Still vividly remembering the stories after he grew up and became a writer, Haley began to search for documentation that might authenticate the narrative. It took ten years and a half a million miles of travel across continents to find it, but finally, in an astonishing feat of genealogical detective work, he discovered not only the name of "the African"-Kunta Kinte-but the precise location of Juffure, the very village in The Gambia, West Africa, from which he was abducted in at the age of sixteen and taken on the Lord Ligonier to Maryland and sold to a Virginia planter. Haley has talked in Juffure with his own African sixth cousins. On September 29, , he stood on the dock in Annapolis where his great-great-great-great-grandfather was taken ashore on September 29, Now he has written the monumental two-century drama of Kunta Kinte and the six generations who came after him-slaves and freedmen, farmers and blacksmiths, lumber mill workers and Pullman porters, lawyers and architects-and one author. But Haley has done more than recapture the history of his own family. As the first black American writer to trace his origins back to their roots, he has told the story of 39 million Americans of African descent. He has rediscovered for an entire people a rich cultural heritage that slavery took away from them, along with their names and their identities. *Roots* speaks, finally, not just to blacks, or to whites, but to all peoples and all races everywhere, for the story it tells is one of the most eloquent testimonials ever written to the indomitability of the human spirit. *Lonesome Dove*, by Larry McMurtry, the author of *Terms of Endearment*, is his long-awaited masterpiece, the major novel at last of the American West as it really was. A love story, an adventure, an American epic, *Lonesome Dove* embraces all the West -- legend and fact, heroes and outlaws, whores and ladies, Indians and settlers -- in a novel that recreates the central American experience, the most enduring of our national myths. Set in the late nineteenth century, *Lonesome Dove* is the story of a cattle drive from Texas to Montana -- and much more. It is a drive that represents for everybody involved not only a daring, even a foolhardy, adventure, but a part of the American Dream -- the attempt to carve out of the last remaining wilderness a new life. Augustus McCrae and W. Gus is the romantic, a reluctant rancher who has a way with women and the sense to leave well enough alone. Call is a driven, demanding man, a natural authority figure with no patience for weaknesses, and not many of his own. He is obsessed with the dream of creating his own empire, and with the need to conceal a secret sorrow of his own. The two men could hardly be more different, but both are tough, redoubtable fighters who have learned to count on each other, if nothing else. *Lonesome Dove* sweeps from the Rio Grande where Gus and Call acquire the cattle for their long drive by raiding the Mexicans to the Montana highlands where they find themselves besieged by the last, defiant remnants of an older West. It is an epic of love, heroism, loyalty, honor, and betrayal -- faultlessly written, unfailingly dramatic. *Lonesome Dove* is the novel about the West that American literature -- and the American reader -- has long been waiting for. Burnham who designed and supervised the construction of the "White City" around which the fair was built, and H. Holmes born Herman Webster Mudgett , a fiendishly The book contains cameo appearances by such late-century celebrities as Buffalo Bill Cody, Susan B. Anthony, and Thomas Edison.

In lieu of an abstract, here is a brief excerpt of the content: Smith-Hefner Growing Up American: By Min Zhou and Carl L. Russell Sage Foundation, Their parents came to America hoping for a better life; they look to the second generation to either realize or frustrate those hopes. Min Zhou and Carl L. Bankston, III argue that the new post immigrants to the United States face a very different situation than that faced by earlier-arriving European immigrants. The American economy today is highly segmented. One segment requires a college education and sophisticated technical or interpersonal skills. The other is comprised of low-skilled, labor-intensive service jobs which hold little hope for advancement or long-term security. The great majority of Vietnamese refugees arrived in this country with few economic resources and low educational backgrounds. Most settled in poor, urban, minority neighborhoods. Children are pushed toward educational success by their parents, and at the same time pulled by oppositional youth culture of their poor, urban neighborhoods. This study confirms the findings of previous studies; Vietnamese children for the most part do exceptionally well in school. Their success suggests that doing well depends less on the social capital that parents arrive with than on something else. Between and , the authors engaged in participant observation in the community, conducted numerous in-depth interviews, and administered two surveys of high school aged youth. They also drew extensively on U. Census data and other statistical indices. The authors describe their methodology as multivariate, linking ethnographic case studies with quantitative census data, survey data, and archival records. Their primary concern is to determine how Vietnamese American children have overcome class and economic disadvantages to adapt to American schools. In framing their study, the authors note the paradoxical relationship between cultural assimilation and educational achievement. Whereas conventional sociological theories argue that longer residence in the United States leads to higher academic achievement, more recent ethnographic studies have indicated that the longer immigrants are in the country, the more maladaptive the outcomes can be in terms of school performance, aspirations, and behaviors. John Ogbu, The Next Generation: If a socially defined racial minority finds normal paths of integration and upward mobility are blocked because of race, they may cope with racial barriers by falling back on alternate survival strategies inimical to school success. They may react to racial oppression by constructing identities in the form of avoidance or resistance to the values of mainstream society; this may include resistance to school sanctioned norms of achievement. Among the Vietnamese of Versailles Village, the authors discover that it is in fact those You are not currently authenticated. View freely available titles:
