With this enlightening book, readers can conquer the most common obstacles to satisfying love--the twin fears of aloneness and closeness.*

University of Georgia Press, In the first place, we all write lines that are no more than the accepted conventions of social intercourse: Aware of these possibilities, the poet or novelist often will write cautiously, even slyly to his friends and associates, ever mindful of the place a particular phrase or sentiment might occupy in his Collected Letters as edited by some obtuse scholar of the future. The Literary Correspondence of Donald Davidson and Allen Tate, however, contains few examples if any of a finical awareness of the larger audience. Indeed, anyone who has known these men only casually will be surprised at the open-hearted and warm affection which the two expressed to each other through the precarious medium of the U. Post Office; for both seemed to be models of brittle reserve, two old-fashioned Southerners whose courteous aloofness is mirrored in their poetry, where they often hide behind irony or the mask of a persona. These letters, then, provide us with a remarkably intimate exchange of ideas, moods, and affections; and true intimacy is a rare quality, even among friends, an art to be cultivated: Thus this volume is particularly valuable because it admits the reader into the privacy of a friendship which survived almost a half century of separation, controversy, and disagreement; and these lettersâ€™’admirably edited by John Tyree Fain and Thomas Daniel Youngâ€™’stand as a vital testament to the continuing possibility of a communion in words. As each man probes his own mind and sensibility to respond to the other, the dynamic of their emerging social and esthetic theories provides for us a fascinating spectacle of conservative diversity which is all the more engaging because their dialogue is conducted within the context of events important to literary and social history: To be sure, the book will provide a few surprises for those readers unfamiliar with the inner workings of the Fugitive or Agrarian groups. But insiders have known the complexity of these relationships for a good many years. In this respect the letters assume some importance as convenient source materials, but to emphasize their instrumental value is to miss the true measure of their worth. Together they form a complicated and intriguing portrayal of the conservative creative imagination in conflict with itself and with the other-than-self, the antithetical artist who challenges and provokes but neither possesses nor destroys. Whatever their affection for each other, Tate and Davidson best define themselves in thrashing out their differences; their considerable area of agreementâ€™’the common ground on which they stand to do battleâ€™’is always assumed, even when the blows rain hard and thick. The book is best understood, then, as a drama, more akin to the transcript of a socially significant court trial than to the dialogues of Plato. From the beginning, Tate, the younger of the two assumes with ease the role of tutor, with Davidson as his somewhat diffident pupil. He ends by accusing Davidson of writing many of the lines too hurriedly and urges him to undertake major revisions. Tate, the confirmed modernist, takes the position that twentieth-century man is caught in the trap of history and that it is futile to pretend otherwise. If Tate, the Roman Catholic convert, is later to see Dante as his master, Davidson continues to the end as a consciously modern counterpart of the Beowulf poet, urging whatever Wiglaf’s yet remain to come out and fight the dragon. Lewis Simpson, in a brilliant and definitive introduction to the volume, analyzes the larger ramifications of these respective positions. Surely Simpson is right in his analysis. But who is right in the argument between Davidson and Tate? Twenty years ago the answer would have been obvious to almost everyone: But today the answer is not so simple. Many recent poetsâ€™’for better or for worseâ€™’have not only been openly polemical in their verse but have themselves joined activist movements in order to further their social ideas. And ever since Ginsberg howled, more and more poetry has been composed for oral performance, much of it by spokesmen for the Left. But even the more traditional voices have adopted an open and direct address to their audience, a tone which is more affirmative, less guarded and ironic. And as for the South and the Agrarian symposium, the region is still predominately rural, as anyone who flies over it can attest; and the great urban centers of the East have begun to disintegrate for precisely the reasons the Agrarians predicted. More Americans are moving out to the country and planting gardens. Wheat surpluses have disappeared. A

year or so ago cotton brought seventy cents a pound. And an increasing number of young people, disenchanted by the values of industrialism, are talking enthusiastically, if naively about the virtues of getting back to nature. Surprisingly, then, in the issues that divided Tate and Davidson are still in doubt. Indeed they may be in doubt for generations to come. But never will they be more richly or humanly dramatized than in this intimate exchange between two articulate and affectionate friends, and for this reason the volume should be read and cherished. Thomas Landess " was at the time of writing professor of English at the University of Dallas.
