Styles.

When printing this page, you must include the entire legal notice. This material may not be published, reproduced, broadcast, rewritten, or redistributed without permission. Use of this site constitutes acceptance of our terms and conditions of fair use. APA American Psychological Association style is most commonly used to cite sources within the social sciences. For more information, please consult the Publication Manual of the American Psychological Association, 6th ed. To see a side-by-side comparison of the three most widely used citation styles, including a chart of all APA citation guidelines, see the Citation Style Chart. You should use a clear font that is highly readable. APA recommends using 12 pt. Times New Roman font. Include a page header also known as the "running head" at the top of every page. Major Paper Sections Your essay should include four major sections: Include the page header described above flush left with the page number flush right at the top of the page. Type your title in upper and lowercase letters centered in the upper half of the page. APA recommends that your title be no more than 12 words in length and that it should not contain abbreviations or words that serve no purpose. Your title may take up one or two lines. All text on the title page, and throughout your paper, should be double-spaced. Do not use titles Dr. Your abstract page should already include the page header described above. Beginning with the next line, write a concise summary of the key points of your research. Your abstract should contain at least your research topic, research questions, participants, methods, results, data analysis, and conclusions. You may also include possible implications of your research and future work you see connected with your findings. Your abstract should be a single paragraph, double-spaced. Your abstract should be between and words. You may also want to list keywords from your paper in your abstract. To do this, indent as you would if you were starting a new paragraph, type Keywords: Listing your keywords will help researchers find your work in databases. However, select pages, like the Citation Style Chart , still include this information. Purdue Online Writing Lab.
