After waiting all year to make a special wish for himself at the Loy Kathong festival, a ten-year-old Thai boy finds himself wishing instead for the welfare of a trapped white elephant.*

Plot[edit] Mr. McFarland is driving erratically down a residential street on the way to drop off his son John. John notices damage to the car and realizes that his father is drunk, so John instructs him to move to the passenger seat and let him drive. Alex and Eric are bullied at school by the so-called jocks , one of whom diverts a teacher and throws a spitball at Alex during science class. Later, Alex and Eric are shown at home ordering weapons from a website and receiving a rifle in the mail. While Alex is taking a shower, Eric gets in with him. He claims that he has never been kissed, and the two kiss. The two formulate an attack plan. Realizing what is about to happen, John attempts to warn others not to enter the school, to mixed effect as a few students listen to him but others, as well as a teacher, do not and enter into the building. He also tries to find an adult to get help from but cannot. The two gunmen then enter the school, and after their plans to blow up parts of the school with propane bombs fail, begin shooting indiscriminately. A friendly student named Elias photographs them entering the library where they open fire, shooting several students, including a bespectacled outcast named Michelle and presumably Elias. Realizing that the gunfire is real, students now begin to panic, while teachers attempt to quickly evacuate the building; an African-American student named Benny silently walks the halls and helps some students escape to safety with aplomb while nearing Alex. The two boys separate, continuing their killing spree. Alex enters the bathroom where three popular girls named Brittany, Jordan and Nicole are, presumably shooting all three. The school principal, Mr. He does speak to Mr. Luce go, before smiling evilly and changing his mind by firing several shots down the hall that strike and kill the principal. Alex enters the cafeteria, which is strewn with overturned chairs, backpacks, several dead bodies, and numerous abandoned half-eaten lunches, and sits down. Alex picks up a cup from an abandoned lunch and casually drinks from it. Eric meets up with him, and they have a brief conversation, which ends when Alex shoots Eric in mid-sentence. Alex leaves the cafeteria, showing no emotion over shooting Eric, and discovers Carrie and Nathan in a freezer. He tauntingly recites " Eeny, meeny, miny, moe " to them to decide whom he should kill first. The film then cuts to credits leaving the ending ambiguous. Cast[edit] Alex Frost as Alex, the more intelligent of the two killers, implied to be the one in charge. He is an accomplished but frustrated pianist and sketch artist. He and Eric kiss before the massacre, both citing the fact that they had never been kissed. He is less intelligent than Alex, and Alex is obviously aware of this. He is shot in the chest by Alex near the end of the film, while talking about whom he had killed earlier. Alex warns him to stay away from the massacre. Timothy Bottoms as Mr. Matt Malloy as Mr. Luce, the principal of the school. Cornered by Eric, who briefly spares him, he is presumed dead after being shot several times. Elias McConnell as Elias, a photography student building his portfolio with portraits of other students. Alex taunts them with Eeny, meeny, miny, moe. Kristen Hicks as Michelle, a nerdy girl ashamed of her body. The film follows her through the locker room and into the library where she assists. She is the first to die during the massacre. Brittany Mountain, Jordan Taylor, and Nicole George as Brittany, Jordan, and Nicole, three bulimic girls who talk incessantly, gripe about parents, and squabble with one another. Bennie Dixon as Benny, an athletic student who helps Acadia escape out of a window before approaching Eric. He is shot and presumed dead. She is assumed to have a panic disorder which causes her to freeze and break down in times of fear or stress. During the shooting, Benny discovers her standing still in a classroom and helps her escape from the school and the shooters. The title was inspired by the parable of the blind men and an elephant. The film began as a television film that Van Sant had intended to make about the Columbine High School massacre ; eventually, the idea of a factual account was dropped. Whitaker was closed by the Portland Public Schools in due to structural problems and safety concerns with the school building. The script was "written" to its final form during shooting, with cast members improvising freely and collaborating in the direction of scenes. Van Sant claimed audiences in attendance at Cannes argued over its quality, leading to altercations. The film was released for

incremental distribution by HBO in 38 theaters in the United States, beginning October 24, There is no pumped-up style, no lingering, no release, no climax. Just implacable, poker-faced, flat, uninflected death. Truffaut said it was hard to make an anti-war film because war was exciting even if you were against it. Van Sant has made an anti-violence film by draining violence of energy, purpose, glamor, reward and social context. I doubt that Elephant will ever inspire anyone to copy what they see on the screen. Much more than the insipid message movies shown in social studies classes, it might inspire useful discussion and soul-searching among high school students.

