

Chapter 1 : Goat Project Report-Osmanabadi Breed | Sheep Farming

Goat Project Report: In this article let us discuss about goat project report. Goats are among the main meat-producing animals in India, whose meat (chevon) is one of the choicest meats and has huge domestic demand.

A suitable and effective business plan is a must for starting any business. Make a clear and up to date plan before investing your money in this market. You can start goat farming business with a very small investment. But in the result you will get more profits than any other livestock farming projects. Goat Farming Business Plan For Beginners High profit within a very short time, little investment, huge global demand are the main reasons of spreading this business rapidly throughout the world. By visiting some farms and producers you will get some clear idea about the pros and cons of this business. This will help you running your business perfectly. Go to your nearest market and try to understand which goat products have a high demand in the market. Try to produce those products which you can sell easily in your local area and in the market. Otherwise you will lose money instead of being benefited. And your goats are producing milk highly. But there are a little or no goat milk consumer in your local market. Then what will you do with your production? So, always keep in mind this factor and try to produce those products which you can sell easily in your local market. If you have a good facility of marketing your products internationally then you can produce any product from your farm. Nowadays goat meat has a great demand internationally. And this rate is increasing rapidly day by day. If you have sufficient facility of selling goat meat in your local market then you can start raising some highly meat productive goat breeds. Boer , Beetal , Matou, Black Bengal etc. As a result it has huge demand in local and international market. Goat milk is also very suitable for making all types of dairy products. If you can sell goat milk in your nearest market easily then you have to choose some highly milk productive goat breeds. If you want to produce fiber from your farm then Cashmere and Angora goat are very suitable. Both are highly fiber productive. All goat breeds produce skin. But few of them produce high quality skin. For business purpose Black Bengal goat produces high quality skin. And their skin has a high demand and value in the international market. Before start raising goats for skin be sure that there is a market available for selling your product. Some crop farmer uses goat manure in their field. It is a very high quality organic fertilizer. Goat Housing Commercial goat farming needs suitable house for profitable production. You should make such a house which can provide all types of facilities for your goats. Good house keeps the goat healthy and free from diseases. This directly increases the production. So, before starting consider how comfortable house can you make for your goats. Investment in housing is fixed. And you can use one house for several years. Feeding Goats Goats are ruminants. They eat almost all types of crop, corn and leaves. In this system your goat will get food from natural sources and it also reduce your food cost. In case of raising goats by providing them home made supplementary feed be sure that all feed elements are easily available in your local market. Also ensure sufficient supply of clean and fresh water. Sometimes your goats may suffer by various diseases. If possible stock some necessary vaccines and medicines in your farm. And always vaccinate your goats timely. Before starting goat farming business, ask some questions to yourself. Do you love goats? Loving the animals that you are raising is very important for success-fulness in any business. Do you have any experience in this business? If not, contact with your nearest animal husbandry training centers or visit some farms. Do you have enough capital for setting up your farm? You can also apply for bank loan. Do you have enough facilities for goat farming? For example clean and fresh water source, cultivation of green feeds like plants or grasses, proper marketing, medication etc. What is the market condition of your location? Try to understand the market demand and price of your products. This is very important for beginners. Can you personally take care of your goats? Try to take care of your goats personally along with your labors. Learn more about their health and diseases management. If possible visit some farms practically for several days and try to learn everything related to this business. Before starting goat farming business plan consider your budget and some other factor related to this business. How much capital do you have? How many facility can you provide to your goats with this capital? Which product do you want to produce from your farm? What are the natural facilities available there for goat farming? Is there any market for selling your products in proper

price? Is there any grazing place near your farm? Can you provide proper treatment and medicines?
Wish your happy and profitable goat farming business.

Chapter 2 : goat farming project report, +5 .goat farm business plan

Goat Farming Project Report: The following write up is about "Goat Farming Project Report". Goat Farming Project Report- Introduction to Goat Farming Project: Well, anyone who wants to start a commercial goat farming should have basic knowledge of goat farming set up and running cost and net profits.

It is very important to read any kind goat project report to understand the components and implement at your farm. This project report also gives you a rough idea of one time set up cost and yearly running cost. You can analyse the report for further optimization for good profits in goat farming. The following goat farming report can be used as Boer goat farming project report or Osmanabadi goat farming project report or Jamunapari goat farming project report or Beetal goat farming project or Surti goat farming project report or Black Bengal goat farming project report or Beetal goat farming project report though it shows the Sirohi goat model project. The inputs like cost of goats and feed intake will be different, you can apply goat cost and feed intake cost in the report and calculate for any goat breed project. This is a commercial goat farming project report which contains total of female Does Sirohi goat breed and 6 male Sirohi goats Bucks. Usually, any commercial goat farming takes 3 to 4 years to give you to the breakeven point. So please calculate the figures according to this plan. Though there is some capital cost involved in first year and profits are on negative side, subsequent years should get you into profit zone. Goat Farming Project Report. We assume you already own the land hence land cost is not included. Proper location, road access, water facility are assumed. To grow your own green fodder for regular needs or silage needs, you must have fertile soil with proper irrigation. Buying goat feed is not advisable as it eats all of your profits. We assume of growth rate as 1: We assume, you have already visited other goat farms to study the goat fodder management and housing system, goat care and cascading male goats bucks. Etcâ€¦ Assume we are not adding any insurance for goats or personal vehicle You can include if you really want. We assume that the manure from livestock goats is being used for growing green fodder or selling out side for some extra income. You can make silage using the green fodder and use this nutritious silage in dry periods. Never sell or use goat milk for personal reasons. In goat breeding business, this milk is very important for goat kids at least for 3 months. It is a good idea of buying pregnant goats which can deliver kids in 45 to 60 days. We advise you to build a goat shed with minimal expenditure. Once you become successful in goat business, you can expand as per your requirement and wish. The goat farm will initially hold female goats of Sirohi breed Does and 6 breeding bucks male goats. Feeding cost of Goats is taken Rs. We assume that Deworming of the goats are done for every 2 to 3 months.
