

Chapter 1 : CutePDF - Convert to PDF for free, Free PDF Utilities, Save PDF Forms, Edit PDF easily.

CutePDF Editor requires Adobe Flash Player version or greater to be installed. If Flash Player is installed on your system, please ensure it is enabled in your.

There are many ways you can do this. In this guide, you can learn the steps for how to edit a file on your server. When updating files on your server, you may need to clear your browser cache to see the changes. This is sometimes called "Editing on the fly". Editing on the fly is usually reserved for minor changes. When editing files directly on the server, the change takes effect immediately. The problem with editing files directly on the server is that you are editing the live copy. When editing the live copy, your site can break if a mistake happens and you cannot undo the change after its saved. In order to edit a backup copy of your files, you will want to use FTP to change the files. Below is a general step by step on how to edit files though the File Manager. If you do not know where your files are located on the server, please see our article on [What directory should I put my files in?](#) Log into your cPanel and Go to the File Manager in cpanel. Select your directory and click Go. Edit the file with the File Manager Editor. You can now view your live site and see the changes. Below are the basic steps to edit a file using FTP. Edit the file on your computer with notepad or another code editor. Re-upload the file to the server and overwrite the existing file. The changes should reflect now on your live site. To see other articles available on how to manage your files, please visit [How to manage your files on your server?](#) Was this article helpful?
