She lost her job as mayor of Nashville, had her rising reputation damaged by a messy two-year affair with her bodyguard and pleaded guilty to theft. But at least Megan Barry has a really good mug shot. Nashville Mayor Megan Barry resigned from her post after admitting to a 2-year-long affair with her bodyguard. She pleaded guilty to misappropriating city funds. Barry, 54, announced her resignation soon after. I love you Nashville. She became mayor in September He was also ordered to served three years probation. Barry admitted to the affair Jan. At the time she vowed to remain in office. Megan Barry admitted to having an extramarital affair with the former head of her security detail, Sgt. Robert Forrest, left, when she was mayor of Nashville. Fox 17 With her resignation on Tuesday, Barry is the first mayor in Nashville to leave office before the end of their term in nearly a century. The Tennessee Bureau of Investigation did not identify the woman in the photos and Barry has said that if the photos are of her, they were taken without her knowledge or permission. Barry said the affair began in spring , an affidavit said. Her husband, a college professor, has tweeted in support of her since the scandal broke. Mug shot for former Nashville cop Robert Forrest. His wife is divorcing him. In addition, a group of local activists has filed an ethics complaint against Barry. They claim that her relationship with Forrest compromised her in making decisions related to law enforcement. The Associated Press contributed to this report.

### Chapter 2 : Higher Education Career Advice

*Engaging Bodyguard has 21 ratings and 1 review. Toabetterme said: The summary and the excerpt kinda misled me but I liked it none the less. Cain was kind.*

Alright, you get a padded case and this case contains the weapon and the magazine in this little pouch. More about that later. You get a well illustrated owners manual that includes, you know, exactly how to field strip, maintain, site adjustments. You definitely want to keep this. Obviously a warranty card that you want to fill out and send in. And of course the obligatory padlock. Alright, set this aside. Now, I really like this case. It looks like the day-timer or something. Like I can carry this around and have a calendar in there or something. Visually and physically inspect the chamber. The weapon is safe and ready to be field stripped. Right here is the disassembly lever. So we have to work it a little bit. Pull it out, and comes out pretty easily right there. Now, I want you to watch the slide stop drop out of the way. Now this is where we have to have a note of caution. The spring is under a little bit of pressure. And then release that pressure slowly and take it off. Now the barrel comes out by pushing forward on the barrel, tilting it up and rotating it backwards out of the slide. This is as far as you need to take this weapon down. In, press down, and then pull back. Okay, the barrel is in there. We use the guide right to kind of point at it. You see this little hole right here? So, at the end of the day this is what it should look like. The trigger bar is working right here, but the hammer is not moving. Everything is as it should be. However, let me stage this for you, if I pull the trigger and the hammer moves, see it moving, the weapon is not ready to be reassembled. Trigger bar is moving. So all I have to do is line these slots up with these notches, with these rails rather and then when I pull it back, insert the slide stop and lock the weapon all the way to the rear. So push it in there, making sure the barrel is all the way forward. Now again, making sure that the slide stop drops out of the way to pull back on the slide as you just saw, push it all the way forward. You need to take a slide back off and reset that trigger. But you can check the function. Everything seems to work. The hammer is working perfectly. The weapon locks up. Slide goes forward, hammer works. Both slide and trigger are locked. He has been a Missouri and Tennessee P. DC has committed his life to training people on the proper and effective use of firearms. He firmly believes that this training results in a safer world and fewer lost lives. You Might Also Like.

Chapter 3 : Bodyguard () - IMDb

*Beneath the Texas Moon* by Elle James Eve Baxter thought tiny Spirit Canyon, Texas, was the perfect place to escape her nightmares and be alone with her son - but the drought-ridden town had more than its share of secrets and skeletons.

