

Chapter 1 : Las Vegas Hotel and Casino | Golden Nugget Las Vegas

The New Yorker, January 14, P. ONWARD AND UPWARD WITH THE ARTS about curator Thelma Golden Golden is the person colleagues ask to help with the seating plan for a black-tie dinner.

Mail icon Last year the wall fell victim to development, replaced by a yard of neatly trimmed grass hemmed by pencil-thin trees and a wooden country fence. Each year, authorities say, six to 10 murals in the city are torn down or obscured by new development. So enjoy the art in your neighborhood while you can: With the city undergoing a construction boom, more murals could be threatened. The mural celebrates the success of Philly schoolchildren and depicts several kids reading and studying. The sale of the William Penn property was finalized this year. He said he had helped Pennrose Development, a private developer known for several affordable and market-rate housing projects, demolish the building. Lee Reedy, vice president of marketing and communications for Pennrose, said the company demolished its building because it was dilapidated, had structural deficiencies and attracted crime. For inspiration, he listened to John Coltrane CDs. Moore once said on a wall on his namesake avenue near 17th. It was demolished in and replaced by rowhouses. The mural was torn down last year and apartments are being built at the site. Moore Avenue near 18th until it was demolished. But the building on which it was painted was demolished in to make room for the story Comcast Center. The building was demolished and a multifamily house was built in its place. Guinn later created another fall-themed mural, "Autumn Revisited," on Catharine Street near 8th, in which the children depicted in the first mural are shown as adults. Before Comcast Center Golden said she met with a vice president of Liberty Property Trust, the Comcast Center developer, and "appealed to him from a moral standpoint. Golden called this interaction, in which a developer offered to help the Mural Arts Program after a mural was pushed aside by progress, "a model for developer relations. Experts say that some demolished murals can be recreated on different walls. Even the Coltrane mural is a candidate for recreation. Golden said it would be in another spot in Strawberry Mansion. But what they really need to hear is this message:

Chapter 2 : Free Wedding Templates psd

In , an online community was established consisting of people from all walks of life. Together they collaborated on creative projects and traversed many game environments. The community was named Utopia Skye to symbolize the happiness & limitless abilities of its members.

Plot[edit] Annie Clarke and Chris Harper live in the village of Knapely, where they spend their time at the local WI and with each other. Her proposal initially is met with great skepticism, but she eventually convinces ten women to participate in the project with her. They enlist one of the hospital workers, an amateur photographer named Lawrence, to help them with the concept. The initial printing quickly sells out due to popular demand which causes a huge wave of massive media attention from across the nation. All the publicity surrounding the calendar has taken a toll on their personal lives and, during a photo shoot for washing powder, the tension boils over, with Chris and Annie lashing out at each other in angry frustration. All is resolved eventually, and the women return home to resume life as it was before they removed their clothing for the camera. Modelled after real-life "calendar girl" Tricia Stewart, [4] Mirren has described Chris as a "dash in" character who shared similarities with Stewart but was actually not based on her real persona. She is the official organist of the Knapely WI. Annette Crosbie as Jessie, a retired teacher. Wilton initially rejected the offer to join the project as she refused to be filmed semi- naked. The penultimate shot of Chris and Annie walking down a street was filmed in Turville. Interiors were filmed in the Shepperton Studios. The pictures in the film-version calendar were taken by professional stills photographer Jaap Buitendijk. Nothing could have prepared them for the way their original calendar took off. It was released on 12 April and became a runaway success, selling out in the first week. Nine months after its launch, the calendar had sold 88, copies. That year the calendar sold , copies. Proceeds from the calendar were used to fund lymphoma and leukaemia research in new laboratories at the University of Leeds. They are available online and in selected outlets. Of the project, Angela Baker has said, "We are constantly amazed at the response we had, and still get, to our calendar. I cannot believe that we were able to raise so much money and I am delighted that it is being spent on such worthwhile research. I know that John would be tremendously honoured to know that we have achieved so much in his name. The film concludes with a dedication to the late John Baker, the real name of the John Clark character. In a comedy sequence, the ladies in the film interview a series of potential photographers. Also, the film suggests that local and national WI branches were opposed to the calendar, but there was actually emphatic support for the project from those bodies. She said that the "calendar did expose certain jealousies and insecurities among the women. That the movie works, and it does, is mostly because of the charm of Mirren and Walters, who show their characters having so much fun that it becomes infectious. The films share a wonderfully British wry humor. But even humble plastic-wrapped cheese has its virtues and so does this film, which for its first hour hums along principally by virtue of many, many shots of the verdant Yorkshire Dales and the professional good graces of its cast. Chief among those graces are Helen Mirren and Julie Walters, two well-matched and criminally underused actresses who Although they have little to do but grin and bare it, Mirren and Walters are delightful company. The humor has a typically British, offhanded flavor, and the essentially simple story plays more as a multi-character rondo on a single idea. For every laugh-out-loud moment, or eccentric touch, there are equal moments of reflection and pause Despite an uncertain start in establishing a consistent comic tone, pic builds into an engaging, light character comedy, played somewhere between the Ealing tradition and contempo regional comedy. The result is half a great British screen comedy, twice as much as one usually expects from the genre nowadays Ultimately, however, this remains an immensely likeable and often impressive romp. Awards and nominations[edit].

