Chapter 1 : How to remove Google Custom Search from Chrome, Firefox, IE

Paste the Custom Search element code into your HTML document file and then test it live from the page, or go back to your Google custom search control panel to manage the search engine; you can.

Share The webinar on how to create Google Custom Search Engines last week was well-received and has left lots of you hungry for more! The questions have been divided up into four sections: We hope you find these references helpful, and if you have further questions, leave them in the comments section! Below also is the recording of the webinar for you to check out and review. Friday, June 17 is the deadline to submit your entry for the first round of judging. So get your CSE pulled together, because the prize is certainly worth it! Yes, you will have to log in to a Google user account in order to create a Custom Search Engine. I just created a custom search engine but it does not save or list my search keywords. I like to retrieve my standard search words every time I log into my CSE. How do I do that? Would he mind sharing which line it is? Mike Where it says: Is there a way in the control panel to give specific weights to different keywords? Are CSEs different if created through google. Mike No, it appears to re-direct you to google. Can we make our CSE private? Not specific to sourcing, but there are lots of guidelines and recommendations for creating inclusions and exclusions in the Google CSE FAQ. Can you delimit extensions as in -inurl:. How do they work? Is there a limit to the number of refinements you can use with the more command? Mike You can stack as many as twelve at a time. Each of those counts as one keyword. Can you restrict the engine to only a filetype? In order to do that, you just need to add a filetype: Regarding location â€" where in the CSE can u add locations? How do u narrow down to location? If you want to make it part of the engine, you could include substrings specific to locations in refinements. Can you add specific requirements to your refinements? You can add anything you want to your refinements â€" just make sure you test them for quality! If you wanted to search a state licensing list ex: Registered Nurses â€" is this possible? For example, look at this list of nursing credentials , pick the ones you desire, and make a specific refinement for nursing credentials. There is a ton of great information there to help get you started. And â€" here are some search results that can help you as well. Tyler Cushing Put site: Then you can refine your search by adding keywords. You can also look at some example CSEs here: Hope this helps you on your quest to create great Google Custom Search Engines! Why not give it a chance?
