Chapter 1 : Top 8 Best Fonts to Use on a Resume in | And 3 to Avoid - ZipJob

Free Serif Fonts. Serifs are defined by the small lines (or decorative features) that trail from the edges of each letter and number. As Serif fonts are considered to be easier to read, they're typically used in print design as the characters are clearer and more distinctive, making it much easier for our brains to process.

Following in the footsteps of his original free font Ikaros , this clean, minimal typeface works for a variety of uses. Ellis is super generous too, offering both designs to all totally free for both personal and commercial use. Eventually, he decided to share it on Behance, and then went on to add an ultra-light sister font: Both are all-caps fonts, and contrast perfectly when combined together. These fonts are ideal for titles and headlines, and can be downloaded for free on Behance. Also check out Big John Pro , which is free too. It was designed by Matt McInterney who previously worked at Pentagram and is available in a single, thin weight. This display typeface includes standard and discretionary ligatures, a good set of diacritics, and both old style and lining numerals. Fans of the font can also experiment with a more geometric-inspired alternate. Each academic year, a dozen students work on the project, developing it further and solving problems, and they ask all graphic designers who use Titillium in their projects to email them some examples of the typeface family in use, to help them develop it further. In my opinion, it works best in larger sizes; for example, for titles. That said, with careful consideration, it could be used as a body font. Part of the Google Font Improvements Project, the latest updates to the family include the addition of a Cyrillic character set and support for Vietnamese. David Airey , a graphic designer and occasional writer in Northern Ireland, is among its admirers. Noto fonts are intended to be visually harmonious across multiple languages, with compatible heights and stroke thicknesses. The family include regular, bold, italic and bold italic styles, and it has a serif sister family, Noto Serif. It has recently expanded its language support with the addition of Cyrillic characters Bulgarian, Russian and Serbian. Created by Sora Sagano, a designer at Tipotype , it aims to provide readers with a high level of visual comfort. Designed by font foundry Dalton Maag , it uses OpenType features and is manually hinted for clarity on desktop and mobile screens. Who knew Intel did free fonts? Created by Daniel Ratighan at Monotype under the direction of Intel, Clear Sans supports a wide range of languages using Latin, Cyrillic and Greek, and includes medium, regular, thin, and light weights with upright, italic, and bold styles. It was envisioned as a classic grotesque typeface with a simple, unassuming design, intended to work well in user interfaces. It was designed by Paul D. Source Sans Pro is one of the favourite free fonts of James Hollingworth, a senior-level digital designer and illustrator based near Bath, UK.

Chapter 2 : The Best Free Fonts for Designers

Granted it was from a relatively small pool of fonts. Still, the serif font is highly readable and has been used in publishing for centuries. If this is a form of some kind you are creating, a sans serif font may be in order.

Employers and recruiters are dealing with a higher volume of resumes than ever before. An impressive resume font is a great way to stand out! Why is your resume font so important? Most importantly, using an unprofessional font and questionable font size will disqualify you from consideration for nearly every job. On the contrary, using the perfect font and size will make your resume look professional while still helping it stand out from the crowd. Best Fonts to Use on a Resume 1 â€" Calibri Calibri takes number one on our list and has really gained popularity lately. Many have said that Arial is clean and easy to read. It also has a more modern look to it than other fonts. Arial is an excellent font to use on a resume. It was used by Microsoft for many years for a variety of different programs. Tahoma is a great option that gives your resume a kick while still appearing professional. His goal with Trebuchet was to create a font that appeared well on a screen and also provided a contrast in texture to Verdana, which is next on our list. Trebuchet is a great option since it was designed to appear well on a screen which is how most employers will view your resume. It also provides a modern kick compared to other traditional fonts. It was designed in by Mathew Carter who worked for Microsoft. Verdana was created to appear well on a small screen as well as screens with low resolution. Verdana is a good font to use on a resume! Although it is a good choice, it may seem a bit stale and outdated to some. If you have a lot of experience, it may be a good choice. It is still an acceptable font to use, especially for those who want to go with a classic look. We hope it goes without saying but absolutely DO NOT use comic sans or any similar font on your resume. It will make you stand out, but not in a good way.