Share27 Shares For as long as there have been people of power and prestige, there have been bodyguards. Although movies and television might paint the life of a bodyguard as exciting and exotic, it is often equal parts tedium and danger, long hours on edge anticipating the worst. Below are 10 facts about bodyguards, from men who protected world leaders to those who betrayed the very men they were paid to protect. Misch was very close to the Fuhrer, claiming that Adolf gave him the generous wedding present of 1, marks and 40 bottles of wine in . After the war, he was captured and tortured by the Soviets and sentenced to hard labor, then released eight years later. Thereafter, he and his wife Gerda operated a store in Berlin. How is that possible? A bodyguard is always on edge, ready to reach for his gun and engage in battle to protect his charge. However, any guard that is frequently called upon to perform violence is probably bad at his job. For instance, if a member of a security detail is called upon to be a driver, his sole responsibility is to stay behind the wheel, no matter what happens outside the car. His job is to memorize primary routes, alternate routes in case of emergency, and the locations of safe houses. He is advised to keep the gas tank full and the car idling at all times in case a quick getaway is required. Two of his brothers, Ralph and Frank, joined him on the dark side, but his brother James took an entirely different road. James left home as a teenager and served in World War I. Thereafter, he changed his name to Richard Hart after Western film star William Hart , presumably to distance himself from his older brother Al, who was already beginning to establish an ugly reputation in New York. Bizarrely enough, he became a federal Prohibition agent in Homer, Nebraska. In the summer of , Hart was assigned, along with other lawmen, to act as a bodyguard for President Calvin Coolidge and his wife while the couple visited the Black Hills of South Dakota. The irony is almost unbelievable—“one brother was protecting the President of the United States at the same moment the other was running the most notorious crime syndicate in America. Few can attest to the sacrifices a guard might have to make better than Trevor Rees-Jones, who served as the bodyguard for Egyptian heir Dodi Fayed. The car was traveling at kilometers per hour 65 mph in an attempt to elude paparazzi when it crashed head-on into a wall. None of the passengers was wearing a seat belt. Fayed and Paul died at the scene, and Diana passed shortly afterward from extensive internal damage. How Rees-Jones survived at all is a study in the miracle of modern medicine. All the bones were smashed. His profile was completely flat. Years later, he still bears deep scars and his memories of the night are hazy, but he does claim to remember Diana calling out for Dodi after the crash. Conspiracy theorists had a field day with the crash, with some including billionaire business magnate Mohamed Al-Fayed , claiming that the incident had been orchestrated by MI6 on instructions from the British royal family. The truth was a little more mundane—“driver Henri Paul was drunk at the time and had been taking prescription drugs that were incompatible with alcohol. A close examination of this material often reveals a stern, flint-eyed subject in the background. Thompson served Churchill for two stints totaling 18 years between and . During World War II, when he served as Prime Minister, there was a bounty on his head from any number of organizations, including the Nazis, various nationalist groups, and, of course, the odd lunatic. In , Thompson defended Churchill from the mistress of French prime minister Paul Reynaud, Countess Helene de Portes, who tried to attack him in a fit of rage. Despite his stoicism, the pressures of the job did get to Thompson, resulting in a nervous breakdown and the end of his first marriage. After he retired from service at the close of World War II, he received the British Empire Medal and would later pen a successful autobiography detailing his adventures. Churchill would go on to die at the ripe old age of 90, but he surely would have succumbed years previously if not for the efforts of his trusted bodyguard. The hulking Michael Clarke Duncan is perhaps best remembered for the role of the simple minded, magical giant in *The Green Mile*. Meanwhile, he paid the bills by acting as a bodyguard for some of the biggest names in entertainment. Duncan heard the tragic news the next morning and asserted that it was the last night he would work as a bodyguard. According to one female

bodyguard, the appeal is largely their ability to blend in. Female guards appeal to Arab clientele in particular, who for religious reasons are uncomfortable with unrelated men being around female family members. Female bodyguards are also popular in China and Russia, as in the case of model-turned-guard Anna Loginova , who served clients like Russian Light Welterweight boxer Kostya Tszyu. Despite her training, Loginova was involved in a carjacking in and died defending her own Porsche Cayenne. You are literally putting your life in their hands. Not surprisingly, this has backfired in a number of instances. Perhaps the most notable instance in recent history was the assassination of Indira Gandhi, who was shot dead on October 31, , by bodyguards Satwant Singh and Beant Singh , who were Sikhs. While Satwant had only recently been employed as a guard, Beant had been known to Gandhi for a decade. The two men were taken into custody, where they apparently tried to attack other officers and were gunned down. Beant was killed and Satwant survivedâ€”only to be hanged later. The assassination was a retaliation due to clashes between the small Sikh minority of India and the Hindu majority. Some in the Muslim community view Qadri as a hero, and a mosque is being built in Faizabad, Pakistan in his honor. Grier was a few steps behind, walking with Ethel, when chaos rang out. Ethel toppled to the floor and Rosey went to assist her, but as the screaming increased, he ran into the kitchen to find that Robert had already been shot. Grier was able to disarm the assassin and keep him from becoming the victim of mob violence. It was a tragedy for his children, his family and for all of us. However, the initial purpose of the agency was not to protect the President, but to halt the flow of counterfeit currency. On the night he was killed, Lincoln was under the protection of a single police officer named John Parker. Despite having survived an earlier assassination attempt, Lincoln was not overly concerned about his security. Unfortunately, there could not have been a worse choice to protect him. Parker had a spotty history of drinking and sleeping on duty. Unfortunately, he decided to go have a drink at the nearby Star Saloon during intermission. Despite his lethally irresponsible behavior, Parker kept his job, even being assigned at least once to protect Mrs. Three years later, he was once again caught snoozing on the job and was finally fired from the police force. Mike Devlin is an aspiring novelist.
