Request Report Methodology Coal Market: Overview Coal has played a crucial role in industrialization since time immemorial. It has been the key factor in shaping economies across the globe and determining the pace of development for several nations. The monumental amount of coal consumed by the world is used in a wide range of applications such as the production of steel, iron, power, and several manufacturing and transportation industries. The demand for coal is presently caught in the crossfire of growing pollution levels and the increasing attractiveness of the renewable sources of energy. The research report on the global coal market includes a fair assessment of the overall market and the key market dynamics. The report includes a SWOT analysis to determine the strengths, weaknesses, opportunities, and threats influencing the segments of the coal market. The comprehensive document includes evaluation of all the key factors that are poised to shape the trajectory of the global coal market in the coming years. **Trends and Opportunities** Though the debate over usage of coal is a heated one, it is still an important raw material for the production of energy. Analysts state that this percentage will continue to rise in the coming years as well. Besides electricity, coal is also extensively used in the industrial sector. Thus, the uptake of coal in the coming years is expected to remain steady. The research report observes that the coal supplies are spread over innumerable areas across the globe. This has eliminated the issue of dependency on a specific region. Furthermore, it has also opened up opportunities for several nations in the international markets. The growing demand for electricity from several developing countries and the fast pace of industrialization in these nations are the key growth drivers for the global coal market. The exponential rise in the global population is expected to create several lucrative opportunities for the overall market in the coming years. **Region-wise Outlook** According to the report, the coal market is witnessing an increase in the production as Asia Pacific is showing an active participation. However, the majority of coal produced by these countries is used by the nations themselves, while marginal quantities of coal traded in the international markets. Several countries in Asia Pacific such as Korea, China, and Japan lack energy resources and are thus importing natural energy resources to meet their needs. Australia is known to be the leading exporter of coal across the globe. The country exports about mt of hard coal from its entire production every year. Thus, is an important commodity in Australia. Analysts predict that China, the U. **Key Players Mentioned in the Report are:** Some of the important players identified in the global coal market are Anglo Pacific Group plc. **Market Segmentation of the Global Coal Market is as follows:** Major geographies analyzed under this research report are:
