

## Chapter 1 : Sample Business Plans | Cornell Small Farms Program

*A suitable and effective business plan is a must for starting any business. As goat farming is a proven highly profitable business idea so, it is very necessary to make a proper goat farming business plan before starting this business.*

Or you need a sample goat farming business plan template? If YES, then i advice you read on. Are you considering going into goat farming business? You really should because of the following reasons-: Goat meat is in high demand. People love goat meat especially in Africa. Goats also have other uses apart from consumption of the meat. The skin of goats is a very good source of leather which can be used to make bags, shoes and other leather materials. Goat milk is also very nutritious and good for consumption. It is also used in the cosmetic industry to make body creams. Goat offal is also used in the pharmaceutical industry. Goats are cheaper and easier to feed, making you spend very little on feeding them. Goats can feed on grass and other cheap food items. You could also manage them quite easily as they require very minimal supervision. Goat faeces are also a very good source of manure for people interested in buying organic manure. Lastly, you can raise goats on very little capital compared to chicken or poultry farming. Goat farming is very easy and also very profitable but it is important to get enough information before you delve into this business to avoid mistakes and losses. This is a very detailed goat farming business plan for starting a goat farm. Determine the breed you want to raise-: Goats come in different breeds with each breed having its own unique specifications and uses. You must first decide on why you want to raise goats and then select a breed that is most suitable for that purpose. You could also raise both dairy goats and regular goats if you can afford to feed and care for them. I mentioned earlier that to be successful in this business, you have to be armed with the right information. Apart from the theoretical aspects of goat farming, you should also try to learn some of the practical aspects like how to feed them, how to prevent diseases, what to do if there is an outbreak of diseases, how to sort them, how to care for pregnant goats and new kids, how to milk them and a whole lot of other things that you should know. To get training, you can approach goat farmers and ask them for training assistance or buy books or materials on goat farming. I am also certain that you would find a lot of resources on the internet that would be useful for you. As soon as you are done with training and ready to start your business, you should look for a suitable location to rear your goats. You would need a land which you would fence to provide security for the goats. You would also need to build shelter for the goats where they can be shielded from rain, sun and all other elements of weather. The most desirable source of feeding for goats is grass. So you have to make pasture for your goats in the location that you have selected to raise them. You can easily make pasture for your goats by yourself or engage the services of an expert to do it for you. Stock up on Bucks and Does-: Before buying goats to raise, ensure that you ascertain the health status of the goats you buy. They must be healthy and free from diseases. As for the number of goats to buy, you should buy at least one buck male goat and several does female goats. You should also ensure that you buy only as many as you can feed and care for because goats can give birth to a lot of kids at once which you would also have to feed. Apart from the pasture, if you want your goats to grow very big and stay healthy, you should provide them with extra source of feeding. You could consider buying specially formulated goat feed or make your own feed. You could also bring in pasture from other places to feed your goats. Another thing is to ensure that they have regular access to clean water to keep them healthy and strong. Caring for the male goats-: The bucks are used for reproductive purposes; to mate the female goats and do not need too much care order than to ensure that they are well fed in order to increase their strength. Caring for the female goats-: The female goats need more care and attention compared to the male goats. You should look out for when they are on heat and then allow them to have access to a buck for mating. You should also ensure that the bucks are well cared for during their gestation period which would take about days. It would also help to have a veterinary doctor to come and take a look at the goats from time to time. Goat farming may be stressful for inexperienced people because you have to feed them, clean up where they stay and provide general care and attention which may be difficult for you to do alone especially if you own a very big farming. Therefore, you should hire 1 or 2 people who would be in charge of looking after the goats. A common mistake that livestock farmers make is not

having a good record keeping system and consequently, not knowing if they are making profits or incurring losses in the business. You should a solid record keeping system which would contain records of all your stocks, every dime you spend and all your income in the business. As soon as you are ready to start selling, you should find out how much goats and goat milk sell for and decide on how much you would sell yours. Then you should approach other goat farmers for links to buyers. You could also get buyers on the internet through agricultural forums, product sourcing websites and e-commerce platforms.

## Chapter 2 : Goat Farming Business Plan Information | Goat Farming

*Goat farming business is a very profitable business, and many people are making money all over the world by starting goat farming project. However, to build a successful, sustainable goat farming business, you require sufficient knowledge of how to efficiently raise the goats, good management skills, and a good goat farming business plan.*

A suitable and effective business plan is a must for starting any business. Make a clear and up to date plan before investing your money in this market. You can start goat farming business with a very small investment. But in the result you will get more profits than any other livestock farming projects. Goat Farming Business Plan For Beginners High profit within a very short time, little investment, huge global demand are the main reasons of spreading this business rapidly throughout the world. By visiting some farms and producers you will get some clear idea about the pros and cons of this business. This will help you running your business perfectly. Go to your nearest market and try to understand which goat products have a high demand in the market. Try to produce those products which you can sell easily in your local area and in the market. Otherwise you will lose money instead of being benefited. And your goats are producing milk highly. But there are a little or no goat milk consumer in your local market. Then what will you do with your production? So, always keep in mind this factor and try to produce those products which you can sell easily in your local market. If you have a good facility of marketing your products internationally then you can produce any product from your farm. Nowadays goat meat has a great demand internationally. And this rate is increasing rapidly day by day. If you have sufficient facility of selling goat meat in your local market then you can start raising some highly meat productive goat breeds. Boer , Beetal , Matou, Black Bengal etc. As a result it has huge demand in local and international market. Goat milk is also very suitable for making all types of dairy products. If you can sell goat milk in your nearest market easily then you have to choose some highly milk productive goat breeds. If you want to produce fiber from your farm then Cashmere and Angora goat are very suitable. Both are highly fiber productive. All goat breeds produce skin. But few of them produce high quality skin. For business purpose Black Bengal goat produces high quality skin. And their skin has a high demand and value in the international market. Before start raising goats for skin be sure that there is a market available for selling your product. Some crop farmer uses goat manure in their field. It is a very high quality organic fertilizer. Goat Housing Commercial goat farming needs suitable house for profitable production. You should make such a house which can provide all types of facilities for your goats. Good house keeps the goat healthy and free from diseases. This directly increases the production. So, before starting consider how comfortable house can you make for your goats. Investment in housing is fixed. And you can use one house for several years. Feeding Goats Goats are ruminants. They eat almost all types of crop, corn and leaves. In this system your goat will get food from natural sources and it also reduce your food cost. In case of raising goats by providing them home made supplementary feed be sure that all feed elements are easily available in your local market. Also ensure sufficient supply of clean and fresh water. Sometimes your goats may suffer by various diseases. If possible stock some necessary vaccines and medicines in your farm. And always vaccinate your goats timely. Before starting goat farming business, ask some questions to yourself. Do you love goats? Loving the animals that you are raising is very important for success-fulness in any business. Do you have any experience in this business? If not, contact with your nearest animal husbandry training centers or visit some farms. Do you have enough capital for setting up your farm? You can also apply for bank loan. Do you have enough facilities for goat farming? For example clean and fresh water source, cultivation of green feeds like plants or grasses, proper marketing, medication etc. What is the market condition of your location? Try to understand the market demand and price of your products. This is very important for beginners. Can you personally take care of your goats? Try to take care of your goats personally along with your labors. Learn more about their health and diseases management. If possible visit some farms practically for several days and try to learn everything related to this business. Before starting goat farming business plan consider your budget and some other factor related to this business. How much capital do you have? How many facility can you provide to your goats with this capital? Which product do you want to produce from your farm? What are

the natural facilities available there for goat farming? Is there any market for selling your products in proper price? Is there any grazing place near your farm? Can you provide provide proper treatment and medicines? Wish your happy and profitable goat farming business.

## Chapter 3 : How To Start Goat Farming (Business Plan Template + eBook)

*Goat farming is the business of milk production along with the meat of goat, hair production which can be used for the various purpose of clothing material, the farm manure which the best fertility with compare to the manure of other animals.*