Golden Retriever calendars at calendrierdelascience.com! Whether a wall, desk, or engagement, we have it with Golden Retriever.

And what luck, they all turn into gemstones! Putting Delhi on the map of Indipop. Arneja ONCE A three-year-old kid listening to the beat of a band party at a marriage ceremony ran away to closely observe the power of the music that left him spellbound. And it was that passion that eventually made him an unforgettable name in the world of Indipop. Jawahar Wattal was that young boy, many many summers ago. Now, he is a household name across the country with youngsters swearing by his work. It was his philosophy of "create something different to inspire in place of inspire to create" that worked wonders for him. Surrounded by all the great names of music, treading the path of glory was not a cakewalk for this black belt in martial art and an MBA in Advertising and Marketing. Jawahar Wattal is best known as a pioneer in the Indian pop scene and for putting Delhi on the map of the Indian music industry. After his first foray into professional music - he composed in-flight music for the domestic carrier Indian Airlines - there was no looking back. There was hardly a place untouched by his magic. These have included everything from Punjabi bhangra to Rajasthani folk, Christmas carols to Sufiana and ghazals, and even a pop album in Tamil. Wattal, dressed in his favourite blue denims adds, "So far I have composed 72 music albums, out of which 15 went platinum, not to mention the prestigious Channel V award for the best music composer in - competing with A. But quite unfazed with his popularity and matchless success Wattal is still a very simple person with his feet firmly on the ground. As he puts it, "Being simple is the best. Life is being yourself. My mission is to spread the message of love and friendship through my music. He is quite disheartened by the ongoing trend of the Indipop industry. None of them has patience to wait. Overnight they want stardom and run after money. One should empathise with music and make it reachable and understandable to everyone, be it kids or old people. Music is a sadhana and not business. It is good to stick to your basics and do regular riyaz to improve skill.

Chapter 4 : Silva Provides the Golden Touch - latimes

Get this from a library! King Midas: the golden touch. [Demi.] -- A king finds himself bitterly regretting the consequences of his wish that everything he touches would turn to gold.

