

## Chapter 1 : E-books: Public Health | HSLs

*"In one respect New Orleans has set an example for all the world in the fight against yellow fever. The first impression was the complete organization of the citizens and the rational and reasonable way in which the fight has been conducted by them.*

The Challenge of Treating Obesity and Overweight - National Academies Press , The discussions covered treatments for obesity, overweight, and severe obesity in adults and children; emerging treatment opportunities; the development of a workforce for obesity treatments; payment and policy considerations; and more. Milloy - Cato Institute , Unscientific public health research costs US consumers billions of dollars each year but does nothing to improve the well being of Americans. This is a humorous tongue-in-cheek guide to getting ahead in the field without wasting time on real science. The book highlights the opportunities for improving health literacy. A Challenge for Interdisciplinary Research by M. This report highlights the progress our nation has made reducing tobacco use and the continuing burden of disease caused by smoking. Health in International Perspective: Woolf, Laudan Aron eds. Yet Americans die sooner than residents in many other countries. The Biodemography of Longevity by Kenneth W. It will be particularly valuable for promoting communication between the social and life sciences. It seeks to provide guidance in practical terms toward the solution of the many technical and management issues. A Vital Investment - World Health Organization , WHO is launching a global report on chronic diseases, which presents the latest scientific information and makes the case for increased and urgent action for chronic disease prevention and control. The report reviews the burden of chronic diseases. Rogers - Wellington Pubns , The author has chosen to use a question-answer format in order to make the often complex subject matter, easier and more enjoyable to read. Q and A is not a dialogue between real people -- the author has provided the dialogue for both. Guidelines for investigation and control - World Health Organization , The book is written for public health practitioners, food and health inspectors, district and national medical officers, laboratory personnel and others who undertake or participate in the investigation and control of foodborne disease outbreaks. A basic understanding of the practices of public health and biostatistics is recommended. Each chapter has a section on reading and reporting statistics, and self testing at the end of each section makes this an ideal learning tool. Mathers, Majid Ezzati - World Bank Publications , An up-to-date source on the entire global epidemiology of diseases, injuries and risk factors with a complete presentation of results. It includes refined methods to assess data, ensure epidemiological consistency, and summarize the disease burden. It presents national trends in health statistics and includes summaries, highlights, tables, chartbooks, and appendixes.

**Chapter 2 : A History of Public Health**

*Online shopping for Public Health from a great selection at Books Store.*

Summer of Public Health: The list will help those looking to enrich their minds while enjoying the summer months. In under one hundred pages, readers will understand the most transformative scientific discoveries of the twentieth century. Rebecca Sloop, which explores issues of race, poverty, and medical ethics as it details the story of Henrietta Lacks, a year-old Black woman in Baltimore who died of cervical cancer in Doctors at Johns Hopkins took tissue samples from her cervix without her knowledge to produce the first cell line known as HeLa; that line went on to aid in groundbreaking medical discoveries from the polio vaccine to AIDS treatments. This fall, the book will be read by the entire BUSPH community as part of a new school-wide reading initiative. The second book is *Random Family* by Ms. Adrian Nicole LeBlanc, an extraordinarily evocative exploration into how cycles of disadvantage influence everything about lives, across generations, and the ineluctable role of social determinants if we want to improve health. To understand how our history is embodied and contributes to health disparities, Dean Michelle A. Williams of the Harvard T. Chan School of Public Health recommends reading two books. The first, *My Own Country*: Abraham Verghese, eloquently tells the story of the difficult and often lonely journeys that a generation of young gay men took upon leaving their rural homes to live in urban centers that were more complicated than they imagined, and that were far more dangerous than anyone could have known. The second recommended book is *Between the World and Me* published in , a profoundly moving essay by Mr. This highly acclaimed book focuses on the fear of violence and humiliation experienced by the author as a young man in West Baltimore. Coates describes how historical forces in American society e. These noteworthy books help to illustrate how we live our history, and how that history contributes to persistent health inequalities, inequalities brought on by social and historical forces. Interim Dean Cristine D. Associate Dean Marian R. *A Story of Justice and Redemption*. In this powerful memoir, author Bryan Stevenson recounts his personal and professional journey as an activist lawyer helping those who have been abandoned at the margin of society: A compelling illumination of racial injustice and related inequities in the U. Part epic of Texas, part classic coming-of-age story, part unflinching portrait of the bloody price of power, *The Son* is an utterly transporting novel that maps the legacy of violence in the American West through the lives of the McCulloughs, an ambitious family as resilient and dangerous as the land they claim. Patrick Kennedy and Mr. Kennedy, a former member of the U. He also details national efforts by lawmakers and advocates to address intellectual, developmental and mental health issues, including the long road to passage of the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act. Rounding out the rest of his summer reading recommendations are: Walton, associate dean for undergraduate affairs, University of Louisville School of Public Health and Information Sciences, recommends three works of fiction: Given the important conversations we are having on our campus about race and racism in the context of the Maryland Diversity Dialogues, Coates provides a critical perspective on just how intractable and systemic racism is in American culture and how much work remains ahead to create racial justice. *Zero K* by Don De Lillo. The wisest, richest, funniest, and most moving novel in years from Don DeLillo, one of the great American novelists of our time—“an ode to language, at the heart of our humanity, a meditation on death, and an embrace of life. *Ross* is the primary investor in a remote and secret compound where death is exquisitely controlled and bodies are preserved until a future time when biomedical advances and new technologies can return them to a life of transcendent promise. Should we have to die in the same manner? Griffith and Kenneth R. White with Patricia Cahill. This book is recommended reading for board members, CEOs and other professional leaders who wish to position themselves for success. Mark Rampolla, is an inspiration for young entrepreneurs who want to lead businesses that are socially responsible. Rampolla, along with his wife, Ms. It includes a scientist in the mix, always an attraction for me. Geraldine Brooks published *The Secret Chord* late last year.

