Auditing Theory by Becker Test bank - Php Auditing and Assurance Services by Arens et al e-book - Php Principles of Auditing by Hayes e-book - Php Auditing Theory by Messier e-book - Php The subject matter of auditing consists of: Compilation is an example of which one of the following types of services? There are four conditions that give rise to the need for independent audits of financial statements. One of these conditions is consequence. In this context, consequence means that the: Which one of the following was not listed as an inherent limitation of a financial statement audit? The primary purpose of the Audit Committee is to: Which one of the following assertions is not made by management in placing an item in the financial statements? Which of the following would not be considered underlying accounting data? Which one of the following Principles applies only to an individual who renders service to the public? Scope and Nature of Services b. The Public Interest If a CPA recklessly abandons standards of due care and diligence while performing an audit, he or she may be held liable to unknown third parties for: The concept of materiality is defined by the Accounting Standards Council in terms of the judgment of the: The statement that the reviewer "is not aware of any material modifications that should be made to the statements in order for them to be in conformity with GAAP" is known as: Which one of the following reports serves as the primary communication of audit findings? Which one of the following types of services offered by a CPA is not an attest service? There are several critical aspects of the business cycle that are important for the auditor to understand. These include all of the following except: Which of the following is an incorrect statement concerning one of the field work standards? Audit planning includes the development of audit strategies. Audit planning is aimed primarily at effectiveness, with little effect on efficiency. Understanding of the internal control structure is necessary in order to plan the audit. Proper supervision is essential because major portions of the audit are often executed by staff assistants with limited experience. The auditor must have a reasonable basis, in the form of gathered evidence, for expressing an opinion. The third phase of the audit involves performing audit tests. The Generally Accepted Auditing Standards that apply to this phase of the audit include: A direct or material indirect financial interest in the client would impair independence if the interest were held during which of the following time periods? Compliance audits based on criteria established by management are usually made by:
