Chapter 1 : The 10 Best Sims 4 Mods :: Games :: Lists :: Paste

This book explains "skinning" and "modding" and how to approach a career in either Web site design or computer game development with tips on defining objectives and setting goals.

Find articles by Sumedha M. This article has been cited by other articles in PMC. Abstract The sick building syndrome comprises of various nonspecific symptoms that occur in the occupants of a building. This feeling of ill health increases sickness absenteeism and causes a decrease in productivity of the workers. As this syndrome is increasingly becoming a major occupational hazard, the cause, management and prevention of this condition have been discussed in this article. No specific illness or cause can be identified. The complainants may be localized in a particular room or zone or may be widespread throughout the building. SBS or Tight building syndrome. Building-related disease, when the symptoms of diagnosable illness are identified and attributed directly to airborne building contaminants. The cause of the symptoms is not known. It reduces work efficiency and increases absenteeism. Most of the complainants report relief soon after leaving the building, although lingering effects of neurotoxins can occur. Signs and symptoms of the building-related disease are as follows Cough, chest pain, shortness of breath on mild exertion, edema, palpitations, nosebleeds, cancers, pregnancy problems and miscarriages. Legionella is also responsible for Pontiac fever. The disease is noninfective in nature. The patient may have flu-like symptoms. It is sometimes called Monday Fever. Permanent lung damage does not occur. The symptoms can be clinically defined and have clearly identifiable causes. The complainants may require prolonged recovery time after leaving the building. It is important to note that complaints may also result from other cause like a preexisting illness or other allergies, job-related stress or dissatisfaction and psychosocial factors. Contaminants from outside like pollutants from motor vehicle exhaust, plumbing vents and building exhausts bathrooms and kitchens can enter the building through poorly located air intake vents, windows and other openings. Combustion byproducts can enter a building from a nearby garage. Radon, formaldehyde, asbestos, dust and lead paint can enter through poorly located air intake vents and other openings. The most common contaminant of indoor air includes the volatile organic compounds VOC. The main sources of VOC are adhesives, upholstery, carpeting, copy machines, manufactured wood products, pesticides, cleaning agents, etc. Environmental tobacco smoke, respirable particulate matter, combustion byproducts from stove, fireplace and unvented space heater also increase the chemical contamination. Synthetic fragrances in personal care products or in cleaning and maintenance products also contribute to the contamination. Biological contaminants The biological contaminants include pollen, bacteria, viruses, fungus, molds, etc. These contaminants can breed in stagnant water that has accumulated in humidifiers, drainpipes and ducts or where water has collected on ceiling tiles, insulation, carpets and upholstery. Insect and bird droppings can also be a source of biological contamination. Biological contamination causes fever, chills, cough, chest tightness, muscle aches and allergic reactions. In offices with a high density of occupancy, airborne diseases can spread rapidly from one worker to another. Air-conditioning systems can recirculate pathogens and spread them throughout the building e. Inadequate ventilation In , oil embargo led building designers to make buildings more airtight, with less outdoor air ventilation, in order to improve energy efficiency. This reduced ventilation rate was found to be inadequate to maintain the health and comfort of building occupants. Malfunctioning heating, ventilation and air-conditioning systems HVAC systems also increase the indoor air pollution. Electromagnetic radiation Gadgets like microwaves, televisions and computers emit electromagnetic radiation, which ionizes the air. Extensive wiring without proper grounding also creates high magnetic fields, which have been linked to cancer. Psychological factors Excessive work stress or dissatisfaction, poor interpersonal relationships and poor communication are often seen to be associated with SBS. Poor and inappropriate lighting with absence of sunlight, bad acoustics, poor ergonomics and humidity may also contribute to SBS. The symptoms of SBS are commonly seen in people with clerical jobs than in people with managerial jobs because professionals or

managers have better working conditions. The symptoms are more common in females than in males probably because more females are in secretarial jobs, they are more aware of their health or a lesser dose of pollutants is required to manifest the effects. The symptoms are more common in air-conditioned buildings than in naturally ventilated buildings and are more common in a public sector building than in a private sector building [Table 1].

