

Chapter 1 : Rotating a PDF in Google Docs - Web Applications Stack Exchange

Surprisingly Google Drive natively cannot rotate images. Some programs try to reorient the image when you open it, which explains your second paragraph. Some programs try to reorient the image when you open it, which explains your second paragraph.

At the top of the page, find and click Select line. Pick the type of line you want. Place the line on your drawing: Click to start, then drag across the canvas. Click to start, then click at each point you want the line to bend. Double-click or complete the shape to finish. At the top of the page, find and click Shape. Choose the shape you want to use. Click and drag on the canvas to draw your shape. At the top of the page, click Insert. To place text directly on the canvas as a shape, click Word Art. To place text inside a box or confined area, click Text Box and click where you want to put it. Type your text and press Enter. You can select, resize and format the word art or text box, or apply styles like bold or italics to the text. At the top of the page, find and click Image. Follow the instructions to pick or upload an image. You can move and format the image like any other shape. Drag it on the canvas. Drag the blue boxes at the corners. Use the buttons above the canvas. Select and format shapes On your computer, open a drawing in Google Drive. At the top of the page, find and click Select. On the canvas, click the shape, line, or text box you want to change. Drag the blue dots at the corners. Lines can be rotated this way. Put text inside a shape: Double-click an enclosed shape and start typing. Copy a shape To copy a shape, hold Option on Macs or Ctrl on Windows and drag the copy to a new location. Change your drawing size On your computer, open a drawing in Google Drive. Go to the menu and click File Page setup. Select a size from the dropdown menu. To choose your own size, select Custom.