Now it wants respect. The laptop--thinner and lighter than a Sony Vaio--made such an impression on Dell that he sent one of his executives from Japan to South Korea to get a better look. Now Samsung is making a similar model that will soon be sold in the U. And Dell himself, a spokeswoman confirms, travels with a Samsung-made laptop. Now, he says, "we can be No. Sony has been limping along, barely profitable. Instead, Samsung Electronics has become a truly innovative company, creating cutting-edge technology across a spectrum of product lines, including combined cellphone and handheld devices, flat-screen TVs, and ultrathin laptops. It has built strong positions in memory chips the world leader, thin-film displays first, again, and wireless communications fourth in handset production. The company has already established its brand as a top-of-the-line choice for consumers in places like Russia and China. And it is a valued partner to U. But Samsung wants more: It wants to be seen in the West as just as good as, say, Sony. That may sound like a small thing, but it says a lot about the cultural revolution that is continuing to transform the company: The three are front-runners to replace Yun when he retires in a year or two. On the street, though, it seems everyone does, from street sweepers to CEOs. Twentysomethings with red-streaked hair use seriously fast broadband connections to play online war games. More than half of Korean households are broadband subscribers, compared with 2. Samsung has been able to use its home-field advantage as a kind of test market for the world. Gartner Dataquest says Samsung has just nudged Siemens aside to become the No. To make itself look and operate more like a Western-style multinational, Samsung Electronics has opened its operations to foreigners and appointed three non-Koreans to its board. That means, for example, that the Samsung Group will be much less likely to ask Samsung Electronics to cross-subsidize money-losing subsidiaries or to engage in the kind of incestuous financial dealings that drive foreigners to drink--or worse, to disinvest. To manage all that, it has devolved decision-making to its global brand managers. In the old days any question more important than what brand of pencil to buy had to be made at the highest levels in Seoul. And it was just after Chin returned to Korea from an eight-year stint in the U. He wanted a challenge, he says, instead of a life in the IBM "country club. The industry was depressed, the company was years behind the competition, and Japan Inc. Worse, Chin ran smack into the hierarchical and deferential Samsung culture--itself an imitation of Japanese management methods. Full of ideals and more than a little attitude, Chin was essentially told to keep his mouth shut. So I asked questions. People blushed and turned red. I just kept asking questions. So Chin took advantage of that by hiring a large number of Korean Americans and Koreans with American experience. The result was a more aggressive, shoot-from-the-hip style. And he drove his people relentlessly to improve manufacturing techniques. By , Samsung Electronics ranked No. Samsung Electronics made another savvy bet in the mids. It took some of the profits its chips were generating and put them into wireless communications, producing its first handset in . But apart from its maverick semiconductor division, the company remained locked in its traditional ways. The culture, he recalls, was "complacent. During the Asian economic crisis that began in , the Korean economy went into a tailspin. By July , Samsung Electronics was losing millions of dollars a month. Then they all wrote resignation letters and pledged to resign if they failed. Yun reduced inventory levels, cut costs, sold nonperforming subsidiaries, and even got rid of golf club memberships. In a sharp break with the Japan-inspired tradition of lifetime employment, he fired a number of senior managers, creating job openings for younger, feistier, English-speaking leaders. That year, Yun asked Chin to take over the digital media division, the Samsung unit that makes computers and consumer electronics. And he pushed them to develop a combined cellphone and handheld computer, one with a screen big enough to browse the Web. To accomplish both goals, he summoned engineers and designers from across the company. The device has a five-inch screen, large enough for a user to access an Internet site and read a whole page without too much eyestrain. But as engineers whittle it down, Chin is optimistic that demand could reach two million units within a couple of years. One Samsung product that has already hit the U. In terms of both design and

functionality, Samsung Electronics is "pushing the envelope in the wireless industry," says John Garcia, a Sprint senior vice president in Kansas City. The alliance with Sprint may help Samsung overcome one of its biggest frustrations in the U. The goods piled up and then had to be discounted, reinforcing the cheap-brand image. Now Samsung is putting serious money into changing that perception. It consolidated its 55 advertising-agency accounts into one and came up with a campaign of surreal ads featuring a hauntingly beautiful woman whom Samsung refers to as the "snow woman. In another move to upgrade its image, Samsung is pulling out of big discount chains like Wal-Mart and Kmart, which emphasize price over quality, and moving products like DVD players, televisions, and computers to Best Buy, Circuit City, and other specialty stores. The efforts are beginning to show results: As Samsung moves upmarket, though, the scale of its challenges also increases. Now that it is creating more of its own technology and upgrading its brand, its relations with customers and allies will become more complex. Managing a path between those feuding giants will require a delicate balancing act. The American economy shows signs of recovering. The trick will be to decide how to invest the profits and how to stay focused. But then, Samsung knows this. Its whole corporate culture is intense. Chin tells the story of a recent golf outing that he and other executives were on with Yun. Whenever they finished a round, there would be an awards ceremony at which winners were encouraged to drink "atomic shots"--beer spiked with hard liquor. On this occasion, Yun donated an expensive driver for an auction: The bidding reached ten shots. Everybody thought that was the outer limit. But Chin, who hates to lose, upped the ante. He and six of his executives blew the other guys away by pledging and then downing them. Management at Samsung has proved it can deal with adversity.