Daily Save automatically saves your game at a set time every day, cycling between seven separate slots to ensure you have plenty of backups in case anything goes horribly awry. No Fade Sims and Objects This mod by Shimrod is a must-have for those who like to snap pictures of sims and their environments. By default, when your camera gets too close to something in The Sims 4 it will fade away smoothly. The downside of this mod is that the camera will clip through things instead. But it seems that the piece that gets the most use is the hot dog hat, and I could not be more sick of seeing it around. People in suits, dresses, all manner of outfits will stroll down the street, their heads encased in a rounded beige meat helmet. Teen Careers for All Ages Given that the newly released Sims 4 expansion adds several new jobs and ways to earn money to the game, it might seem strange to recommend this mod by Plastibox. Maybe they have a large household to manage, or maybe they just need to earn a little extra cash on the side until their art starts earning enough to support them. Roles like child care, food service and manual labor may be a perfect fit for some, regardless of age. This may be getting a bit too real, now that I think about it. Regardless, this mod is worth having installed if only to increase your available options. MoveObjects On Cheat Update: If you were a savvy builder or decorator in The Sims 3, then the MoveObjects On cheat was your very best friend. It allowed players to place things in-world closer than the game would otherwise allow, and it was most often used to make rooms feel less spread out and more cozy. Clutter in particular decorative objects used to make a space feel more lived in went hand in hand with MoveObjects On. However, beyond the cartoonish excess is a practical purpose. These windows take up one tile space each, and when positioned together will form large seamless panes. This mod alters a few different things, but the most important change it makes is allowing sims to use an otherwise broken toilet to avoid wetting themselves in public. Janine Hawkins is a games writer based in sunny Canada. You can find her written and video work on HealerArcherMage.

Chapter 3 : The sick building syndrome

This book explains "skinning" and "modding" and how to approach a career in either Web site design or computer game development with tips on defining objectives and setting goals. Bibliography note Includes bibliographical references (p.) and index.

Are you an employer of reserves? Is one of your employees thinking of joining the reserves? Find out how DRM can help you and your employer. Are you in the NHS? We are recruiting medics. Find out how you can use your skills as a reserve and progress your career at the same time on the NHS careers reservist website. The MOD is also recruiting for civilian doctors and nurses. Further details can be found at Civil Service Jobs website. Join the Civil Service At the Ministry of Defence we offer engaging jobs in work that really matters; jobs which have a direct impact on the quality of services we provide. Roles can offer great job satisfaction and there are many opportunities to develop and progress both within MOD and across the wider Civil Service. Certain posts, notably those concerned with security and intelligence, might be reserved for British citizens, but this will not normally prevent access to a wide range of developmental opportunities across a very wide number of professions. We employ people in so many different roles and in many locations across the UK and abroad. We have jobs in policy, finance, HR , IT commercial and project management and all the types of jobs you would expect to find in a government department. We also employ doctors, dentists, teachers, police, fire service, quantity surveyors, engineers to name a few. We have many opportunities to become an apprentice in the Ministry of Defence. So think of any type of job and you may find it in the MOD. We value diversity and are committed to being an equal opportunities employer. We aim to develop all our staff to enable them to make a full contribution to meeting MOD objectives, and to fulfil their own potential on merit. We offer flexible working patterns to enable our employees to balance home and work responsibilities; and we treat people fairly irrespective of their working arrangements. The Ministry of Defence is committed to attracting and retaining people from across the full range of backgrounds and enabling flexible ways of working as the norm. We offer maternity, adoption or shared parental leave of up to 26 weeks full pay followed by 13 weeks of statutory pay and a further 13 weeks unpaid, and paternity leave of 2 weeks full pay. For details of current vacancies and how to apply for civilian jobs in the Ministry of Defence, visit the Civil Service Jobs website. We also have employment opportunities in the wider Ministry of Defence such as in our Trading Funds and Executive Agencies. Join the Ministry of Defence Police Entry requirements: Find out about apprenticeships for civil servants and the armed forces. School leavers and Welbeck College School leavers Whether involved in combat, peacekeeping duties or the provision of humanitarian aid following natural disasters, the armed forces depend on the support and expertise provided by our civilian staff. We would like this to be you. The MOD offers many varied opportunities for school leavers throughout the UK where you can make a real difference to defence. The number of different careers are too many to list in full, but they include personal secretary, pay clerk, commercial officer, project and admin support, finance clerk, commodity manager, course administrator and recruitment and marketing, along with many others. All these roles are absolutely vital to our mission in defence, giving a unique vision and access to some of the most interesting work in government. Perhaps you could be a commercial officer buying vehicles for the army. Perhaps you could be a personal secretary to a senior civil servant who decides the latest defence policy. Perhaps you could be a commodity manager routeing supplies to a recent disaster area. Every single person in the organisation is given comprehensive training and development, including the opportunity to develop cross disciplines. As the MOD is so large it is entirely possible to change career direction, perhaps even study for professional qualifications, while retaining your status and similar conditions of employment, including your pension and leave allowance. Examples would be engineers moving into personnel or accountancy, and administrators becoming graphic designers or logicians. This is in addition to a number of management development schemes aimed at the full spectrum of the MOD workforce, designed to help you

