*How Llama Saved the Day: A Story from Peru (First-Start Legends) [Janet Palazzo-Craig, Charles Reasoner] on calendrierdelascience.com *FREE* shipping on qualifying offers. A Peruvian rendition of the Great Flood story in which a llama warns the people and animals to seek shelter on the highest mountain to avoid the rising flood waters.*

While, on the whole, every hero class is pretty good at everything you need to do in Fortnite, each one has a specific set of skills you may find makes playing them more enjoyable if you make use of them. Soldiers are focused on multi-purpose damage dealing, with bullets that debuff enemies, and the ability to throw grenades and place mines. Constructors can build structures faster and more cheaply than other classes, and are able to shrug off more damage thanks to a larger health pool. Ninjas are the fastest, most nimble characters, and are well suited to melee combat thanks to their sword combo perks. Outlanders are scavengers, best used for finding the rarest items. They find treasure chests easier than other classes, and the quality of loot inside will be better. Running short on supplies? Play one of your Outlander heroes. Hoping to build an epic castle? Go with a Constructor. There is more to heroes than simply picking one to play. Better graded heroes start with higher stats and can learn additional abilities beyond those of their lower-ranked alternatives. These provide you with a pool of resources to spend on any hero you fancy. A character can initially be levelled up to level ten. These elusive manuals are time consuming to get as they require a hero to be retired. This is, essentially, exchanging your heroes for special items, including a training manual. This means every quest is split into two phases, with a variety of things to do in each. Pretty much everything in Fortnite can be destroyed and turned into materials, be it a tree, a car, or an entire house. Smashing away at these things will add wood, brick, and metal to your inventory. Searching things like drawers and cupboards in houses will provide these, while more complicated structures like cars will also drop components when smashed. The drop rate is pretty low, though, so be sure to smash and search frequently in order to keep your supplies topped up. On your collecting travels you should also be on the lookout for survivors. Be on the look out for treasure. There may be treasure-laden caves beneath the floorboards. If you see a little purple ghost popping out of a portal in the ground, go bop him on the head. Similarly, if you see a radar tower blueprint, fix it up. They sleep in the day, but will be more active at night. The assault phase Scouring the map for goodies should have led you to the defence point. Forts are very easily constructed using a combination of walls, floors, stairs, and roofs. From simple shacks to elaborate castles, you can pretty much build anything. You need to fend off the incoming waves of undead. Consider what angles zombies could approach from, and what your line of sight is like. Build around the requirements of the specific map. Think about zombie behaviour, too. They run straight for your fort, so building a maze of walls before they make it to their target will slow them down significantly. You can fill your fort with all kinds of deadly devices, from simple wooden spikes to tesla coils and dart launchers. If zombies start hurling projectiles over your walls and onto your objective, you can always build higher walls, or add a roof. Walls can be quickly repaired with a tap of a button, too, which is faster than rebuilding them from scratch. If a tree or building is blocking your line of sight, knock it down. Rely on human teammates, not AI-driven defenders. Hold R to craft new ammunition if you run dry. Fortnite Save the World llamas and loot Fortnite is a loot-driven game. There are two key methods in which you earn new goodies: The most basic loot comes from chests – these are awarded at the end of every quest. Completing optional objectives in a quest, such as building radio towers, or completing in under a set number of days, will increase the amount of XP you earn, and thus the quality of loot chest awarded. Loot chests are filled with basic staples; things like materials for crafting, XP chips for upgrading heroes and items, and survivors to populate your squads with. The best stuff comes from llamas. These are pinatas stuffed full of top-notch gear, from weapon and trap schematics, to new heroes, defenders, and more XP chips. Unlike loot chests, llamas must be bought. The standard ones cost Vbucks each. Fortnite Save the World skills Fortnite has several progression systems and core among them are your skill trees. T stats fortitude, offence, resistance, and tech. These reflect,

respectively, your health, damage, shield, and technologies. Unlocking nodes on your skill trees that increase your F. T stats will provide an overall boost for your heroes. Improving tech, for example, will boost the damage done by traps you place, regardless of which hero you use. There are two upgrade paths, each with a unique manner of progression. The skill tree, focused on notably beefy additions like new active abilities and chunkier stat boosts, uses skill points earned through XP gained at the end of quests. The research tree is more of a trickle effect, gradually pushing extra points into your core F. Upgrades are purchased using research points, which slowly accumulate every hour. Each survivor has their own set of stats and can band together to form Survivor Squads. These teams offer another way to improve your F. T statistics, allowing you greater health pools, increased damage, improved shields, and enhanced technology. Each different squad improves a specific F. For example, the EMT Squad will improve fortitude, for both yourself and your co-op team. For example, doctors are ideal for the EMT squad, and will provide a better bonus than a non-qualified survivor. Defender Squads are made up of AI Defenders, who can be summoned into battle during your quests. Defenders come in five varieties, and are designed to use specific weapons: Consider the kind of support you want, and arrange the squad accordingly. Expedition Squads are teams that head out on missions to gather resources. Importantly, the people who make up these squads are hero characters, not survivors. Each mission has a difficulty rating and a power requirement. Easier missions may be achieved by a single hero, while others may require you to send two or three. Heroes will be out of action for a while as they complete the task often for more than an hour, but if they return successful they will add a bounty of new materials to your stocks. Expedition missions also require vehicles, which are unlocked on the skill tree. Fortnite Save the World weapons Your armoury is where you keep your guns and traps. Or, more accurately, where you keep your schematics. Schematics, which are found inside llamas, are the recipes you use to craft new items. Your account can only hold up to schematics at one time so be sure to effectively manage them. An effective way to free inventory space is to put duplicates in your collection book; this removes them from your inventory for good, and will reward you with new items. Like heroes, schematics can be levelled up. Higher level schematics produce improved items with better stats. Simply use your pool of schematics XP chips to upgrade your recipes. When in-game, you will find that your weapons degrade as you use them. A broken weapon will simply disappear, you see, while recycling even heavily damaged ones will yield valuable crafting resources. Be wary of your in-game hero inventory, too. You can only hold up to 50 items so you should keep it down to the essentials. Traps are expensive to build, and only crafting exactly what you need will preserve your resources and keep your inventory tidy. The layers and layers of menus should make sense now, and you definitely know your loot chest from your llama. Good luck in your fight against the undead husks!
