Chapter 1 : The U.S. Army Invented Five Fake Countries | War Is Boring

Decisive Action Training Environment DATE_ 2/2/ AM: Ed Waters: Decisive Action Training Environment with Errata.

But realism has its downside. Thus, the American ground-combat branch invents fictional countries as stand-ins for very real potential enemies. As of April , the Army had constructed five different made-up states â€" complete with elaborate back-stories â€" for its soldiers to defend, invade, occupy and rebuild during high-intensity war games at U. The fictional countries of Ariana, Atropia, Donovia, Gorgas and Limaria are clustered in a fictional Caucasian landscape that stretches between the real-world borders of Russia and Iran. Reading in many instances like the rule book for a tabletop war game that you might play at home, the manual gives Army officials the tools to build almost any imaginable kind of pretend conflict. Each country has detailed political structures, economic considerations, troop types, military equipment and other features that would impact how American soldiers might operate in it during a shooting war. A central story-line links their narratives together in a common, imaginary world. The fictional DATE region. However, with the fall of the Soviet Union in , monolithic communism no longer reflected threats that the Army believed it was likely to face. Peacekeeping missions in places such as Somalia, Bosnia and Kosovo underscored that change. At top and above â€" U. Ariana â€" clearly filling in for Iran â€" is a theocracy ruled by a clerical caste. Much to the dismay of Turkish authorities, Armenians understandably and regularly petition foreign governments and organizations to recognize the genocide that occurred between and , when suspicious Turkish authorities orchestrated the deaths of up to two million Armenians. To this day, Ankara disputes this number and refuses to describe the events as systematic genocide. Back in the real world, since the Armenians and Azeris have fought a prolonged but sporadic skirmish over the disputed region of Nagorno-Karabakh. Army Strykers take up positions in Atropia in Most notably, in popular protests forced out Pres. After agreeing to step down and call snap elections, Georgians elected Saakashvili again in Current president Giorgi Margvelashvili, a politician not affiliated with any particular party, won the election four years later, riding a wave of popular discontent with the allegedly corrupt Saakashvili. In the real world, local and international media and humanitarian groups regularly describe Chechen leader Ramzan Kadyrov as a gangster. Often photographed with pet tigers and other excesses, Kadyrov lives a lavish lifestyle in an otherwise impoverished region. Under the cover of fighting Islamist terrorists, he reportedly suppresses dissent and commits human-rights abuses. After the shooting stopped, Moscow recognized both zones as independent nations. Still, by and large the information in the DATE outlines a very real set of potential hotspots. These range from humanitarian disasters and outbreaks of disease to terrorism and other internal crises and even all-out war. The Army even included instances where American forces in the region might themselves spark an international incident. In , Afghan protesters demonstrated outside Bagram Air Base after reports that American troops had burned copies of the Islamic holy book. The nonprofit Website Public Intelligence published a copy of this particular booklet.
