Chapter 1 : Training and Apprenticeships Information

In accordance with Section , MCA, Duties of Department, we have the honor of submitting to you the Biennial Report of the Montana State Apprenticeship Training Program.

The first topic of discussion was the annual Instructor Training Program. Meeting participants reviewed the evaluations of the program held in July of with a focus on how to improve the program in As a result of the meeting, several major changes are being implemented for the 28th Annual Ironworker Instructor Training Program. All program participants requesting a free dormitory room will be housed on the campus of the University of Michigan. We are confident that having all of our participants housed in the same dormitory with a cafeteria close by will be well received. There will be a meeting of all apprenticeship coordinators and directors held in conjunction with the program. The date of this important one-day meeting is Saturday, July 14, The closing session will be held on Thursday evening on the campus of Washtenaw Community College. This will allow those driving to the program to leave after courses conclude on Friday afternoon. The dates for the annual program are July 15 - 20, More information on the 28th Annual Ironworker Instructor Training Program including a list of new courses will be sent to all local unions. Another major area of discussion centered on the plans for the biennial Apprenticeship Competition. The Apprenticeship Competition will be held at Local 22 in Indianapolis during September of Specific dates and more information on the competition will be sent to all local unions. This initiative will continue in as we focus on the following new and revised training packages: General Foreman and Superintendent Training for Ironworkers will be available in early as a hybrid self-study and online course for any member who is interested. Working closely with IMPACT, there will also be a group-based course for sponsored participants who complete the self-study course. The Foreman Training for Ironworkers manual and course have been very well received during the six years since first implemented. Pre-Engineered Metal Buildings was the first new training package we developed seven years ago. Given the changes in metal building systems and our need to capture more of this market, we will be updating this training package. We continue to receive requests for short courses on forklift operation, roadway flagger, and fire watch. During , we will be developing a single DVD that will contain training materials local unions can use to deliver training in these three areas. Lead Hazard Training for Ironworkers materials have been available for a number of years. During , we will be reviewing current lead hazard training methods and materials and will revise our training package accordingly. We are confident that these and other decisions made during the planning meeting will result in products and services that our local unions and shops in the United States and Canada will be able to use to develop iro Featured Articles.
