

**Chapter 1 : Economic Survey Download Free PDF of Economic Survey 2018**

*Economic Survey " In the last few years, under this government, the Economic Survey has become a must-read and the most read document on the Indian economy. It has also become a key pedagogical source on the Indian economy as universities all over India have included it in their syllabuses, leading to this popular online course done.*

The survey tabled in Parliament by the Finance Minister, Mr. Arun Jaitley predicts The average GDP growth rate from till is expected to be 7. The survey points out that India can be rated as among the best performing economies in the world as the average growth during last three years is around 4 percentage points higher than global growth and nearly 3 percentage points higher than that of Emerging Market and Developing Economies. That this growth has been achieved in a milieu of lower inflation, improved current account balance and notable reduction in the fiscal deficit to GDP ratio makes it all the more creditable. The survey underlines that due to the launch of transformational Goods and Services Tax GST reform on July 1, , resolution of the long-festering Twin Balance Sheet TBS problem by sending the major stressed companies for resolution under the new Indian Bankruptcy Code, implementing a major recapitalization package to strengthen the public sector banks, further liberalization of FDI and the export uplift from the global recovery, the economy began to accelerate in the second half of the year and can clock 6. The survey points out that as per the quarterly estimates there was a reversal of the declining trend of GDP growth in the second quarter of , led by the industry sector. Sectoral Growth Agriculture and allied sectors " Growth rates of agriculture and allied sectors have been fluctuating 1. It is expected to grow at the rate of 2. The overall industrial sector growth was 5. As per the estimate of national income , industrial sector grew at 4. The eight core industries coal, crude oil, natural gas, petroleum refinery products, fertilizers, steel, cement, and electricity grew by 4. As per the CSO the growth of the services sector is expected to be 8. With a share of 3. Foreign Trade The survey adds that after remaining in negative territory for a couple of years, growth of exports rebounded into positive one during and expected to grow faster in to Similarly, merchandise imports also recorded positive growth in after registering negative growth. This has been attributed to an increase in merchandise imports relative to exports. Inflation Inflation remained moderate during WPI based food inflation declined to 2. For the year as a whole, lower CPI inflation average to 3. Savings and Investment Similarly, despite the robust economic growth, the savings and investment as a ratio of GDP generally declined. The major reduction in investment rate occurred in , although it declined in too. Within this the share of household sector declined, while that of private corporate sector increased. There needs to be a focus on revival of investment. However, the decline in investment will be difficult to reverse because: Easing the cost of doing business, creating a transparent, stable tax and regulatory environment, and supporting small and medium industries will help revive private investment. Way Forward Though concerns have been expressed about growing protectionist tendencies in some countries but it remains to be seen as to how the situation unfolds. Some of the factors could have dampening effect on GDP growth in the coming year viz. However, with world growth likely to witness moderate improvement in , expectation of greater stability in GST, likely recovery in investment levels, and ongoing structural reforms, among others, should be supporting higher growth. The agenda for the next year consequently remains full: Over the medium term, three areas of policy focus stand out: Above all, India must continue improving the climate for rapid economic growth on the strength of the only two truly sustainable engines"private investment and exports.

**Chapter 2 : Economic Survey Highlights pdf -Indian Economic Survey**

*The Economic Survey , was tabled in the Parliament on January 29, , by Mr Arun Jaitley, Union Minister for Finance, Government of India. The Survey forecasts a growth rate of 7 to per cent for FY19, as compared to the expected growth rate of per cent in FY*

## Chapter 4 : Read: Economic Survey - The Hindu

*Economic Survey Volume I Government of India Ministry of Finance Department of Economic Affairs Economic Division January,*

It gives a detailed account of the various sectors of the economy and overall economic scenario of the country in the past years and provides an outline for the year ahead. Economic survey is presented every year before presenting the Union Budget. Up to , it was presented along with the Union Budget. From onwards, it has been delinked from the Budget. The first draft of the economic survey is prepared by the department of economic affairs in the finance ministry. The final version is scrutinized by the Finance Secretary and Finance Minister. The constitution of India neither uses word budget or economic survey. Union Finance Minister gives the final approval before the Economic Survey is tabled in Parliament but the government is not obliged to follow any recommendations made in the document. The purpose of tabling the Economic Survey in Parliament is to explain the backdrop of the Budget for the next one year. Parliament is made aware about the economic and financial health of the country before it scrutinizes and clears the Budget Economic Survey Highlights pdf -Indian Economic Survey The GDP growth rate for the fiscal year is pegged at 6. The government, in its advance GDP estimate, had estimated a growth of 6. The economic survey said that it translated roughly into about 1. The Agriculture growth in FY18 likely to be at 2. Services growth for FY18 likely to be at 8. The IBC resolution process could prove a valuable technology for tackling this long-standing problem in the Indian corporate sector. The apparel sector has immense potential to drive economic growth, increase employment, and empower women in India. However, India has not, or not yet, capitalized on this opening. In the last three fiscal years, India experienced a positive term of trade shock. But in the first three quarters of , oil prices have been about 16 percent greater in dollar terms than in the previous year Table 1. The Headline inflation has been below 4 per cent for twelve straight months, from November, to October, and CPI food inflation averaged around one per cent during April-December in the current financial year. The Survey observes that the economy has witnessed a gradual transition from a period of high and variable inflation to more stable prices in the last four years. Current account deficit expected to average 1. However, due to higher expected increase in imports, net exports of goods and services are slated to decline in Fiscal Deficit Target for fiscal consolidation specially in a pre-election year can carry a high risk of credibility. Current Account deficit for expected to be 1. Likely to normalise as the year progresses. Demonetisation helped in increasing share of financial savings.