However, Sheep farming and Goat Farming involves many risk factors which may influence the profits and even put a person in poor economical situation without proper business plan and marketing. One should be careful while planning for a sheep or goat farm. With proper farm management skills and marketing strategies, one can earn decent profits in this farming. Let us put brief some simple ideas for profitable commercial goat and sheep farming business. The following are main parts of end-to-end sheep and goat farming. Sheep Farming Business Plan – Tip 1: First and Foremost, you should decide whether you are preferring to go for sheep farming or goat farming. However, both have their own advantages and disadvantages. However, when you look at time-frame and managing the farm, sheep farming would be the best. If you are novice beginner in this field, it is advised to go for sheep farming or goat farming training and attend any seminars related to this. Sheep Farming Business Plan – Tip 3: Preparing a business plan is the first step of going for sheep farming or goat farming. Sheep Farming Business Plan – Tip 4: To get an idea of cost and profits of sheep farming or goat farming, get any practical project report from local animal husbandry or agriculture department. Analyse the report and modify your business plan according to it. Though you are a big investor, start with small number of animals. After finding in and outs of sheep and goat raising, go for large scale farming. Watching sheep farming videos on you tube, reading sheep and goat farming blogs will help you in setting up a farm. Sheep Farming Business Plan – Tip 7: If you are opted for sheep farming, then there are two options; going for breeding and raising sheep and selling. Sheep Farming Business Plan – Tip 8: Initially, it is better to try with temporary structure then for permanent one. Try to spend minimum on shed construction. There are many ways you can construct shed using different material. Try to consider economical one. Sheep Farming Business Plan – Tip 9: Selecting a quality, environmental support breed is a main factor for commercial success of sheep farming or goat farming. Try to go for multi kidding female breeds and muscular breed, if you are going for breeding. If the purpose is just raising and selling in short time 4 to 6 months , selecting disease free, healthy males are important. When you plant to go for buying animals in bulk, take veterinary doctor with you to check the animal health status. Sheep Farming Business Plan – Tip Saving money comes into picture in a big way when you are purchasing in bulk. Negotiate well to get at cheaper price. Before getting the animals into your farm, make sure they are all well vaccinated, if not go for necessary vaccinations. Clean water, timely observation of animal behaviour is important in your farm. When it comes to feeding, there are two options; growing green crops like co-1, co-2 perennial grass, maize and other crops and make your own feed silage. This way you can drastically reduce the feed cost. If you buy feed out side, it may cost up to 20 rupees per kg. When you plan to make silage, you should have at least 1 acre land to grow green crops for feed, get a feed cutting machine to achieve this. There is a subsidy on getting this machine from local agriculture department in India. If the farm is on large scale, make sure the animals are insured. However, goats prefer natural grazing, semi-stall feeding can also be considered. Once silage is made from green crops like maize, it may last up to 2 to 3 years and will be very useful in dry periods. Make sure veterinary person visits your farm on regular basis to check and treat any ill animals. If you find any animal is not sleeping and eating, it should be separated from the flock and immediate medical care should be provided. Checking the sheep or goat weight every two weeks gives an idea of weight gain, so that you can make any changes in feed supply. When it comes to marketing, you should find a genuine buyer. Having cyclic growing would be a nice idea for easy marketing. You should plan and maintain 2 batches yearly batch for 6 months , where one batch would be ready for festival season and other would be ready for other season.

### Chapter 4 : A Sample Goat Farming Business Plan Template for Beginners

*Adding a dairy goat farming business plan to your homestead goals takes careful thought and preparation. In addition to purchasing the necessary livestock, dairy goat supplies must be purchased and the facility readied. Take a look at some ideas that will get you on a successful path to a dairy.*

It needs less grazing lands and initial investment is low. Risk of goat farming is less compared to other livestock species. It is an economically viable sector to the rural people. ## Chapter 6 : Starting a Goat Farming Business For Beginners | Agri Farming

*Goat farming as a Business MRS, SNV, DLPD 2 ENTREPRENEURSHIP Objectives Introduction. An entrepreneur is a person who continuously identifies opportunities in the market for products.*

