Which set of standards are you looking for? The Blobfish and More worksheet Key terms opinion Learning objectives Students will be able to identify facts and opinions and explain why each is a fact or opinion. Introduction 5 minutes Write the following sentence on the board: Distribute the index cards, and ask each student to write "pre-assessment" at the top of one of her cards. Underneath, have students write down whether they think the sentence on the board is a fact or an opinion. Remind them to explain their answers. Take a vote to determine what most students believe. Allow volunteers to say a few words defending their opinion. Have students put aside their card. Facts can be confirmed by checking books or reliable internet sources. If a fact is about a person, you can ask that person whether the fact is true. Hold up your copy of the Facts and Opinions worksheet. Read aloud the first statement: Mystery novels are the most exciting books to read. Model the process of determining whether this is a fact or opinion by asking yourself, "Is this a statement that can be proven true? Again, model for students how to determine whether this is a fact or opinion. Ask yourself, "Is this a statement that can be proven true? Yes, I can ask the person who bought the backpack how much it cost. I could also look at his receipt. This statement is a fact. Ask them to write a large "F" on one side of the card and a large "O" on the other side. Complete this activity with the remaining sentences on the worksheet. After students vote for each word, let them know the correct answer. Ask a student who answered correctly to explain how she arrived at her answer. Independent working time Distribute a Fact or Opinion? The Blobfish and More worksheet to each student. Give the class about ten minutes to complete the worksheet. Go over the answers, and make sure to provide an explanation for each one. Students who complete the Fact or Opinion? The Blobfish and More worksheet early can work on the second page of the Facts and Opinions worksheet. Students who are struggling to distinguish between the facts and opinions on the worksheet could be given additional examples of each type of statement. Ask them to write the definitions of fact and opinion on the top of their worksheets and refer to them whenever needed. Assessment 5 minutes Refer back to the sentence from the beginning of the lesson: Have students flip to the other side of their first index card and write "post-assessment" at the top. Underneath, have them write what they now think about whether the statement is a fact or an opinion. Tell students that the correct answer is fact. Explain that it can be proven true, since you could ask your friend about his favorite color. Challenge students to look out for facts and opinions in what they read for the rest of the day. This lesson introduces students to the differences between facts and opinions in an interactive way.

## Chapter 2 : Fact and Opinion Worksheets | Ereading Worksheets

*2nd and 3rd Grade, 4th and 5th Grade, Grades K Fact or Opinion Activity: I Think and I Know In this worksheet your student will write facts and opinions about a variety of subjects.*

Students will be able to label statements as either facts or opinions. Lesson Plan Connection mins: Students should be seated on the carpet with a partner. They will be expected to turn and talk to this partner throughout the lesson. Readers, over the past few days you all did an excellent job understanding the different ways authors organize informational texts. As we move forward in our informational text unit, I want you to continue to notice those organizational strategies. Today, we will begin a new focus. We will begin talking about fact and opinion. A fact is something that is true and can be proven or tested. An opinion is what someone believes. It cannot be measured or proven. For example, it is a fact that there are students in this school. However, it is my opinion that we have too many students in the school. I can actually go around and count each student to prove that there are students in the school, making that statement a fact. Maybe our principal thinks we need more students in the school. Today, we will practice with fact and opinion in sentences. Tomorrow, we will use what we have learned today in sentences to determine fact and opinion in an informational article. Teacher unveils chart with five sentences listed below. Watch me as I try to determine the difference between the facts and opinions in these sentences. We had a great time at the basket ball game yesterday. Earth is the third closest planet to the sun in our solar system. Basketball is the best sport to watch. Seventy-five percent of the Earth is covered in water. Teacher reads aloud the first sentence. I know this sentence must be an opinion. I know this must be an opinion. Did you notice how I first read the sentence, then thought about the definition of the two new terms before deciding if the sentence was a fact or an opinion. I will label that sentence an opinion. I will try again with the second sentence. Teacher reads aloud second sentence. I also know I can prove that an animal is a reptile if I did all the research. This must be a fact. I will write fact by that sentence. Teacher reads aloud the third sentence. Turn and tell your partner if you think this is a fact or an opinion and make sure to explain why you feel this way. Students turn and talk. Teacher has students share out responses and encourages students to explain why they feel the sentence is a fact or an opinion. I will write that this sentence is a fact on the paper. I know this is a fact because I can do research to prove the statement, it is not what someone feels or thinks. Teacher reads aloud the fourth sentence. Thumbs up if you think this is a fact and thumbs down if you think it is an opinion. Teacher reviews student responses and talks through any misconceptions. I will label that sentence an opinion because you were all right, not everyone thinks basketball is the best sport. That is how someone feels therefore it is an opinion. I think we are all ready to try on our own because we did such a great job with that activity. Independent Reading mins: Students return to their seats. Today, while you are working I want you to label the facts and opinions. Try to notice any facts and opinions in your own reading as well. Students should complete the fact and opinion worksheet, which requires them to label each sentence as either a fact or an opinion. I use the worksheet as an exit slip for this lesson. I can quickly sort through the worksheets to determine which students need more help with the skill and those that have mastered the concept. Fact and opinion is a fairly simple skill that students should be familiar with. I like to begin with this introductory lesson which only focuses on sentences rather than an entire article to ensure all students have a strong foundation before moving forward with the concept.
