Kari Warner walked down the alley, well aware that something was following her. No, not following”calendrierdelascience.com *alley was wide and the sounds of her heels as she moved along quickly echoed through it, bouncing from the dingy walls back at her.*

This difficult change of circumstances would be hard to handle anyway “ but only made worse because one member of the pack is not eager to accept their new queen and keeps trying to kill her. In some ways, I should have known better than to grab this book from Netgalley. It was described as a paranormal romance and if I had googled it I would have seen that it had previously been released with a very Mantitteh cover which would have also told me to step back. So why did I request this book without a second thought? Lauren Dane also wrote the Rowan Summerwaite series. And when a new book is released in that series I would happily murder people to get my hands on it. Our protagonist, Kari was a normal human with a normal life who was attacked by a werewolf. Since she was going to change, the Cherchez werewolf pack decided to kidnap her and take her to their isolated cabin until she changes. But their watch-wolf jumped the gun and bit her ahead of time “ then the kidnapping happened Which is pretty much how they introduce themselves. So, yes, sorry about the whole kidnapping thing, they never intended to do that. They just intended to stalk her for an indefinite period of time until she totally agreed to be a broodmare for the werewolf clan. I am rarely stunned by a book, but the fact any character is supposed to be believable with this attitude is beyond me. Yet despite all of this terribleness, they do end up as a couple pretty damn quickly thanks to woo-woo and smell and we have lots and lots of sex without anyone really talking about the terrible foundation of this relationship or that Andreas never has any real assurance that Kari is sleeping with him because she wanted to or because she is a kidnapping victim. The little pesky issue of kidnapping duly dealt with, they can then focus on the second plotline “ Kari becoming queen and some secret adversary trying to bring her down. Seriously, this book would be half as long without the many many many sex scenes with a nice mystery and lots of Kari learning her place as queen. But in addition to pacing issues it suffers just a little from simplicity. People accept the impossible awfully quickly. And that whole Kari learning to be queen? In fact, Kari does not take shit from anyone. Kari attempts to escape. Kari gives people the business, the rough side of her tongue and a killer glare whenever needed. Kari quickly establishes herself as Queen and makes it MEAN something “ far more than being said broodmare. It utterly destroys her character Annoyingly this book continues the endless trope of female werewolves-are-rare with only 9 members of the pack being female. While most of them are friendly and allied with Kari, we have a couple of heinous, jealous women who want Andreas and just hate Kari with an unreasonable and ridiculous degree. They have absolutely zero redeemable features and hate this trope. Who gets huffy over who your partner slept with before they even knew you existed? What kind of weird broken jealousy is that? For extra fetishistic creepiness Kari watches them literally hides and watches them while panting and sweating over them, not even thinking of giving them space or privacy. Oh and telling Andreas about his guards getting it on. Which says a lot about how much I really liked her and how she contributed to the story “ because the problems really dragged it down.

Ascension (Cherchez Wolf Pack, #1) by Lauren Dane Part 2 Lauren Dane has been writing stories since she was able to use a pencil, and before that she used to tell them to people.