### Chapter 3 : Oxford Textbook of Public Health - Oxford Medicine

*APHA Press, an imprint of the American Public Health Association, provides public health practitioners, scholars and students with accessible and affordable resources of the highest quality. Check out our Co-Published Books.*

One of the pioneers in the field of leadership studies, Warren Bennis, put this challenge in context: The good news is there are plenty of resources available to provide support. What follows is a mix of classic texts, recently touted works, and related books selected with the public health leader in mind to help inspire, inform, and influence. Northouse, Sage Publications, Inc. The popularity and usefulness of this book is clear—it has been adopted by more than 1, colleges and universities worldwide as a standard text for courses relating to leadership. This book combines academic information about major leadership theories with practical exercises and applications. *Leading Change* by John P. Kotter, Harvard Business Review Press, John Kotter, known as an expert in business leadership, provides constructive information for public health leaders as well in his classic text on guiding change efforts. Some have described *Leading Change* as a must-have for any organization. Kotter identifies an eight-step process and shows where and how leaders often derail. Ury, and Bruce Patton, Penguin Books, This international bestseller offers a step-by-step, strategy for leaders to reach mutually acceptable agreements in situations that involve conflict. Based on the efforts of the Harvard Negotiation Project, the book features how to work together to create options that will satisfy both parties. It also provides helpful tips on dealing with those who may try to undermine negotiation efforts. Also *Good to Great and the Social Sectors: A Monograph to Accompany Good to Great*. How can good companies or even bad companies achieve greatness? Collins provides real-life examples based on dozens of scenarios. So in demand has been this work, that those in the social sector asked him to create a companion work, *Good to Great and the Social Sectors*. Collins goes further in this supplement to reveal contrasts between businesses and the social sector. *Leadership from the Inside Out*: This book frames seven simple "mastery areas," providing an integrated coaching experience that helps leaders understand how to harness their influence in an authentic manner. Basic theories and principles of leadership are put in a context applicable to the public health setting. Four new chapters have been added to this revised edition including the interface between management and leadership, systems and complexity leadership concerns, and employee development. New case studies, interviews, and exercises have also been added. Levy and Joyce R. Oxford University Press, *Mastering Public Health* provides tools to improve leadership, performance, and productivity within public health organizations. The editors compiled information from key public health leaders across the country in a book that is user-friendly and focuses on day-to-day practical skills and competencies that are often not taught in educational or training programs. Aguilar, *Walk the Talk*, This guide helps leaders ensure their employees avoid biased, stereotypical and demeaning communication. Part of an internationally renowned diversity training program, the text offers concrete guidelines that help your message get across to a diverse group of listeners. It includes a checklist for communicating with respect and inclusion. This list was compiled by Latrissa Trish Neiworth. She is currently pursuing her doctoral degree in teaching and leadership at Pepperdine University.
