

Chapter 1 : Beth Savage (Illustrator of Toyworks)

The big fearon early learning book (book,) [worldcat, note: citations are based on reference standards however, formatting rules can vary widely between applications and fields of interest or study.

It teaches young kids skills that are fundamental to success as they grow, such as cognitive thought, language improvement, and concentration enhancement. It introduces them to life lessons that they will carry well after they leave the daycare center. Each new book that they read represents a brand new perspective on the way this world works. This ultimately allows their brains to be exposed to a broader scope of concepts that touch on responsibility, creativity, and individuality – the kind of elements that will one day make them strong, productive, and able to experience life at its full capacity. Here is our all-time list of the 50 preschooler books that help nurture these important developmental traits. These are listed in no particular order; the important thing that they are listed. Last Stop on Market Street This multi-award winning book features intergenerational relationships, urban life, the importance of thankfulness, and a diverse cast of characters headed by an African-American boy and his grandmother. As CJ and Grandma take the bus home from church, CJ expresses his dissatisfaction with not having as much as others. His grandmother responds with love, showing him the beauty in their life. The flat, block illustrations feature people of all shapes and colors. This book is a must-have modern, diverse classic. Yoko When Yoko brings sushi for lunch, the other kids tease her mercilessly. This book is a wonderful introduction to differing cultures and the concept of respect. The ending avoids being too pat, and brings with it the added encouragement for the reader to be the brave one and reach out, even when other people seem different. The Little Mouse, the Red Ripe Strawberry, and the Big Hungry Bear This classic book follows a mouse who is trying to keep a big hungry bear from eating his freshly picked strawberry. As he tries more and more silly methods to keep his strawberry safe, he finally realizes that the only way to save it is to share it with the reader. The silliness of the illustrations and text at one point, the mouse disguises the strawberry with a moustache and glasses, are a sure delight for children, and the message that sharing solves problems is beautifully done. The first half of the book shows a monster appearing, starting with his big yellow eyes until he is completely visible. In the second half, the narrator tells the monster he or she is not afraid, and the monster disappears in the same way he came. The message of facing fears, combined with the die-cut illustrations make this a fun bedtime read. Mango, Abuela, and Me A cross-culture and family-oriented read, Mango, Abuela, and Me tells the story of Mia, who must share her home and room with a grandmother who speaks only Spanish. As the story goes on, Mia finds ways to communicate with her Abuela until both of them realize that their closeness has little to do with language at all. The warmly colored illustrations strike the gentle and loving tone of the story, and the text is interspersed with Spanish words and phrases, used in a way to make them immediately accessible to the reader. Bunny Cakes Rosemary Wells is another author whose entire oeuvre could be included here. This book touches on themes of determination, being yourself, and family love. Pared with a spare text that nonetheless has time for a repeatable refrain, this book is captivating for children from beginning to end. Hand, Hand, Fingers, Thumb This book is the ultimate read aloud. The simple rhyming text is designed to bounce along like the drumming the monkeys in the illustrations are doing, and children and adults will have difficulty not beating out the rhythm themselves. A wonderful introduction to beat and playing with language, Hand Hand Fingers Thumb also boasts bright and exuberant illustrations. The feel of this book is enthusiasm and pure fun! As she gradually calms down, she returns to the living room to find that her sister has moved on and the toy is available again. This book is a great introduction to managing feelings. The Adventures of Beekle: The Unimaginary Friend This heartwarming story took the Caldecott Medal in for its illustrations. The storyline follows an imaginary friend who finds himself passed over time and again. He decides to take matters into his own hands and find a child who will imagine him and give him a name. After a journey through the cities and countries of the world, he finally finds a home in the imagination of a small girl. A is for Angry: Her funny illustrations make the connection between unfamiliar words and their meanings, all while maintaining a sense of excitement and humor that sets this book apart from the other alphabet books on the market. Inside Outside Upside Down

This incredibly simple story follows a young bear as he crawls into a box and goes to town on a truck. The appeal comes from the building repetition as each action is added to the refrain. Duck and Goose When a duck and a goose mistake a beach ball for an egg, they first fight about who gets to keep it. As the story progresses, they discover that the only way to take care of their new responsibility is through cooperation. The illustrations really make this book, with gorgeous watercolor backgrounds that push the adorable Duck and Goose to the front. Our heroes are expressive and funny - their simple lines make their expressions stand out.