Posted by admin Agriculture , Business Ideas , Business Plans 1 Goat farming business is a very profitable business, and many people are making money all over the world by starting goat farming project. However, to build a successful, sustainable goat farming business, you require sufficient knowledge of how to efficiently raise the goats, good management skills, and a good goat farming business plan. This article will outline how to start the goat rearing business, and the goat farming business plan " PDF, Word and Excel. Goat farming is a lucrative business, providing income for millions of people, but there are some essential things you need to do before you venture into rearing goats for profit. You have to decide on the size of your goat farming project i. If you do not have a lot of capital, you can always start small and grow your goat farming project overtime, remember, Rome was not built in a day. You also need to carry out market research Who are you going to sell the goats to? What you need Land for Goat Farming Project A large enough area must be available for erecting the necessary goat pens. Assessment on the suitability of the plot for goat farming should be conducted. It is advisable to locate the project nearer to good roads as that will help minimize costs. This will also enable the farmer have easy access to and from the goat farming project. There should be a reliable source of clean water that can be used for both human and animal consumption, such as boreholes, rivers and dams. In case of inadequate water source, a reservoir could be constructed. Thus you have to put a strong fence around your farm to prevent the goats from escaping. Make the fence suitable enough for keeping your goats safe inside, and strong enough for keeping all types of predators or harmful animals outside. Goats require pasture to graze on. You should divide the pasture into different parts. To avoid over usage of pasture and the growth of less desirable forage, you should rotate the pastures where your goats graze on. This means that you should allow your goats to graze on one pasture while the other pasture is resting. The pasture should have various types of pasture plants or grasses. This will increase the food value and help to meetup all types of necessary nutrient requirements for goats. Your goat farming business plan should take into account the cost of purchasing or renting the land. Housing And Equipment for the Goat Farming Project There is need for you to have good housing so that you become successful and profitable in your goat farming business. Goats do not require expensive housing since they are very adaptive animals. The proper housing for goats should have good ventilation and a dry floor. The goats also need protection from the sun and rain, thus you housing should cater for that. Poor ventilation is bad to the health and performance of your goats. Extreme temperatures can reduce the productivity of goats. Poor ventilation may also lead to circulation of harmful gases which can cause respiratory problems to the goats. Good ventilation is required so that the right amount of fresh air is provided to all parts of the shelter, and to maintain the right temperature and the right humidity. The goat pens for your goat farming project can be constructed using clay bricks, wood or concrete blocks. Irrespective of the material you use to construct the goat pens, you should ensure that enough space is available for the goats, plus proper ventilation. The equipment required for your goat farming project include feeders and drinkers for feed and water for the goats. Your goat rearing business plan should outline the costs of housing and equipment needed for your goat farming project. The breeding stock consists of male goats which are known as bucks, and female goats which are known as does. When choosing breeding stock for goat farming business, you should be very careful of the health history of the goats. The goats which you select should be strong with an overall appearance of good health. Request to see the records of the breeding stock which you want to purchase. The growth potential of your kids will depend on the nature and quality of the parent stock. Thus it is of great importance to buy a good goat breeding stock from reliable goat farmers. The goat farming business plan should take into consideration the cost of buying the breeding stock. Breeds of Goats There are various breeds of goats which are used for commercial goat farming. A good Boer buck that is between months can service 25 does while a full-grown buck that is 13 months old can service 50 does in a year. The Boer Goat is considered superior because it has a good bone structure, large body size, grows fast,

heavy weight and can easily adapt to a wide range of pastures. Some farmers cross breed an superior breed e. This is in order to get the right quality of offspring with good meat quality, resistant to diseases, health and adaptable to various pastures. Feed for the Goats Feed is the largest cost of running a goat farming project. The most economical source of nutrients for meat goats are browse and pasture. In some cases, pasture and browse will be sufficient to meet the nutritional requirements required by meat goats. Goats are versatile, inquisitive and energetic in their feeding habits. Goats can adapt to different environments. They can consume over 80 different kinds of plants. Goats are browsers by nature, they are not grazers. However, they will also eat grass. A suitable area for the goat farming project should ideally have low bushes. Goats enjoy browse materials like trees, bushes, twigs and leaves. Even though goats will browse and feed on pasture, you will have to give them supplementary feed for you to be profitable in your goat farming business. Enough pasture might not be available throughout the year due to seasonal changes. To enable goats to grow fast and reach their full growth potential in a short time, you will have to give them supplementary feed. There are various kinds of supplementary feed you can give to your goats including hay lucernes , grains e. The goats also require sufficient water. The goat farming business plan should take into consideration the feed costs. The capital is required for constructing the goat housings, purchasing the breeding stock, purchasing supplementary feeds and other costs associated with running a goat farming business. The amount of capital you need for your goat rearing business will depend on the size of your goat farming project. Your goat farming business plan should clearly outline the money required to start and operate a goat meat production business. You can get a loan from the bank, or funding from investors, to use as capital to start your goat farming business. If you plan to raise capital from investors and a loan from the bank, you need a good goat farming business plan. Goat farming is very profitable, so if you reinvest the profits you get, you can quickly grow. Even if you are not planning to get a loan, you should still get a goat farming business plan to guide you in starting and operating the business. It is essential for you to have a goat farming business plan before you venture into the goat farming business, so that you know all the costs involved and you make an informed decision.

