

This blog is about guides, tips and tricks about the most amazing game on smartphone and tablet, namely Clash of Clans.

Only 19th on the list of top free Android apps on Google Play, Clash of Clans still leads the list of top-grossing Android apps. A simple video game in principle, learning to play Clash of Clans is often difficult for beginners. Starting players need to learn the basics of raising an army, before leading their clan to victory against rivals, and becoming a champion. This Clash of Clans beginners game guide gives new players the basics they need to enter battle with an advantage over other new competitors. It will also help you surprise veteran players assuming another easy victory over a beginner. Concepts the first time player needs to build on to become a feared competitor in Clash of Clans "Champions League" and legend of the game. Spend no money to play Clash of Clans at first. You can always buy gems, once you decide this is the video game you love-to-play. Starting Clash of Clans - day one When you first start playing Clash of Clans they offer a tutorial to help introduce you to aspects of the video game. Wait for construction to finish on its own and the base to accumulate resources. This protection is a Shield. The length of time a Shield is effective depends on the amount of damage done during the raid and the buildings attacked. Spend this time building up defenses and resource buildings. Upgrade Elixir Collectors and Gold mines as soon as possible and then storage facilities for both resources. Now, upgrade your Town Hall for defense. After this, construct as many as possible to maximize storage capacity. We will talk about more advanced defensive strategies you can use to dominate top players in future Clash of Clans articles. The third day Follow the steps below. Next, build up base defenses. Put walls around the Town Hall and resource storage facilities. Locate the Town Hall and storage facilities near the center of your base. This will allow you to surround these buildings with less important structures to slow attacks. Also, upgrade walls to at least level two. Layer defenses by surrounding buildings, and then larger groups of buildings with walls, with traps at locations you think the enemy will attack. Buy a mortar and put it near the center of your base behind walls. Make sure it covers all important buildings and areas of the compound. Next, build Archer Towers and Cannons, and find them in range of important structures. Archer Towers are best on the perimeter of a base due to their good range. Keep upgrading defenses until you reach the highest level possible. Clash of Clans War Strategy Once the first three days are over and the defenses of your main encampment setup, you can begin thinking about conducting offensive operations. You need to develop a Clash of Clans war strategy. You also need to find elixir and gold and earn trophies on the battlefield to continue the fight and win. Gold and elixir are used to upgrade the buildings and other facilities required to win in Clash of Clans. Trophies are the measurement system used to decide who is the best. Building Your First Clash of Clans Army At this point, we suggest the beginning player build a simple army, which will be easier to control. Barbarians are a good choice for a first Clash of Clans army. This force will destroy a base without a good defensive setup. They swarm the enemy and overwhelm the defenses. Once you build your barbarian army you need to find the right base to attack. Once you send the first army to raid the enemy, begin training troops in the barracks. Take your time selecting the first base to raid. During the first part of Clash of Clans many gamers will start and then leave the game. This gives you time to find a badly defended base to raid for your first attack that you can 3-star for trophies. Generally, players with under trophies can worry less about being attacked. Once you gain enough, attacks become more frequent. A larger number of trophies also means a tougher opponent is selected during the matchmaking process. Look for a base with badly placed walls or an exposed Town Hall or mortar to attack. Also, try to find a base with good resources and trophies you can exploit to continue the momentum you build. Winning the first raid decisively will put you on the leaderboard and give you confidence to win. Below we outline a simple starting strategy using barbarians to defeat the enemy base. Get rid of the enemy mortar as soon as possible. Find this blind spot, take out the mortar, and your barbarians can take out the rest of the defenders. Each unit also has one unit it prefers to attack, but often it will attack the nearest enemy. You are ready to rock! Use the Clash of Clans beginners guide we outline to learn the basics required to compete and win. Using the information offered you

can lay the foundation towards being a member of the "Champions League.

Chapter 2 : 77 Best Clash of Clans Strategy Guides

The only working way to get gems without buying them in all countries. Builder Base Guides. The Builder Base is the latest big new feature that was released for Clash of Clans, adding a secondary base for every one of us where we can do Versus Battles.

