

Chapter 1 : Diana, Our Mother: Her Life And Legacy: 10 Times Princess Diana Melted Our Hearts As A Mo

Diana, Our Mother features interviews with HRH The Duke of Cambridge and HRH Prince Harry, both of whom talk openly about their mother and pay tribute to the many ways her influence has shaped their lives.

A post shared by Kensington Palace kensingtonroyal on Apr 4, at They have supported soldiers struggling with post-traumatic stress, highlighted the fears of parents and children battling with depression, and much more. Diana had a difficult childhood, with her parents splitting in a painful and public divorce while she was still quite young. She was, at times, estranged from both of her parents and stepparents, and many of her close friends have noted that she was eager to find love and start a family of her own. In , Diana contributed to a tell-all book by journalist Andrew Morton that cast Charles in a very negative light and said that his outside dalliances in their marriage led her to several suicide attempts and even to an eating disorder. When the future Princess of Wales stepped out to announce her engagement in , she received criticism for her slightly stuffy, aged choice of a belted blue suit. She shied away from neutrals, opting instead for bright, cheery colors on official royal visits and later owning her sex appeal in several little black dresses. Princess Diana and Kate Middleton wear similar cherry red suit. The mother of two first wowed the world at the royal wedding in April , stepped out in a breathtaking long-sleeved Sarah Burton for Alexander McQueen gown that has gone on to be imitated countless times. Kate has paid tribute to Diana in more ways than by simply wearing her sapphire engagement ring. She seemingly brushed aside the reverence surrounding their titles and positions and just treated them like children. Diana took her sons to Disney World, skiing, on yachts, and around the globe. Her True Story, those walls were broken down. Diana secretly shared her not-so-perfect tale in private tapes to Morton, and the result went on to become a hugely successful book. When the world tried to delegitimize the story, Diana organized a photo op of herself hugging a close friend who had contributed to the book, thus verifying the account. The book lifted the veil of positivity that often surrounded the royal family. The press no longer believed exactly what the palace said. And the race was on for the next scoop. Most noteworthy, Diana claimed that Prince Charles was not up for the job of king, saying it would bring her then-estranged husband tremendous stress. Directly following the interview, Queen Elizabeth recommended that Charles and Diana officially divorce -- a shocking decision from a particularly religious monarch who had historically frowned on divorce within her family throughout her reign. Diana was stripped of her titles and of her protection, leaving the most photographed woman in the world open to the paparazzi and the public. All of this -- though seemingly a cold move -- was due to royal traditions and norms. But with the increasing pressure from the public, Queen Elizabeth was forced to break those traditions and to publicly honor Diana.