**Management And Labour for a Goat Farm** The number of employees you require for your goat farming project will depend on the size of your goat farming project. There may also be need for finance and marketing team, depending on the size of your goat production business. Your goat farming business plan should take into account the salary costs for all the people you are going to employ.

**Market** The market for goat meat is very huge and is ever increasing. The annual global demand of goat meat is 5 million tonnes. You can supply goat meat to abattoirs, local butcher shops, retailers, hotels, supermarkets, restaurants, wholesalers and individual consumers. The goat production business plan ought to include a proper marketing plan to use in your goat business. Goats can be kept for meat, milk, hair and fiber uses. **Chapter 7 : Sheep Farming Business Plan Guide | Sheep Farming**

*Is Goat Farming Business is Profitable? Check here Goat Farming Project, Profit and information for beginners There are numbers of goat breeds present, which can be raised commercially to earn money in a very short time period.*

Livestock Census, Starting Goat Farming In Pakistan Starting goat farming business in Pakistan can be performed through some easy and simple steps. I have tried my best to described the necessary steps for starting goat farming in Pakistan below. **Selecting Farm Location** Selecting a suitable location for your farm is one of the most important part of your goat farming business campaign. Select such a location where all types of necessary facilities are available. Fresh and clean water supply, pasture or proper grazing place, market for purchasing necessary commodities, easy complementary food supply, market near your farm for selling your products, proper veterinary service etc. While selecting farm land, ensure all those facilities are available in your selected land or area. For successful goat farming in Pakistan, make a proper decision of what type of products you are going to produce from your farm. You can commercially produce meat, milk, skin or fiber from your farm. According to the weather of Pakistan raising meat and milk goats are very suitable and profitable. **Selecting Breeds** High quality and healthy goat breed plays an important role in their overall production. Barbari, Chapper, Teddy and some other breeds are highly meat productive. You can select Pak Angora, Bilkaneri, Kaghani etc. All goats produce skin. But for commercial goat farming purpose making a suitable house or shelter for goats is a must. For commercial purpose, you can make a fully concrete house or concrete structure with adbestos roof. Always ensure a good drainage system and cleaning facilities inside the house. Ensure sufficient flow of light and fresh air inside the house. Always try to make south faced house. **Feeding Goats** are unbelievable creatures. They can eat and digest almost everything eatable which they find in front of them. But for good production you can feed them home prepared complementary food with regular green foods. Goats love to eat green foods and leaves. Natural goat food includes tree leaves, leaves of non-legume plans, fresh legumes, flowering, cereals, grasses, roots, silage, natural roughage, hays, dried leaves, fruits, legume seeds and many types of corns. Try to add some more minerals and nutrient elements with their complementary food. **Breeding** Breeding is also an important factor for successful goat farming business. Nowadays, most of the farmers are using artificial breeding process along with natural breeding. For successful breeding, gather enough information and study as much as possible about goat reproduction. Select healthy, diseases free fresh goats for reproduction. Proper care and managements are must for continuous reproduction. Goats are known as seasonal breeders. August ot March is considered as the usual breeding season of goat. Take extra care to the buck, selected for breeding purpose. **Grazing Place** Making a pasture or grazing place reduces the food cost and helps to keep your goats healthy. Make a fence surrounding your farm. This will prevent your goats from other animal and they will not be able to go outside. Only experienced goat producers can take extra or special care and management for their goats. Start raising goats and gradually you will learn everything related to goat farming. **Veterinary Facilities** Availability of proper veterinary service is very essential for livestock farming. Although, goats generally suffers less by diseases. But, you have to be sure about full availability of veterinary. This will help you if something goes wrong. **Marketing Products** Marketing goat products is very easy. In Pakistan, almost all major cities has proper facility for marketing your products. Goat milk and meat also very popular to the people of this country. Always try to sell your products in those market, where you will get maximum price. Selling goats during religious festival like EID will ensure maximum price. You can also apply your own techniques for marketing your products. Finally, you have learned a lot about goat farming in Pakistan. Let me know, if I missed to include something in this guide.