Wall Guide Clash of Clans Walls can be used to build barriers around your resources and defensive structures. Enemy ground units must destroy walls before they can get to whatever is inside. Walls start out with very little HP, but a significant amount of health with each upgrade. As upgrades increase, Walls become very difficult for enemy units to break through. Be careful with your wall placement. Enemy units can be dropped just two empty spaces away from any structure. As a result, if you make a big square wall but leave open space in the center of that wall, the enemy can drop units in that open space. Additionally, try to avoid 4-way intersections with your wall placement. This style of wall-in allows an enemy unit to break down just the midpoint in the intersection and access each area within the wall. Ideally, you want your opponent to have to break through multiple walls in order to reach your resource storage points. You also want your enemy to have to break through multiple walls in order to reach all of your defensive towers. This ensures that your Towers have enough time to defeat Full article: Clan Castle Guide The Clan Castle is the most powerful defensive structure in Clash of Clans, although it is frequently terribly misused by new players. Units will not leave the Clan Castle until enemy units come within its range. Most new players make the mistake of sticking the Clan Castle on the outside of their walls and not considering the Clan Castle a defensive structure. The enemy can just drop 30 Archers on top of the Clan Castle and take out all of your units stored inside. Instead, the Clan Castle does best when placed at the heart of your base. This way, the enemy will be within range of your defensive structures by the time your units come out of the Clan Castle. The enemy will then have to deal with your Clan Castle units in addition to your towers. Centralizing your Clan Castle becomes particularly important at Town Hall 7. Before Town Hall 7, you do not have enough structures to prevent enemy players from drawing out your Clan Castle units. It fires quickly with moderate range and can only hit ground units. The Cannon scales very well with upgrades and has many levels; it starts out very weak and becomes very strong by its highest level. Cannons are good all-around defensive structures. Fully upgraded Cannons shine versus small numbers of units but easily get overwhelmed by large forces. The Cannon should be placed towards the outside of the base; it has no minimum range and is not a crucial structure so it does best towards the outside of your defensive set up. Archer Tower Full article: Archer Tower Guide Much like the Cannon, that deals single-target damage. The Archer Tower does not deal quite as much DPS as the cannon, but has a longer range and can hit both air and ground units. Archer Towers, much like Cannons, are good all around structures that perform well against a handful of units but get overwhelmed by larger numbers. Archer Towers do well spread out around the perimeter of a base given their long range and all-around strength. It is ideal to pair Archer Towers with Cannons so that Cannons cannot be sniped by enemy air units. Mortar Guide Mortars are the first source of splash damage in Clash of Clans. The very slow but high-damage round that a Mortar fires out will explode upon impact, dealing damage to all units caught within its blast. Upgrading your Mortar is extremely important as this allows it to one-shot enemy Archers. A Mortar will one-shot Archers of the same level or less. For example, a level 4 Mortar will kill enemy 4-star Archers in one hit. A Mortar that is able to kill a group of Archers in a single hit significantly reduces the effectiveness of mass Archer armies. Mortars have long maximum range, but cannot hit any enemies that get too close i. Due to their minimum range and their relative importance, Mortars should be placed towards the interior of a base so that they have some protection against enemy units. Ideally, an enemy will have to break down at least two walls to reach a mortar. It is also helpful to pair an Air Defense tower with the Mortar to protect it from enemy air units. Aideal light damage with each attack. The X-Bow has two modes; one is a very-long range ground-only attack while the other can hit both ground and air units but has a shorter range â€” there is no difference in damage between modes. Due to its long range, the X-Bow does well when placed towards the center of the base. This allows it to cover a large portion of the base, allowing it to protect you from any side from which

the enemy may make an attack. The range of the X-Bow is its real strength. With the X-Bow, ring-shaped base layouts become viable, as the X-Bows are able to cover large areas to mow down enemy units that target defensive structures Hog Riders, Giants, and even Golems that may be being sent in a ring-shaped pattern.

