By Deegee on Dec 28, I needed a book to tutor a student and did not want to pay retail price. I got this book for a really good price and it is a superb reference. It is well written and covers the material quite well. I plan to use it as a reference for other texts. Extremely Pleased By Karrie Caldwell on Nov 24, This was the first time that I had ordered my textbooks for college through the internet. I am so pleased with my purchase! There was no writing in it, no bent pages really, and the cover of the book was in great shape! It arrived on time with no problems. Best was I was able to track it. Keep up the good work. Grades suffer when books are late. Thanks By Cindy Nishida on May 30, Although I had to drop this class due to work obligations, this book was very helpful. I will definitely use it again when I retake the class. By Softyashball on Sep 25, This book was just as described. It got to me quick and with a great price. Only so much one can "love" about a Stat book: By Roygbiv67 on Jul 03, Arrived quickly and in excellent condition. Order never came; By Cassandra R. Colbert on Jun 29, My order never came in. When I placed this order, I read the reviews and believed my order would come in just as quick as the others. After 2 weeks, I knew something was wrong bc I have never had problems with Amazon or the sellers. I emailed textbookie many times and although the response was quick, it was not the one I wanted. I would not purchase from them again You may not get it. Has all the charts, etc that are in the text but people tend to rip out. I had bought this book by mistake, so the seller gladly accepted it back. By Abi Solanke on Mar 01, This book is very good as it takes my interest in statistics to new levels. Explanations and illustrations are very good. By Ap on Feb 22, Exactly what I needed along with online class. I needed a book rather just the pdf version. Disappointed By Crosskey on Jun 19, Suppose to be new and it was missing the formula sheet smh I need the book but I was hoping it would be there!