## Chapter 8 : How to Start a Goat Farm (with Pictures) - wikiHow

*Starting a Goat Farming Business: The following article is all about " Goat Farming Business" or "How to Raise Goats". Goat Farming. Goat is commonly known as 'Poor man's cow' in India and is a very important occupation in dry land farming system.*

Roles and Responsibilities Chief Operating Officer: Responsible for preparing financial reports, budgets, and financial statements for the organization Responsible for overseeing the smooth running of HR and administrative tasks for the organization Defining job positions for recruitment and managing interviewing process Carrying out staff induction for new team members Responsible for training, evaluation and assessment of employees Oversee the smooth running of the daily farming activities across the various farming sections. Responsible for managing boarding services, breeding services, dairy support services, livestock health services, farrier services, and shearing services et al. We know that if we get it right from the onset, we would have succeeded in creating the foundation that will help us build a standard goat farming business that will favorably compete with leading livestock farms in the United States of America and in the rest part of the world. As a goat farming business, we look forward to maximizing our strength and opportunities and also to work around our weaknesses and threats. Our strength as a livestock farming business is the fact that we have healthy relationships with loads of major players agriculture merchants in the livestock farming industry; both suppliers and buyers within and outside of the United States. We have some of the latest livestock farming machines, tools and equipment that will help us breed goats and other livestock in commercial quantities with less stress. Aside from our relationship network and equipment, we can confidently boast that we have some the most experienced hands in livestock farming industry in our payroll. Our weakness could be that we are a new livestock farms in the United States and we may not have the required cash to pump into the publicity of our business. We are aware of this and from our projection will overcome this weakness with time and turn it to a major advantage for the business. The opportunities that are available to us cannot be quantified, we know that there are loads of homeowners, and industries that will source for goats, goat meat, and milk and also industries that will source for the raw materials from our livestock farms both in the United States of America and other parts of the world. Some of the threats and challenges that you are likely going to face when you start your own livestock farm are global economic downturn that can impact negatively on household spending, bad weather cum natural disasters draughts, epidemics , unfavorable government policies and the arrival of a competitor a commercial farm that rear same animals as our livestock farms within same location. There is hardly anything you can do as regards this threats and challenges other than to be optimistic that things will continue to work for your good. They now find it easier to run both livestock farming and crop cultivation. Some even go ahead to include meat processing and packaging business alongside their product offerings; it helps them maximize profits in the agriculture industry. The fact that there is always a ready market for commercial goat farming makes the business ever green. As a matter of fact, one of the new trends in livestock farming industry is that with the recent advancement in technology livestock farmers can now improve the various breeds of the animals they are breeding. As a matter of fact, it is now easier for livestock farmers to comfortably import the kind of breed of domestic animal they want to breed from any country of their choice and also advancement in technology has made it easier to cross breed different animal. Our Target Market Naturally, the target market of those who are the end consumer of livestock farm produce and also those who benefits from the business value chain of the agriculture industry is all encompassing; it is far reaching. Every household consumes produce from livestock farms be it goat meat, goat milk, and the skin leather used for bags, belts and shoes production et al. So also a large chunk of manufacturing companies depends on livestock farms for some of their raw materials. In essence a goat farmer should be able to sell his or her farm produce to as many people as possible. We will ensure that we position our business to attract consumers of agriculture produce not just in the United States of America alone but also other parts of the world which is why we will be exporting some of our farm produce either in raw form or processed form to other countries of the world. Our