Chapter 2 : Auspicious Elephant for uses in Fengshui in attracting wealth and good luck¼• | Astrology Life

Historically linked to the era of British colonialism in India, it entered popular culture folk-magic during the late 19th century and probably reached its apotheosis in the s, when lucky elephant charms and knick-knacks were all the rage in the United States, Canada, and Europe. The origins of the lucky elephant charm can be found in the Hindu religion of India. There, the god Ganesha , the elephant-headed son of Siva and Parvati , is worshipped as an opener of the way and luck-god. Ganesha has his own iconography in India, and his best-known symbol is the swastika , which was also popular as a luck-symbol in America, at least until the Nazis corrupted its referential connotations. The American lucky elephant craze of the early to mid 20th century did not make use of elephant-headed Ganesha imagery. Instead, it conflated the luck-god with the elephant itself, perhaps because there was a lot of media interest after World War One in the so-called "white elephants" of Thailand. Custom dictated that this rare race of pale-skinned elephants could only be owned by members of the royal family -- and American newspaper and magazine accounts of the period made much of the fact that the animals were expensive to maintain. It was even claimed that the King of Thailand was straining his treasury to keep his white elephants fed -- and the term "white elephant" came to mean an unwanted knick-knack of which one cannot dispose. American fascination with the lucky elephant-god of India and the white elephants of Thailand combined in the form of the ubiquitous lucky elephant knick-knack. In typical American fashion, it was decreed that only those elephant figurines with their trunks upraised were lucky. The rest were, as a friend of mine put it, "just elephants. It may have originated in the west-British and Irish belief that a lucky horseshoe must face upward or "the luck will run out. Other lucky elephant figurines of the mid-century were made of ivory, ivory-coloured plastic, onyx, porcelain, jade, serpentine, and ebony. Concurrent with the popularity of lucky elephant figurines was the popularity of lucky elephant charms, usually carved of jade or cast in silver. These were typically worn by European and American girls and women as part of a charm bracelet , alongside other lucky emblems such as the heart, four-leaf clover , horseshoe , money bag , and wishbone. During the Great Depression of the s there was a fad for good luck coins and pocket pieces in North America, and the elephant did double duty: On regular pocket pieces , the elephant appeared along with the a panoply of good luck symbols, including the All-Seeing Eye , the swastika , the heart-padlock, the four-leaf clover , the horseshoe , the rabbit foot , and the wishbone ; while on political advertising coins the elephant appeared alone, both for luck and as the mascot of the Republican Party. After the lucky elephant "trunk up" belief became established in the USA, the belief that black cat with "tail up" were lucky soon followed, and magic candles in the form of a black cat with tail up can be found in old hoodoo catalogues dating back to the s at least, if not earlier. However, tail up black cat statues never took off the way trunk up elephant statues did, so all we ever see are the black cat figural candles , which are generally burned for luck in gambling. Elephant charms and lucky elephant figurines are still made and used, but their popularity is currently on the wane. One reason for this may be that the much-publicized endangered-species status of the elephant makes it seem anything but "lucky" in the modern world. Another reason may be that, like the rabbit foot , raccoon penis bone , and rattlesnake rattle , the elephant charm has somehow become linked with current cultural trends deploring the "exploitation of animals.

Boonmee and the lucky white elephant by Jane Hamilton-Merritt () Miss Bangkok: Memoirs of a Thai Prostitute by Bua Boonmee () ().

The name of the elephant is Airavata and it is a flying elephant. Airavata is made the King of all elephants by Lord Indra. King Bimbisara had one such white elephant, which he had captured in a forest when the elephant was in his Musth period. He named the bull elephant Sechanaka which means "watering" as the elephant used to water the plants by himself without any prior training. It is said the cost of this elephant was more the half of Magadha. He later gave it to his son Vihallakumara, which made his other son Ajatashatru jealous. In the Thai language, they are called albino, not white, indicating "pale yellow eyes and white nails", with white hair. The "rough skin was either pink all over or had pink patches on the head, trunk, or forelegs. Historically, the status of kings has been evaluated by the number of white elephants in their possession. The late king, Bhumibol Adulyadej , owned as many as 21 white elephants " considered an unprecedented achievement, making him the monarch who owned the greatest number of Chang Phueak in Thai history. Today eleven of these elephants are still alive and only five have royal titles. After being discovered, the elephants are assigned to one of four graded categories before being offered to the king, although the lower grades are sometimes refused. The animals needed a lot of care and, being sacred, could not be put to work, so were a great financial burden on the recipient - only the monarch and the very rich could afford them. According to one story, white elephants were sometimes given as a present to some enemy often a lesser noble with whom the king was displeased. The unfortunate recipient, unable to make any profit from it, and obliged to take care of it, would suffer bankruptcy and ruin. In Myanmar as well, white elephants have been revered symbols of power and good fortune. The announcement by the ruling military regime of the finding of white elephants in [8] and [9] was seen by opponents as being aimed at bolstering support for their regime. As of [update] Myanmar has a total of nine white elephants as of February Three white elephants are currently held [10] in a pavilion on the outskirts of Yangon. The rest are kept at Nay Pyi Daw, the new Myanmar administrative capital.