The How Do Dinosaurs? Typically the first half of the book has the dinosaurs modelling inappropriate behavior, which they then correct in the second half. The rhyming couplets on each page are offset by colorful and silly images of scientifically correct dinosaurs performing day to day tasks, often alongside human children and parents. The juxtaposition is both entertaining and educational, as the names for each dinosaur are provided just below the picture. When his mother does return, she reassures him that she will always be near, and he is able to fall asleep. With a simple rhyme scheme and colorful, expressive illustrations, this book hits the right notes on an all-too-familiar problem for this age group. This book provides a positive introduction to school, while also addressing preschool-friendly themes like the waiting, revenge, and forgiveness.

The first half of the book has Blue, the truck, greeting his animal friends and invites preschoolers to make the noises of the creatures he meets on the way. In the second half, a mean dump truck gets stuck in the mud, but no one will help him. When Blue gets stuck too, all his animal friends jump in to save the day. This book encourages participation through repetitious animal sounds and predictable text. Hands, ears, hair, and toes, the little girl is happy in her own body, regardless of what anyone else thinks. There is a sense of silliness in the pictures and the things the girl likes about herself that will appeal to preschoolers. This is the perfect introduction to self-confidence and self-esteem.

Random Kindness and Senseless Acts of Beauty is a wonderful way to teach children that their actions matter. When a young boy faces the nightmare in his closet, he discovers that it just wants comfort and a warm bed. The writing makes for an easy and funny read-aloud, especially as a soothing way to end the day.

Mouse Paint A simple story designed to introduce children to the concept of art and color, this is the tale of three white mice who begin mixing primary colored paint to create the colors of the rainbow. As they discover the magic of creating color, the mice begin to dance and play, making gorgeous works of art on the white paper they used to blend in with. Mouse Paint is a favorite of art teachers for the clear way in which it teaches color blending and basic art theory. Cut-paper collage illustrations capture the theme of joy in creativity that makes this book a stand-out classic.

Are You My Mother? This story of a lost baby bird looking for his mother will resonate with preschoolers. The central conflict - losing your mother - is very relatable, and the humor is geared perfectly for this age group. As the little bird asks cats, dogs, and even giant excavators if they are his mother, children will be drawn in by the simple illustrations and the silliness of the baby bird. This book is also designed as a beginning reader: Buy Are You My Mother? Mama, Do You Love Me? This book is perfect for those interested in dipping into another culture. Themes of unconditional love in spite of limit testing and boundary pushing are perfect for preschoolers. The timeless message is enriched by the gorgeous cultural illustrations, which make the sometimes unfamiliar vocabulary easy to understand. This story features a father-led family going on an adventure and invites the reader to come along as they trek through swamps, grassy fields, and streams. With a varied landscape and plenty of adjectives, this book is a vocabulary builder par excellence. Children are also invited to participate by mimicking the noises of the terrain the family passes through, making this an enjoyable read-aloud choice.

The Rainbow Fish This classic tale of a fish who gives away his rainbow scales to make others happy teaches the concept of sharing. When Rainbow Fish realizes that he has no friends, he goes to the wise old octopus who tells him to give away his most prized possessions. As he gives away his scales, Rainbow Fish not only gains friends, but learns about the joy that comes from making others happy.

I Love My White Shoes This engaging, bright book is a perfect way to teach children to look on the sunny side of things. As Pete goes for a walk in his new white shoes, he steps in all sorts of messes, turning his shoes from red, to blue, to brown. As the pigeon tries to convince the reader that he should be allowed to follow his dream, children are encouraged to answer back and reason with the silly bird. This book asks for participation while teaching about following instructions, arguing, and throwing temper tantrums. When a child gives a

mouse a cookie, he finds that the mouse needs more and more, like a glass of milk or a crayon to draw a picture with. With each successive page turn, he gets more and more desperate until realizing that he is, in fact, the monster at the end of this book. When the entire lowercase alphabet falls from the tree, their uppercase family members must rush to the rescue, patching them up and reminding them that family is always there. Neon colors jump from the page, and the overall feel of this book is energetic, exciting, and fun. *Cloudy With a Chance of Meatballs* tells the story of the town of Chewandswallow, where food rains from the sky three times a day. When the food weather gets out of control, the town must decide what to do about it. This book also teaches both weather and food vocabulary. *Green Eggs and Ham* You have to have a Dr. The good doctor shows up later on this list, too. This classic tale of Sam-I-Am trying to convince his stubborn friend to try an unusually colored breakfast combo only contains fifty words, and the iconic illustrations provide excellent visual clues that make the book easy for beginners to read. Those that did, and those that are eager to share her stories with their own children, know how remarkably charming her tales of clothes-wearing animals can be. It is a sweetness that a child will recognize with a great measure of happiness. Buy *Beatrix Potter the Complete Tales*