Prologue Kari Warner walked down the alley, well aware that something was following her. The alley was wide and the sounds of her heels as she moved along quickly echoed through it, bouncing from the dingy walls back at her. Heart in her throat, her quick walk became a slow run. Fear choked her as she heard the corresponding quickening of the footsteps of her pursuer. Cursing her stupidity, she sent out a brief prayer, exchanging chocolate for safety. She felt the weight of eyes on her, watching, measuring, waiting. The corner and the streetlight were only half a block away. Hope bloomed in her chest as she began to believe she was going to make it. The light cried safe haven. She held on to the light like a lifeline. Suddenly a low growl split the air and the hair on her arms stood on end. A queer electric hum began at the base of her spine, riding up into her hairline. Eyes wild, she looked up to see a massive dog jump at her, knocking her over, ripping into her flesh with its teeth. She drew in breath for a scream, but in those short milliseconds her throat was crushed as its jaws closed in over her neck and bit down. Razor-sharp teeth tore at her. Its unbelievably strong jaw gripped tight as its head jerked from side to side, shredding her neck. Her hands pushed against the massive head as the long muzzle pressed against her open wound. Her mind, unable to accept the entirety of the experience, slipped into a state of unreality for a long moment and she felt herself drifting away. Fighting, body screaming for air, she pushed up frantically, trying not to panic. Her strength ebbing, she had a hard time gaining purchase as she kept slipping in the blood she was losing. Her hands grappled with the dog, the hard muscles rippling beneath the fur. She wanted to just crawl away, to get far from the thing now tearing into her stomach with its teeth. Beep, beep, beep, beep, beep. Kari tried to swallow around the fire in her throat. Her eyes fluttered open. It was her brother. Jack gripped her hand until she winced. So she just smiled at him, hoping to reassure him. Cool hands offered her a straw and urged her to take a drink. Kari had to fight against her instincts because the cool water felt so good on her abraded throat and she wanted to gulp it down. She was a nurse—no, a doctor. Large brown eyes looked her over. Close-cropped, chic gray hair and a long, tall frame completed the package. Panic rose momentarily as she recalled the size of that dog, the intelligence she remembered in its eyes. As if sensing her panic, Dr. Something about the other woman made her feel more secure, safe. Kari swallowed a few times. You showed up in the driveway of the emergency room. You were pretty beaten up. We got an anonymous call that you were out there. Do you remember anything? A big dog jumped me. The doctor looked at her kindly, smiling as if she was not quite right in the head. But you can see for yourself that you have no wounds there, just some extensive bruising. Your throat took a beating, though. Looks like your larynx was pretty severely damaged. You had a concussion and some swelling on the brain, which has lessened considerably. She tried to swallow but it was so painful. You came in at two thirty on Saturday morning. No—her entire body hurt. And where on earth did the dog go? Had she imagined it? No, there was no way she could have imagined such a thing. That dog had been massive. She could still feel the razor-sharp teeth rending her flesh. The silky texture of the fur under her hands. She tried to work it through but she kept losing track. The medication made her drowsy, messing up her thought processes. Her pulse has remained strong. The swelling has gone down to nearly normal. It looks good for her. We will, of course, keep her in for at least another day or two for observation, just to be sure. Kennedy smiled at Kari, patting her hand before walking to the door. Get your rest now. Have your brother help you bring the level of the bed up a bit. Watch some TV or listen to an audiobook. His blond hair fell over his eyes, hiding his expression. Andreas wanted to curl his lip. Wanted to cuff his cousin for being so stupid and impulsive. Impulsive was dangerous in general. For werewolves, it could be deadly. Andreas glared at Michael once more as he picked up his stalk. Back and forth across the floor. Fists clenched, rage vibrated through him. His Mate had been put in danger and his plans to meet and woo her without frightening her had been upset. His primal need to protect her—to bring her to him in a way that made her the most comfortable—had been challenged. He watched Andreas pensively. The change has already started. She told him they planned to keep her there for another two days.

Obviously we need to get her out before that attention. Her accelerated healing would garner unwanted attention. How are we going to handle the brother? He moved to the chair behind his massive desk, letting the sun shining through the window warm him, calm him. He ran his hands over his face and through his hair. His muscles ached, tight with repressed fury and stress. I hate to start off with her with distrust and fear. I wanted it to be different. A wolf like him fed on control. But in this situation he had very little. It ate at him. He deliberately avoided looking back to Michael. His cousin was weak. Not in full control of his instincts. Any other wolf in the Pack and Andreas would have beaten the hell out of him. But Michael had always been sheltered. She has no other choice. We have no other choice. The movement seemed casual but there was menace there just beneath the surface. And so it has to be done.

His blond hair fell over his eyes, hiding his expression. Does she remember anything? His long black hair shimmered against the golden tone of his skin, brown-black eyes glittered behind thick lashes. The face had a savage beauty to itâ€”the nose not quite straight, a small scar bisecting his left eyebrow, the lips lush but holding a not-so-subtle hint of danger. Fists clenched, rage vibrated through him. His Mate had been put in danger and his plans to meet and woo her without frightening her had been upset. eyes were intelligent but could be merciless in defense of those he loved and protected. His body was tight with stress and barely repressed fury. Full moon is in three days. And so it has to be done. Michael will have to explain himself to her later. The Pack needs an Alpha-bitch. Andreas got up and paced the room, thinking over all possibilities. After a few minutes he stopped and turned to them. She and Henry will have to drug Kari and drive out. It will probably be necessary to keep her locked up for a bit. She could get lost easily. I think I need to call the Lieutenant for the Quincy Clan. If I remember correctly, at least one of their Pack is on the police force there. Maybe we can arrange to have him go back suddenly. The moon hung heavy and fecund overhead and it pulled at her blood.