fulfil your true potential. The Defence Sixth Form College Welbeck College in Leicestershire is an MOD sponsored sixth form college that invests in the future of young people who have a strong desire to take up a science or engineering based career in the armed forces or the Civil Service. Welbeck has provided the army with many of its future technical officers for over 50 years. The programme does not end after a 2 year A-level programme, the MOD continues to monitor and support students through university and on to professional training with their respective armed service or within the MOD Civil Service. Graduate recruitment programmes Fast Stream Our premiere development scheme for graduates is Fast Stream , although many graduates also enter through applying for vacancies on Civil Service Jobs. Defence commercial graduate programme The defence commercial graduate programme recruits graduates for MOD purchasing and contract management roles. Full details available in the Commercial Graduate brochure. Counter Terrorist Check CTC for people employed in posts with proximity to public figures, access to information or material assessed to be of value to terrorists or unescorted access to establishments assessed to be at risk from terrorist attack. A CTC does not allow a person access to or knowledge of protectively marked assets. Security Check SC for people employed in posts which have substantial access to secret assets or occasional controlled access to top secret assets. Developed Vetting DV is needed for people with substantial unsupervised access to top secret assets. A small number of clearances are granted where the risks are managed through follow up work and monitoring. We also process Aftercare for all MOD clearances that are granted normally. See United Kingdom Security Vetting: Diversity and inclusion The Ministry of Defence is committed to recruiting and retaining the best possible people from across the country, regardless of background, gender, ethnicity, working pattern, caring responsibilities, sexual orientation or, for Civil Servants, whether they are disabled. This is not only morally the right thing to do, but is fundamental to the operational effectiveness of defence. We are striving to be an employer of choice through recognising, encouraging and celebrating diversity, and ensuring everyone in defence plays their part in promoting an inclusive working environment and respecting and valuing the unique contribution of each individual. Our work to become a more diverse and inclusive organisation is being driven by the Defence Diversity and Inclusion Programme which was established in and covers both civilian and military employees. While recruitment is an important element of our work, the wider Defence Diversity and Inclusion Programme takes a much broader view of diversity and inclusion and is driving real change by embedding diversity and inclusion within our leadership and culture and taking steps to increase the retention and progression of people from under represented groups. This all encompassing approach to diversity and inclusion is essential if the department is to retain the high quality people that we recruit.
