Chapter 1 : Hamlyn Guides | Awards | LibraryThing

The Hamlyn Guide To Wild Flowers Of Britain And Europe has 4 ratings and 1 review. Bionic Jean said: A superb handy reference book to wild flowers. The.

A new, unread, unused book in perfect condition with no missing or damaged pages. Like New A book that looks new but has been read. Cover has no visible wear, and the dust jacket if applicable is included for hard covers. May have very minimal identifying marks on the inside cover. Very minimal wear and tear. Very Good A book that does not look new and has been read but is in excellent condition. No obvious damage to the cover, with the dust jacket if applicable included for hard covers. Good A book that has been read but is in good condition. Very minimal damage to the cover including scuff marks, but no holes or tears. The dust jacket for hard covers may not be included. Binding has minimal wear. The majority of pages are undamaged with minimal creasing or tearing, minimal pencil underlining of text, no highlighting of text, no writing in margins. Acceptable A book with obvious wear. May have some damage to the cover but integrity still intact. The binding may be slightly damaged but integrity is still intact. Possible writing in margins, possible underlining and highlighting of text, but no missing pages or anything that would compromise the legibility or understanding of the text. Ex-library books are always noted as such regardless of condition. Additional terms used in our descriptions: Boards are the actual hardcover material of the cover, front and back. Bookplate is usually a square illustrated sticker on which an owner writes his or her name, or on which the author has signed his or her name. Bumped refers to the bent or rounded corners of the boards. Browning or tanning refers to brown or tan looking pages or page edges that appear in some older books. Chip is a tiny piece missing from the edge of the dust jacket. Closed tear is a tiny rip in the dust jacket, but no material is missing as in a chip. Cocked means the book is no longer square. If laid down, the book appears to be pushed slanted forward or backward from the spine. Creasing is where the dust jacket or pages have been bent, and then returned to its original state. Dampstain is a tan or gray stain resulting from water or other liquid damage. End papers or pastedowns are the sheets of paper pasted onto the inner covers, joining the book block to the covers. One side of the sheet is pasted to the inside cover, the other is left free see FFEP. FFEP stands for front free-endpaper. This is the first page of any book. Though usually blank, it is a common place for an inscription. Foxing is the term used for the rust colored spots which occur on paper. This is the result of oxidation of both organic and iron impurities left behind during the paper making process. Front, top or bottom edge: These are the outside page edges. Loose is what happens to a book which has been read several times. The cover easily flaps open and the pages do not return to a tight condition. Heal or tail is the bottom of the spine. Head is the top of the spine. Mass-Market paperback is the most common paperback book, about four inches wide and seven inches high. Mylar cover is the clear film that most fine bookshops use to cover and protect the dust jackets. Spine separation occurs at the head top of the spine where the fingers grab and pull the book from the shelf. After repeated pulling, the glue holding the outer spine board to the inner binding separates. Stiff wraps are the outer covers of a softcover paperback book or pamphlet. Sunned is the fading of paper or binding as a result of sun exposure. Trade paperback is a softcover book, which is generally large in size and made of better quality materials than a Mass-Market paperback. Wraps are the outer covers of a softcover paperback book or pamphlet. See my other listings for more great items!
