

Chapter 1 : Glycan Arrays: Recent Advances and Future Challenges

Definition of CHALLENGE TO THE ARRAY: An exception to the whole panel in which the jury are arrayed, or set in order by the sheriff in his return, upon account of partiality, or some default in the sheriff, coroner, or other officer who arrayed the panel or made the return. 3 Bl.

Jurors for a particular trial are selected from the jury array. A defendant is entitled to challenge the jury array. The defendant usually discovers flaws in the jury selection process during voir dire or questioning of the jurors. Grounds for challenging the jury array include corrupt summoning of the jurors, violation of the jury law, discriminatory selection of the jurors, or discrimination regarding exemptions for the jurors. If a court officer has willfully summoned jurors in such a manner as to convict or to acquit a defendant, the defendant may challenge his or her jury array. A challenge to a jury array for violation of the jury law is based on granting of excuses for jurors without reasonable cause or without reason. The jury array may also be challenged if a court officer who excused the jurors was not authorized by law to excuse the jurors. Although court officers are authorized to exclude names of persons who are not qualified to be jurors, the officers cannot withhold names of potential jurors who are qualified. Jurors may not be excluded from the jury array based on their economic, social, religious, racial, political, or geographic group. Constitutionally protected classes with these groups include African-Americans, Mexican-Americans, and women. Even if the defendant is not a member of a constitutionally protected class, the defendant may challenge his or her jury array because the defendant is entitled to a representative cross-section of his or her community in his or her jury. A defendant may also challenge a jury array if a constitutionally protected class is underrepresented on voter registration lists. The voter registration lists must represent a cross-section of the population in order for them to be used for the jury array. If the voter registration lists contain a disproportionately low number of persons from a constitutionally protected class, the lists are deemed to be discriminatory. However, the defendant must prove that there was actual discrimination in the voter registration process. A defendant may further challenge a jury array if exemptions that were granted to potential jurors were discriminatory. In other words, the exemptions were applied in order to exclude certain groups or constitutionally protected classes. The defendant has the burden of proving that the exemptions were unreasonable. A defendant challenges a jury array by filing a motion to quash the jury array. The motion is usually required to be in writing and to be accompanied by an affidavit. If the defendant fails to file a proper motion, the defendant is deemed to have waived any error with regard to the jury array. The motion should be made before potential jurors are questioned by the prosecution or the defense. If the defendant does not discover a flaw in the jury array until voir dire or questioning of the jurors, the defendant may file an oral motion that challenges the jury array. A court officer is then required to summon a new jury array.