Inferno Tower Full article: It is powered off of Dark Elixir and will only attack when loaded with Dark Elixir. This prevents units like Healers or from Healing Spells for keeping units alive while attacking an Inferno Tower. The Inferno Tower has two modes: The multi-attack feature allows the Inferno Tower to deal modest damage to up to five enemy units within range, whereas the single attack feature allows the Inferno Tower to deal extreme damage to an enemy unit, but only after targeting it for five seconds. The multi-attack feature works best against most units, but the single attack feature is very effective against high health units like Dragons or Golems. Most players seem to prefer the 5 target setting, as the healing debuff is perhaps the real strength of the Inferno Tower rather than its damage alone. Some may put both towers near each other with one set to each mode so that the towers can protect one another from attacks. The Inferno Tower generally should be placed in the center of your base. This not only ensures that the Inferno Tower is one of the last defensive structures to be destroyed, but it also ensures that the tower does not fire against weak attacks as it has to be reloaded with Dark Elixir to function.

Air Defense Guide Air Defense towers are the only tower in the game that can only hit air units. While Air Defense towers can only hit air units, they have by far the highest single-target DPS of any defensive structure in the game. The Air Defense tower also has a very long range. As a result, no air unit can survive for long when within range of an Air Defense tower. The Air Defense tower is crucial for defense against both Healers and Dragons. You will want to spread these out and keep them towards the interior of your base in order to simultaneously protect the Air Defense towers while allowing them to defend most of your base. Unlike many other structures, Air Defense Towers do significant damage even at rank 1. You never want to upgrade more than one Air Defense Tower at once or you leave yourself very susceptible to enemy attacks that are supported by Healers.

Wizard Tower Full article: It can hit both ground and air units. It has a short range but no minimum range, making it like the opposite of the Mortar. The Mortar fires slowly and hits enemies far away, while the Wizard Tower fires quickly and hits nearby enemies. The Wizard Tower does best when placed towards the interior of the base but not in the complete center of the base. It especially shines when near resource storage buildings, as the Wizard Tower is particularly strong against clumps of Goblins that may come rushing in to steal your loot. The Wizard Tower is by far the best counter in the game to mass Goblins. Goblins will outrun Mortars but cannot outrun the Wizard Tower.

Hidden Tesla Full article: Once activated, it fires a very fast attack that can hit either ground and air units at a moderate range. When upgraded, it does very high single-target DPS, but upgrading it takes an unusually long amount of time. Upgrading a Hidden Tesla up to its max level takes nearly 2 months! It fires a very fast attack that deals light damage with each attack.

Chapter 3 : Clash of Clans Beginners Game Guide | Clash of Clans

Though Clash of Clans came out in on Android, it is still one of the top trending mobile games and for good reason. Clash of Clans is a fantasy strategy game where the player must build their.

