

Chapter 1 : Environment and Development | United Nations ESCAP

The UN Environment Regional Office for Asia and the Pacific is located in Bangkok. We have a national office in Beijing and a sub-regional office in Samoa, and we are present in other countries through national projects including of the UN-REDD Programme and the Poverty and Environment Initiative.

Our involvement is not merely a financial one, Ricoh staff are actively involved in the running of the program enabling them to see the results first hand, providing them with a sense of purpose and also reconnecting them with the environment. Hong Kong Environmental Technical Centre Visitation - Ever seen for yourself what happens to the machines and toner cartridges when they have lived their lifespan? Participants get to see and experience first-hand the toner refilling process, the reconditioning of the machines and the handling of old hard disks. In one of the trips this year, the participants also got to engage in an interactive discussion with the RHK Managing Director on the green business of Ricoh! The 3 day event made up of volunteers across 3 cities saw RID staff distributing food and clothes, taking part in a blood donation camp, singing and playing games with the many orphans and elderly at the Helpage shelters. Helpage is an international NGO primarily helping old people, though they do run several orphanages as well. In Mumbai, they planted saplings of fruit bearing trees such as papaya, banana and coconut. The orphans helped by carrying big carts of fruits to lead RID staff to the proper planting spots. New Delhi volunteers were waist deep in mud, digging and mixing manure before finally laying in the saplings and watering them. Designated by BirdLife International and MNS as an important Bird area with sightings of over species of birds in its brackish water lake system, the KSNP project aims at building a framework for continuous forest conservation. Let us not forget about the abundance of small-animals, fish, amphibians and reptile such as the silver leaf monkeys, the long-tailed macaques, otters, mudskippers and fiddler crabs that can be found around the nature park. For more information, go to: Nicknamed the "Ricoh Valley" by the in-charge of this reforestation project, the Motuihe Trust, Ricoh has been the only volunteers to plant there since The first trees planted in have grown well over head height, providing shelter and food for the endangered species such as kiwi and tuatara reptile that have been released on this now pest-free island. A video production team has also filmed the process this year. To view, go to: Ricoh Philippines organises this annual event to recognize children with outstanding scholastic performances. Singapore Eco Action Day - Featuring the slogan "Green the Red Dot, Join the Movement", the initiative aims to mobilize and inspire individuals and organizations in Singapore, widely known as the "little red dot". An intention for offices to extend this effort from one day to a daily affair, Ricoh has gathered over organisations to participate in this campaign since with a total of about ,kWh of energy saved! That is almost 3 million balloons of CO2! Join us when the campaign kick-starts in ! To visit, go to: Heading up to Junjianshan, Beitou, the Ricoh team aims to clean up the mountain, restoring it to its beautiful landscape. This activity not only cleans up the environment, but the meaningfulness refreshes the participants even as they exercise their way up. Ricoh Eco School is a programme that educates students about the environment at a young age, teaching them to use responsibly via creative means and programme.

Chapter 2 : Airports Council International Asia - Pacific

Held in conjunction with the World Environment Day on 5th June, Ricoh Asia Pacific & Ricoh Singapore championed this annual energy-savings campaign to encourage individuals and organizations to take part as a collective effort to save energy on this day.
