

Chapter 1 : The Kingfisher First Picture Atlas Download by magquigelki - Issuu

The Kingfisher First Picture Atlas is a fun and attractive reference book for use at home and at school. - Penguin-shaped ribboned bookmark with map legend - Easy-to.

At least, I found it as such when I was much younger, although it led me to do a lot of self-reading to complete the picture in the areas that interested me. Susan Wise Bauer attempts to remedy this difficulty in presenting a chronological history to the younger set using a classical approach to history. The readings in the text provide a background of the time period covered, augmented by the use of the guide, which contains review questions, suggestions for supplemental readings, appropriate literature selections, and also map activities, coloring pages, as well as an abundance of projects that span history, art, and science that are sure to excite the student. The text itself serves as the starting point and backbone of each unit. Each chapter covers a particular time period, and is placed in chronological order. For example, in Volume One: The book goes in strictly chronological order, so one time period of a civilization will be covered, and then a different civilization may be covered, returning to another era of the first civilization later, to encompass a significant historical event of that civilization. Each chapter is further split into smaller, more bite-sized amounts that lend themselves well to a younger attention span. The chapters are presented at a level they will understand, but at the same time, find fairly absorbing. History is presented in more of a story-type format that they will appreciate, and the author emphasizes that the book is not intended to give a complete overview of the time period, but rather to give the student a chronological order of major events and an appreciation and understanding of different cultures while presenting it in a way that will foster an enthusiasm and enjoyment of the subject matter. For example, while not every ruler of a civilization may be named, along with major accomplishments, an overview of the period highlighting important events and rulers, along with details of how the people in the civilizations lived comprise the short chapters. Mythical stories as well as historical fiction-type passages about young children from different cultures are woven into the narrative to stimulate further interest. These almost story-type chapters are meant to be read aloud to younger children, or those with reading difficulty, while good readers and older children can read or take turns reading the chapters aloud. These selections further flesh out the history lessons, particularly for those periods or civilizations where less supplemental reading is available. When all the chapter reading has been accomplished, the next order of business are the reading comprehension-type review questions for each chapter section. Following the questions, the student is asked to summarize the chapter in a few sentences. The author again stresses that important facts be included in this narrative, but not necessarily every single one. A few sample narrations are also supplied for each section. After these activities have been completed, a list of readings chosen to supplement and complement the history lesson are supplied, as well as a following list of corresponding literature suggestions to further flesh out the lesson, with books telling stories from that era. Author, publisher, copyright date, and a sentence summary of each book are given for ease in locating the book. Now for some real hands-on work! The geography section is normally followed by a coloring page, highlighting some aspect of the history lesson, or some other word activity. These may be arts, crafts, writing, or science projects, or just fun supplemental activities. Several projects are provided for each chapter, covering a wide range of activities. These could include anything from building your own hut to making your own cunieform tablets, mummifying a chicken, brick-making, baking an African or Greek feast, purple dye, an erupting volcano, an olympic wreath, a Native American sand painting, a Roman chariot, making paper, and LOTS more. While the breadth of activities and readings may seem overwhelming or time-consuming, keep in mind that not every suggested book needs to be read, and not every single project needs to be completed. Spend as much time in an era as suits the students, pacing yourself to cover everything that is of interest.

Chapter 2 : Kingfisher First Picture Atlas, Williamson, Lyn, Used; Good Book | eBay

First Picture Atlas is crammed with colorful maps that take you to all the countries of the world and show you the