Updated Jul 6, at 5: Clash of Clans is a fantasy strategy game where the player must build their own town and fight off other players. The latter is important for obtaining resources to build a better defense and town, so there are plenty of times where the player has to seek out a battle. The resources players must acquire are gold, elixir, and dark elixir. Gold and elixir are used to build defenses and reload them. Defense is crucial to protecting your town against other players. Elixir and dark elixir, are for training and upgrading troops and any spells you might need during battle. Doing this allows players to attack other large clans and share the resources. If you are not keen on playing online, Clash of Clans does have a single player mode. Instead of attacking other players, you can attack random goblin villages. One is the official forum the developers, Supercell. This forum provides a variety of venues for your gaming needs. For example, there are quite a few threads in General that discuss the basics of Clash of Clans, like tactics, strategy, and even a place to share ideas and improvements to the game. As the forum is run by the development team, your suggestions are sure to be seen and heard. The official forum is also a good place to find and join big clans. In fact, Clan Talk contains a very thorough and extensive guide to building and running your own clan successfully. The latter is a prominent problem in the game, but it is important to stick it out until you reach an appropriate level. Another forum you can go to is the Clash of Clans Reddit community. Reddit is not quite a traditional forum, but it is the place to be if you are looking for a huge variety of game guides. In particular, guides to do with clan management and farming. Clash of Clans Accounts For Sale If you would like to completely circumvent the problem of being too low level to join a clan, you can always buy your way to the top. Other less reputable hosts are Kijiji and eBay. Kijiji might be a great place to get cheap furniture, but a far less likely place to buy legitimate digital information. There are no systems in place to get your money if you find yourself with a bogus account. That said, Account Warehouse does have a system in place. As such, the cost is already covered by their Lifetime Warranty and there is a return policy just in case. G2G does not always have a guarantee, especially if the transaction is made outside of G2G. However, you can always check if the listing has G2G seller insurance, which indicates a money-back guarantee if the account is not to your liking. Player Auctions has even more buyer protections, called Player Guardian. Like G2G, there is a money-back guarantee, payment security, and more. Feel free to take a look at their policies before you make a purchase. According to Clash Track , war weight is what Supercell uses to match you with someone of a similar level. As such, the lower your war weight, the easier your opponent will be. There are very few accurate war weight calculators out there, the simplest of them being from 3 Star Clashing. The latter asks you to input detailed information about your clan, up to and including your defenses, troops, and spells. Other sources state that it is not so simple, claiming that every item in your inventory lends to the overall war weight as well, including gold, heroes, walls, and towers. Each item has a different weight, as can be seen on the All Clash website. If you want the most in-depth and complex Clash of Clans war weight calculator, Clash Kings 2 was kind enough to create one. It comes with a complete guide on how to use it as well, so be sure to check it out before using the calculator. The radius is small, but it will prevent the selected defenses from moving or attacking. To use the Freeze Spell wisely, timing and location are the keys to success. For example, the Hidden Tesla cannot be frozen unless it is revealed while the Freeze Spell is active and it is within the radius of the spell. If you would like more detail on the limitations of the Freeze Spell, you can find them at All Clash. Is Clash of Clans Dead? Fortunately, the answer is easy: The notion that Clash of Clans is dead came from those players that happened upon a few abandoned bases as they played. As this grew to more than one or two, some players grew concerned. The concern escalated when it became increasingly difficult for low level players to find large clans that were still heavily active. In order to put such fears at rest, two vital things must be understood. First, the Town Hall 8 update provoked quite the drop in active player count. The update brought unwelcome changes that forced a lot of people to stop playing altogether. However, most Clash of Clan players weathered

the storm and were rewarded for their efforts. Second, it must be understood that mobile games, just like their counterparts on console and PC, eventually lose their active player count. In the case of the latter, the folks that initially played the game will get bored and move onto games that suit them better. You can see this happen with still popular games like Overwatch casual players have decreased drastically since the release of Grand Theft Auto V time has left only the true fans of online play.

Chapter 4 : “Clash of Clans,”™ Other Mobile Games Being Used for Money Laundering “ Variety

The Battle Machine is the primary Hero in your Builder Base and unlocks at Builder Corridor Stage 5. You need to use it for a number of components in your assaults, relying on your technique.