**Competitive Advantage** It is easier to find entrepreneur flocking towards an industry that is known to generate consistent income which is why there are more commercial farmers in the United States of America and of course in most parts of the world. For example, Statistics has it that there were 2. These goes to show that there are appreciable numbers of farmers in the United States of America but that does not mean that there is stiffer competition in the industry. This is so because part of the success of any nation is her ability to cultivate her own food and also export foods to other nations of the world. Jonah Livingston and Family Farms Ltd is fully aware that there are competitions when it comes to selling livestock and meats all over the globe, which is why we decided to carry out thorough research so as to know how to take advantage of the available market in the United States and in other parts of the world. We have done our homework and we have been able to highlight some factors that will give us competitive advantage in the marketplace; some of the factors are effective and reliable livestock farming processes that can help us sell our livestock and processed meat at competitive prices, good network and excellent relationship management. Another competitive advantage that we are bringing to the industry is the fact that we have designed our business in such a way that we will operate an all â€” round standard commercial livestock farms that will be involved in diverse areas such as animal rearing and meat processing and packaging plant. With this, we will be able to take advantage of all the available opportunities within the industry. Lastly, our employees will be well taken care of, and their welfare package will be amongst the best in the industry meaning that they will be more than willing to build the business with us and help deliver our set goals and achieve all our objectives as a standard commercial livestock farms with a meat processing and packaging plant. In view of that, we decided to set up a standard meat processing and packing plant to help us maximize profits. Over and above, we have perfected our sale and marketing strategies first by networking with agriculture merchants and companies that rely on raw materials from the livestock farming industry who are likely to refer become our customers. In summary, Jonah Livingston and Family Farms Ltd will adopt the following strategies in marketing our commercial farm produce; Introduce our business by sending introductory letters alongside our brochure to stake holders in the agriculture industry, companies that rely on the livestock farming industry for their raw materials, hotels and restaurants and agriculture produce merchant et al. Advertise our business and livestock farms in agro â€” allied and food related magazines and websites List our commercial livestock farms on yellow pages ads local directories Attend related agriculture and food expos, seminars, and business fairs et al Leverage on the internet to promote our business Engage in direct marketing Encourage the use of word of mouth marketing referrals Sources of Income Jonah Livingston and Family Farms Ltd is in the livestock breeding industry for the purpose of maximizing profits hence we have decided to explore all the available opportunities within the industry to achieve our corporate goals and objectives. In essence we are not going to rely only on the sale of our livestock to generate income for the business.

### Chapter 9 : Starting a Goat Farm – Sample Business Plan Template

*Goat farming business is a time-consuming business. You must learn about farm management, medication, and fodder cultivation, and marketing of your farm produces. Daily basis record keeping will help you in getting confidence about the financials of your business and revenue return.*

Goat Farming Business Plan – Introduction: This business plan may include right from land selection to marketing of goats. However, goat farmers should have complete knowledge before going to large scale commercial goat farming. The following write up details about important milestones in goat farming business plan implemented in stall-fed goat system. You can assume the same for dairy goat farming, meat goat farming or wool goat farming. The land requirement depends on the number of goats to be raised or reared. Usually, 10 acres of land is required to raise goats including shed construction area. If you are planning to start with minimal quantity of goats, for example 50 goats, it requires 1 acre of land for rearing these. Choose well ventilated site with well-drainage which is free from heavy winds, predators like wild dogs, wolves. Goat Farming Business Plan – Breeding: Select multi kidding capable goats with short duration. In Indian region, usually goats start conceiving in March to July as part of first season and July to August as part of second season. When it comes kidding periods, August month is for first season kidding and whereas January is second season is kidding. As part of goat farming business plan, it is important to choose male female ration properly. Commercial goat farming requires for every 20 female goats does, 1 male goat buck is required. Make sure to bring healthy and strong male for breeding. Most of the female goats start conceiving at the age of months. The gestation period carrying the kid in womb lasts for 5 to 6 months and lactation milking period lasts for months. Mostly on an average 1 reproductive cycle for every 8 months can be expected. Based on this, goats breed 3 times in 24 months period 2 years. For better weight gain and milk production or wool production, cross breeding of local female goats should be carried out with an exotic male goats. This will help goat farmers to rotate the money or expand the business. Goat Farming Business Plan. Construction of shed plays major role in successful goat farming. Generally there two parts of goat house or shed being termed, covered area and open area. The shed should be built based on number of goats that you are planning for. Each goat requires 10 square feet of covered area and 20 square feet of open area. The goat shed must be inclined with its length East–West and width North-South direction. Build walls and doors in East-West direction and North-South direction must be pen with mesh for sufficient air flow and cross ventilation. The goats should be kept in the shed in either groups or batches based on their age and health condition. The following feed formula should be treated under stall-feeding zero grazing system. In case of Lucerne feed, half 0. You can grow subabul trees in half acre land which is perennial and feed will be available throughout the year. In case of water problem areas, grow these required green fodder crops to make silage or feed in cut-form by using drip or sprinkler or rain gun system to conserve the water. Hence De-worming should be done once in 3 months on regular basis. The percentage of subsidy and the amount of bank loan depends on the amount of land you own or technical parameters submitted in the project report, generally small scale farmers owning less than or equal to 5 acres land avail more subsidy benefits. Contact NABARD or your local agricultural bank for more information about bank loan or subsidy in commercial goat farming business.
