Since its conception in , the multi-patented Offset Mastery Bridge remains the industry leader and most trusted Offset bridge in the hands of touring musicians around the globe. Luthier designed, our original Offset bridge eliminates the buzzing associated with previous saddle designs. All of our Offset bridge saddles are made of solid brass and we plate them with a unique, self-lubricating hard chrome plating not found on any other guitar bridge. Our hard chrome plating also protects the saddle from wear, preventing grooves formed in the saddle over time, versus stainless steel and plain brass. All of our products are luthier-designed and precision machined of the highest quality, non-corrosive materials in Minneapolis, MN. Not sure if this is the right bridge for you? Check out our guide. Each individual bridge is inspected and tested before being shipped to you, to ensure the best possible performance. Every part of our bridge is precision machined out of the highest quality, non-corrosive materials to protect against any rust. Because we are currently such a small shop, the Mastery Bridge is only available through this website and is not available through any other online retailer in the USA. Please look over the descriptions of the various parts that go into the Mastery Bridge below.

Installation Guide Mastery Saddles The Mastery Bridge features a unique, patent issued two saddle design not found on any previous guitar bridge. On the 52mm string spacing from E to E, four intonation-adjustment screws are used instead of six, allowing the string to freely go from the saddle to the vibrato without any chance of interference from the front of an intonation screw or back of a baseplate. Each saddle features two drop-in swivels, permitting each of the individual intonation adjustment screws to work independently for precise intonation. Instead of around 18 lbs. The saddles accommodate the heavy-gauge strings of Bass VI model guitars and can be used on left-handed guitars as easily as right-handed. Adjustable The Mastery Bridge features precisely curved adjustable saddles that allow you to effortlessly set-up to any common fingerboard radius, from 7. Different climactic conditions can move the wood of your neck and not the frets, and depending on how malleable your fretwire is it will move or not move with it, causing slight unevenness. Heavy-handed players also like our adjustable saddle design because they can easily raise the bass side of the strings slightly for hard-hitting. Adjustable radius bridge saddles like ours are important for slight tweaking on first install and in the long run. Swivels Our patented two saddle design features two drop-in stainless steel swivels in each saddle, allowing each intonation adjustment screw to work independently from each other. We use a patented self-locking screw design for the socket head intonation screws that go into the swivels. Our four intonation screw design allows the strings to go freely from the saddle to the vibrato without any chance of interference from the front and back of an intonation screw or the back of a baseplate and makes intonation adjustments easy while the strings are up to tension.

Hard Chrome Plated Saddles Plain brass, plain steel and plain stainless steel saddles eventually wear grooves into the saddle with vibrato use, which can cause muted tones and string breakage. Plain brass is the softest of these materials and can begin to wear within hours of vibrato use. The more surface area there is in a saddle groove, the more problems can arise later on. A steel string on an unfinished saddle naturally generates heat with heavy vibrato use, and that heat will expand the metal in your string and cause it to go out of tune. We use brass for our saddles, a softer, warmer-sounding metal, but plate them with a unique hard chrome plating not found on any other guitar bridge. Hard chrome plating is commonly used to reduce friction and heat, along with increased wear resistance in parts like piston rings, firearms, airplane landing gear and bearing surfaces. It generates far less heat with vibrato use and your strings stay better in tune. No other bridge manufacturer uses plating this durable. Our saddles will remain the hardest surface on your guitar. This ensures your bridge will not change position during performance and remain stable during string changes without any chance of misalignment. Like all other parts of the Mastery Bridge, the posts and screws are stainless and will not corrode.

Offset Baseplate Our patented designed baseplate is CNC water-cut from a solid, stainless non-ferrous steel sheet. We then tumble them in a coarse media to de-burr and break any sharp edges. The plate edges are then buffed on a wheel and hand straight-line

sanded. After bending them to the specified profile, our logo and batch numbers are laser printed into the metal. Our patented baseplate and saddle design prevents the string from making contact with the back end of the baseplate and front and back of the intonation screw on Offset and Bigsby equipped guitars. Our M2 Mastery Bridge is the same bridge as our M1, but comes with an additional set of larger mounting posts required for most Japanese made guitars. Get Your Offset Bridge.

Chapter 2 : NG BridgeMaster E Marine Radars Type Accepted for AIS Display | Sperry Marine

Author: Mark Horton What makes a bridge expert and why does he always come out on top compared to the average club player? No, it's not the ability to execute esoteric squeezes and endplays - they simply don't come up enough to account for the way the experts consistently win against weaker opposition.

