The number of migrants from Guatemala and its Central American neighbors El Salvador and Honduras entering the United States has in fact grown in recent years. So far this year, more Guatemalan families and unaccompanied children have been apprehended at the US border than in all of Endemic corruption in Guatemala directly fuels the conditions that have forced tens of thousands of migrants to flee the country seeking safety and stability, often in the United States. With Guatemalan elites allegedly funneling government funds into their own pockets through fraud, bribery, money laundering, and irregular contracting of services, there has not been adequate investment in health care, education and other basic services. Public trust in the government has been decimated , while criminal networks and gangs have found boundless opportunities to expand and co-opt officials. Since the United Nations-backed International Commission Against Impunity in Guatemala known as the CICIG started work in , CICIG investigators and Guatemalan prosecutors have successfully brought down criminal networks involving the richest and most powerful entrenched elites in the country who for decades have fleeced the government coffers, allowing poverty and insecurity to grow. But powerful Guatemalan politicians and businessmen accused in the investigations have been repeatedly trying to undermine the CICIG and stop the investigations against them and their allies, including through recent overtures to Washington. Among them is Guatemalan President Jimmy Morales. Morales has denied any wrongdoing. But he may be having more success in his overtures to the United States. For years, Morales and his allies have been lobbying hard in Washington against the anti-corruption drive. Just days after the US embassy was relocated in mid-May, Guatemala became the first country in the world to follow suit. Morales is an evangelical Christian and he and his administration have said that the embassy move was a show of support for Israel. The two are in the midst of a trial where they stand accused of fraud. They both deny any wrongdoing. When it comes to US immigration policies that are ineffective at tackling root causes and harm Guatemalans, Morales has more often than not turned a blind eye. In the wake of the "zero tolerance" policy that led to the separation of babies and children from their parents, Morales stayed quiet for weeks, then said he " respected" the policy. Morales only condemned it after facing intense backlash from Guatemalans and in tweets from US Congresswoman Norma Torres.

It involved a number of CIA agents, and widespread local recruiting. The death of his son in an anti-government uprising in had turned him against the administration. Although his status as a civilian gave him an advantage over Castillo Armas, he was diagnosed with throat cancer in , taking him out of the reckoning. This band was called the "Army of Liberation". Prior to the invasion of Guatemala, the US signed military agreements with both of those countries, allowing it to move heavier arms freely. These preparations were only superficially covert: The invasion force was split into four teams, targeting the towns of Puerto Barrios , Zacapa , Esquipulas and Jutiapa. Ten trained saboteurs preceded the invasion, with the aim of blowing up railways and cutting telegraph lines. The force of men targeting Zacapa were intercepted and decisively beaten by a small garrison of 30 Guatemalan soldiers, with only 30 rebels escaping death or capture. In an effort to regain momentum, the rebels attempted to attack the capital with their planes. The CIA persuaded the governments that were friendly to it to screen video footage of Guatemala that supported the US version of events. In actuality, the broadcasts were concocted in Miami by Guatemalan exiles, flown to Central America, and broadcast through a mobile transmitter. The victory of a small garrison of 30 soldiers over the strong rebel force outside Zacapa strengthened his belief. As it was, they believed that the US would intervene militarily, leading to a battle they could not win. They signed a pact, known as the Pacto de Las Tunas, three days later, which placed the army at Zacapa under Castillo Armas in return for a general amnesty. The deal was announced at 4: The coup was put down, leaving 29 dead and 91 wounded. He had never articulated any particular philosophy, which had worried his CIA contacts. He quickly arrested many thousands of opposition leaders, branding them communists. Many were imprisoned, executed, or "disappeared", frequently without trial. The Guatemalan Communist Party began to recover underground, and became prominent in the opposition. Some of the most severe violence was directed at workers on the plantations of the United Fruit Company. However, the repressive atmosphere at the time in which the decrees were passed meant that very few peasants could take advantage of them. Despite examining many hundreds of thousands of documents, this operation failed to find any evidence that the Soviet Union was controlling communists within Guatemala. The regime was thus facing difficulties borrowing money, leading to capital flight. The government also received criticism for the presence of black markets and other signs of approaching bankruptcy. The imported corn, upon inspection by the United Nations , turned out to be unfit for consumption. When a student newspaper exposed the story, Castillo Armas launched a police crackdown against those criticizing him. If these figures are included, , of , manzanas were returned by the Castillo Armas government.

Due to his weak constitution, he was often sickly. Carlos called out to them, [6] volunteering as a spy to help retrieve the glass. With the blade swiped at his face, Carlos passed out. Though disturbed by what he had to serve her, Carlos continued his duties whilst slowly learning how to cook. When not working, Carlos spent his time at the local pub at the foot of the mountain. After she tugged on his sleeve and implored him not to go, he gave into the temptation and spent the night with her; the next morning he awoke before Banica and headed to the kitchen, making breakfast in the company of Arte and Pollo. Several months later, Carlos became concerned to see the Beelzenian army surround the mansion. At that moment, Pollo appeared covered in blood and laughing, a corpse soldier laying before him. Shocked by the sight, Banica reassured her lover and then undead soldiers emerged from the estate grounds. As he watched in horror, he saw the Beelzenian army torn apart by the white horde, with Arte and Pollo also participating. As he tried to question Banica, he was ignored and she jumped from the mansion, slowly descending into the courtyard far below. Terrified of what she had become, Carlos attempted to escape and fled into the neighboring town, only to be slowed by the undead soldiers rampaging across the territory. Caught by Arte and Pollo, the prince was dragged back to the mansion and Banica demanded to know his reasons for fleeing. Realizing his predicament, Carlos lied and asked if he could take a vacation. After a long silence, the insulted Banica decided to keep him in her employ and not punish him, though forbidding the cook from leaving the estate. The next day, the prince served it to his beloved before consuming it himself. Shortly afterwards, he coughed up blood, seeing his beloved still alive and his murder a failure. Not long after, he died of the poison. Finding everything in perfect order, the Empire concluded Joseph and the rest of the staff fled with Banica to a neighboring country and ended the investigation. As such, he acted coldhearted towards others; this included the portly Banica Conchita before he warmed up to their arranged marriage, as well as Arte and Pollo, albeit he looked down on the two in part because of their astounding rudeness and strange natures. Blaming himself for losing her when they were children, and later resenting that he had tried to run away from her again as her cook, Carlos believed that he was a failure for being unable to save Banica from making a demon contract. Due to this, and his own love for her, he appeared unafraid to even kill himself along with her to correct his past mistakes. However, he was also very resourceful and experimented with magical power of the Golden Key to discover how to cure him of his ailments and also refine an even more deadly and effective poison. Although initially resentful of being arranged to be wed to the fat Banica, Carlos quickly connected to her on the basis of her overcoming her tragic childhood, continuing to care about her even after the engagement was broken off. He later came to love Banica during their time together, fathering a child with her. Despite this, he grew terrified of the monster she had become and wished to put an end to their sordid affair by taking her life and his own. A mage whom Carlos encounters.