Before the release of that Clash of Clans December Update , all chiefs very having such a hard time boosting and upgrading heroes, building, spell. We will discuss all the aspects of these magic items so stay tuned to us. As the name explains itself that these items will help to do magical things. There are actually five types of magical books so far introduced in the clash of clans. Book of Fighting Book of fighting is the book which is filled with efficient training programs. And the official news is that it will work on builder base village and townhall troops. According to rumours of the clash of clans that the author of this book is Master Builder but it works in both villages. Book of Spells If you are trying to upgrade your any spell instantly than this spell will work for you. This magical book is written by an unknown wizard. So it will help you to instantly upgrade your spell. And as you know that spells are only available in the home village so it will only work there not builder base. Because it will help you to upgrade your hero level instantly at any time you want. And it will work on both of the villages. Book of Everything This magical book is one the best one according to me because it will work on anything that you want. It will also work on both villages. It will also work on boosting spells and resources to generate maximum elixir and gold for you. But it depends on the type of magical potion. Here are the following magical potion. And it will also work on both villages. Resource Potion This spell is the upgraded form of haste spell into a potion. And it will work on both villages. While if you want to get magical items like books and potion for yourself you have cash the clan games. As do know that clash of clans has recently updated it game and added a new event which named as clan games. In that event, you have to complete tasks which you earn some points after complete these challenges. If all of your clanmates of coc has complete their challenges you would have a lot point so you will be able to claim gold, elixir, dark elixir, gems potions or magical books as rewards. In each of the level, you would have to choose one thing from all of the things has been declared like gold potion or dark. To get All Clash of Clans Updates you should follow us There would be normally 4 tiers and in each tier you have provided 3 items in which you will select which of the thing you need for your self but only one. In order to unlock each of tier your each clan mate has to complete the challenges and must earn points. Which means if your 20 clanmates will complete points each you will earn a total of 10, points which the highest level. In each of the tier, you would have 3 option of rewards to select. Here some all points distribution according to the levels. Tier 1 Points.

Chapter 5 : Clash of Clans Guide: Forum, Weight Calculator, & More | calendrierdelascience.com

No Doubt this new Magical Items in Clash of Clans Update is one of exciting thing so far introduced in the calendrierdelascience.com the release of that Clash of Clans December Update , all chiefs very having such a hard time boosting and upgrading heroes, building, spell.

February 17, During my initial days in this game, I have been to some clans which lack certain rules and regulations. Members attacking whoever they please, it may be attacking the top player for Loot or the lowest player for easy Stars. It was difficult back then to track each and every member of a clan, But time has changed. In this article, we will go through certain BOTs which are or must be used in a competitive clan. Discord Discord is a proprietary freeware VoIP application designed for gaming communities. As of December , there were about 87 million unique users of the software. To use Discord you have to simply create a server for your clan and ask your clan members to join. Reasons to use as an individual: Looks cool and is easy on the eyes. Not by bots like in-game. Because sometimes it gets pretty annoying. Organized and thematic rooms: On the other hand, there can be specific spam rooms so you can choose either or not you want to want to pay respects to Harambe every 5 minutes. From universal mutes to community mutes, to channel mutes, the ability to choose only what you want to read about is incredible and intuitive. Easy to join communities: Also interested in PokemonGo? Reasons to use as a group: Group sizes are unlimited: Other apps have you petition to increase the group size from Some Discord servers have 7, people in them. Private rooms within communities: Have 4 clans in your system? Give them all a separate room so they can have private conversations and still keep everyone together with a global room. Looking for a new way to look for a new clan? There is a specific channel for recruiting! Only have 5 minutes to explain something that would take 20 minutes of typed explanation? Hop on a voice channel and express yourself! When you download clan members data, you know get full player data for each member! Including TH level, troops, spells, heroes, achievements and more! Player Clans history, see a Player main Clan at a glance! Check out who gave the most troops in your Clan over the last week, who won the most trophies, and more! You can also see the weekly Clan history of over 3 million Clans not including members , dating back April Clash Of Stats can also be used within discord by adding its discord Bot. But this is just one of the numerous features of this bot. If you want to be a top war clan, you need great attackers and great defenders. With WarMatch , you can see exactly how a member is contributing to the war on both offence and defence. Clan member stats are based on last 10 wars in some cases last 20 attacks. Us will also track participation in a war so you can manage your clan effectively. Lead your clan to victory when you can: Reserve targets, and see at a glance what targets are available! Leave messages for each enemy base! View stats on your war, and figure out what needs to be improved! Get feedback on your own attacks, and give feedback on others! See how your clan has done over time! Compare it to other clans! Get all those gold stars! Share with your friends on your social profiles. Comment below to let us know if you have something to say and also if you think it was helpful.