Bridge Baron - See: Bride Baron Past Versions. Facebook - Bridge Baron on Facebook. Bridge Baron for Android - Version 2. Released December 16, With this app, you can play some serious Bridge with your Android phone or tablet. Blue Chip Bridge - See also: Blue Chip Bridge Ltd. The Intelligent Bridge Program. The software program was developed by Mr. Ian Trackman and Mr. They are continuously improving and updating the program. Their policy is to provide minor updates to registered users free of charge by email or at nominal cost through the post. There are three main sections of Blue Chip Bridge, which include the program itself, the bidding database and the Tutors. Bridge Is Cool - An interactive Internet site established and presented in for younger players. The purpose of the site is to compete in bridge events just for Juniors, meet people from other cultures and visit exciting parts of the world. National bridge organizations help fund many of the worldwide competitions. The site has many things to offer such as instructions on how to learn and play MiniBridge and Bridge. The member can also download software for private use and also download the issues of The Grapevine, which is the Newsletter for members with pertinent information for the young bridge player. The member can also count upon the advice of several of the leading bridge experts in the bridge community. For additional information, please check out the following article in. From Novices to Advanced Players. Both IBM and Mac versions. You can download a demo before purchase. The software includes an online bridge tutorial. Bridge Base Online Download is required. Bridge Base Online represents an entirely new concept in online bridge. It is a place where you can play bridge, study bridge, or talk about bridge with your friends. Some AOL users have had trouble with this download. If, at the end of installation procedure, you are asked to insert a 2nd disk, the download has not worked properly. This software offers a learning tool that no bridge player can afford to be without such as access to every bid made and every card played in a table field. Here in an easily-to-access database is information that was in the past only available to expert players after a lifetime of competition: BRidgeBRowser has hands sorted by player, rating, date, hand shape, and of course results. With this information you can literally become an expert. Bridge Buff - See also: Bridge Buff plays a great game of Bridge. It is highly praised throughout the bridge community. It is perfect for all levels of players, with Tutors for beginners and intermediates, and large numbers of conventions for more advanced players. It features excellent auction stability. Bridge Buff uses Visual Deal to deal out thousands of randomly generated deals, complete with auctions. There are three playing modes. In Practice mode, you have full control over every element of the game, and you can redeal, rebid, replay, take back cards, peek, and cheat as much as you want. In Match mode, you play a series of hands against a closed room opponent and can play Teams, Pairs and Individual matches. Another Match option includes matchpoint estimates so you can measure how well you are doing against both Strong and Weak fields. We have been in continuous operation for since that time. During that time we have evolved a sophisticated online playing software system that includes a Java Web based program. Bridge Dealer - Offered by Michael Lawrence, this is a software product that will deal hands to your specifications and will help you decide on knotty bidding problems. There are some fun and some informative things you can do with this program. For Dos or the Mac computer. The Bridge Dealmaster - Company: Box , Agawam, MA Dealmaster, the perfect tool for organizing lesson materials, generating deals, and printing just what you want. Dealmaster, the finest Deal Generator and Simulator available. Super for creating hands for bidding and play practice and for convention analysis. Dealmaster - a great Generator of random deals. English, Italian, French and German. Easy to setup and us. Wide range of Tournaments. Bridge Master - Bridge Master for Windows released August 1, is the latest edition of the highly acclaimed Bridge Master software. There is a DOS version and a Windows version. What is Bridge Master. Bridge Master is a computer program for IBM compatible computers. Bridge Master for Windows runs on Windows 3. Bridge Master is an educational program for improving your declarer play

skills. The program presents you with a series of instructional deals to play. You are always declarer. The deals that you play are not randomly dealt. They are carefully constructed exercises designed to illustrate an important declarer play technique. If you take the correct line of play you will always make your contract. If you make any mistake as declarer, the program will defend perfectly and defeat your contract. Each deal is accompanied by an animated bridge movie that will explain the correct line of play as well as the thinking process that leads to the solution. Bridge Master for Windows was released August 1, Bridge Master - The first software product by Mr. It gives you hands and it watches you closely as you play. You choose the cards you play and the computer decides if it likes your play. The computer does things like giving East the queen of hearts the first time you play the hand and giving it to West if you try another, but incorrect line. Bridge Master - The much improved version by Mr. Fred Gitelman of his software. Both Windows and DOS versions are available. They are carefully constructed exercises designed to illustrate an important declarer play technique. With this software you can start off with certain bridge conventions and then add you own bridge conventions. The software also offers you several default Convention Charts, and you can make your own. The player can play random hands, enter specific deals or arrange practice hands. This software only runs on DOS and Windows. BridgePro - The game, BridgePro , is the most advanced, affordable contract rubber bridge computer card game on the market today. It will realistically play bridge with the user as if there were three other individuals sitting at the table. It is visually pleasing, simple to use, and reliable. By selecting the proper level the player can gradually work toward the top level of play. The player can add one or several conventions at a time. The programs will play on any Macintosh OS from 6. A display resolution of X or larger is required. Bridgetrix Homepage - Presently Off Line. Neil Cohen, has produced a CD to demonstrate certain aspects of the Game. You learn while Mr. Bobby Wolff acts as your Bridge Mentor. Instead of reading, you listen and learn. The CD does not cost very much and a refund policy is offered. Brent Manley and Mr. Alen Truscott, and their reviews have been favorable and positive.

Chapter 3 : The Bridge World

The bidding advice is aimed at beginners or very low Intermediates. There is one hand where responder holds 4 spades (with an honor) and 3 hearts (with an honor) and around 8 high card points.

Paperback The bidding advice is aimed at beginners or very low Intermediates. There is one hand where responder holds 4 spades with an honor and 3 hearts with an honor and around 8 high card points. Opener bids 1 heart and you are asked what to respond. Maybe inexperienced players would respond 1 spade, but experienced ones not the same as good players would respond 2 hearts. The book tells you to support spades. That's fine for a book for less experienced players. But it's a waste of paper for more experienced players. There is a section on into cue bidding. Maybe you think this book is for less experienced players? Then try looking at the hands! There are a lot of good hands, aimed at Intermediate level players, not low Intermediate ones. They show how hands are misplayed. There are also a number of Squeeze hands. Some of the hands involve thinking about what can go wrong, such as a trump break. Then there is one hand that shows how to try for an extra chance with a 0. It involves playing for a miracle lie of the cards. The hands are on a variety of topics they are all over the place, and this is not really conducive to learning. There were a couple of hands I did not agree with either. This ruins it, and forces you to cover up the defenders' hands, which are not always EW, it varies. It's NOT a bad book. I liked the hands. I thought the bidding section a waste of paper. The fact that all 4 hands are exposed was pretty annoying. While there is "something for everyone" I would much rather read a book that is more focused. Maybe I should rate it a 4. But I was disappointed with it and am returning it.
