Just horrible presentation, or lack thereof. Punctuation is a massive issue, rendering some passages totally meaningless. Way too much sloppiness as well. Like using the name Philipp on one page and then Phillip the next and again writing Kenzie then Kenize. Here and there whole paragraphs were repeated. Just a bloody mess altogether. What was absolutely staggering in the cases of parents killing kids was that clearly most of them were properly mental, on drugs or just retarded and yet just carried on having kids over and over, despite social services being involved in many of the investigations!! Many killers were parents from very religious families as were the kids who killed in that particular volume. If ever there were laws needed to call for potential parents to be assessed whether fit for purpose, they feature in these books!! It makes for some pretty depressing reading. Shockingly, and this could only be in America You get moms, dads, parents and kids who kill. Then you get two books about cyberbullying, bullying and suicide. This topic is perhaps the most cruel of all. The author has pulled a lot of information together here, and not in a sensationalistic way. If I had proofread this book, I would have corrected 92 errors in addition to many punctuation errors, including major misuse of the semicolon. Everything can be found on Wikipedia! If you want to know more on any of the killers etc Google it. You will probably get more information am more concise information!! May 23, Amanda craig rated it it was amazing Great read Great read especially if you like true crime some of them could have been told in more detail overall it was Interesting.
