Representation of the Duncker Candle Problem. The first type of problem forces participants to use objects in a way they are not accustomed to thus, breaking their functional fixedness , like the "Duncker candle problem". Spatial ability[edit] The second type of insight problem requires spatial ability to solve, like the "Nine-dot Problem". Following training, one group was tested on the insight problems after sleeping for eight hours at night, one group was tested after staying awake all night, and one group was tested after staying awake all day. Those that slept performed twice as well on the insight problems than those who stayed awake. This provides evidence that the right hemisphere plays a unique role in insight. This conclusion has been supported also by eye tracking data which shows an increased eye blink duration and frequency when people solve problems via Insight. This latter result, paired with an eye pattern oriented to look away from sources of visual inputs such as looking at blank wall, or out the window at the sky proves different attention involvement in Insight problem solving vs problem solving via anlaysis. Additionally, while incubation improves insight performance for individuals, it improves insight performance for groups even more. It was found that participants who ranked lower on emotionality and higher on openness to experience performed better on insight problems. Men outperformed women on insight problems, and women outperformed men on non-insight problems. However, those of lower intelligence benefit more than those of higher intelligence from being provided with cues and hints for insight problems. Generally, they were able to predict this fairly well for non-insight problems, but not for insight problems. Naturalistic settings[edit] Recently, insight was studied in a non-laboratory setting. It was found that insights that occur in the field are typically reported to be associated with a sudden "change in understanding" and with "seeing connections and contradictions" in the problem. For example, insight in nature was often rather gradual, not sudden, and incubation was not as important. Animals[edit] Studies on primate cognition have provided evidence of what may be interpreted as insight in animals. In one of his experiments, apes were presented with an insight problem that required the use of objects in new and original ways, in order to win a prize usually, some kind of food. He observed that the animals would continuously fail to get the food, and this process occurred for quite some time; however, rather suddenly, they would purposefully use the object in the way needed to get the food, as if the realization had occurred out of nowhere. He interpreted this behavior as something resembling insight in apes.

He had wonderful gifts of insight, and spoke to the birds. You have any insight into why my power is jacked up? Even so, it was more insight to the relationship he had with his parents than he had ever shown. If you are asked, you can give them insight into their future, so long as you do not reveal everything. Damian might have some insight into what was going on, and who the Magician was. This will likely not ever be perfect, but any insight it can offer us is a gain. No silver bullet is in this chapter, no "aha" insight that will instantly persuade you. His protest, it is needless to say, was unavailing, and all who respect his memory must regret that the sunset of life failed to give him that insight into the future which is poetically ascribed to it. Bruce, with the insight of military genius, seized his opportunity. But no carefully devised calculus can take the place of insight, observation and experience. He showed remarkable insight on the topic considering he had just started learning about it. He is a manager with great insight. He will help this company go far. Our artificially-established classifications collapse whilst we gain further insight into the mutual affinities of the existing groups. Although Ken wrote much poetry, besides his hymns, he cannot be called a great poet; but he had that fine combination of spiritual insight and feeling with poetic taste which marks all great hymnwriters. The biography gave a fresh, new insight into the life and times of William Shakespeare. In him Orange was to find an adversary who was not only a great general but a statesman of insight and ability equal to his own. But, imperfect as such statistics may be, they give us at any rate some insight into the direction of governmental legislation. The Christians suffered from systematic persecution, and many historians, with a strange lack of historical insight, have poured denunciation upon him for an attitude which was the natural outcome of his convictions. It shows a clear discernment of the dangers of the ascetic life, and a deep insight into the significance of the Augustinian doctrine of grace.

As this is a generally available feature not a preview feature like Composite Models , I assume many Power BI report authors and users will be interested in enhancing their reports to support more complex and dynamic business logic. Based on guidance at the Business Applications Summit , other properties of Power BI reports will support expression-based dynamic formatting in the future. Distinct Formatting by Product Category Like many real-life businesses, there are multiple sales channels in the AdventureWorks sample database and these sales channels Internet Sales, Reseller Sales have very different profit margins across product categories per the following table: Margins by Sales Channel and Product Category For the conditional formatting to be useful, therefore, it needs to be specific to the given product category and sales channel. Conditional Formatting Requirements Ideally the consumers of the report or representative s of this group have a clear understanding of the thresholds. From a visualization perspective, for this simple example we want three possible background colors Green, Red, and White and two possible font colors White and Gray. High and low values the exception products will be assigned Green and Red background colors, respectively, as well as White font colors to help these values stand out. Of course you may need or want more formats reflecting more conditions. DAX variables can be used to make the logic as flexible and readable as possible. If your report uses a live connection to a Power BI dataset or an Analysis Services Tabular model, you could also create this formatting measure specific to the given report report-level measures. Additionally, three color values hex codes in this example are also stored as variables. A variable is also used to determine if a single product one business key is in the filter context. Without this function, the variable would return the margin rate for the given product in the cell being evaluated and thus no products would be formatted as green or red. The subsequent three conditions Values apply formatting specific to a given single product within a product category. For example, without any filter on Date, the Bike thresholds will be The Bikes rate for the year , however, is An example of this is provided at the end of Step 5. Therefore, we need a separate DAX measure to return either White or Gray via hex code or color name to drive the font formatting. Values within the thresholds will receive the default Gray font color. Now you simply need to create a table or matrix visual and associate the measures created in Steps 2 and 3 to the field which you want to format. In general I try to minimize the use of strong colors to avoid overwhelming the user. Expression-based Background Color Formatting Repeat this same process for font color conditional formatting but choose the measure you created for font colors in Step 3. The accessories product is not formatted white background, gray font since Finally, three bike products are all formatted differently given the lower and upper boundaries of The Product Name and Product Category fields are included in this example just to make it easier to understand what is going on with the formatting. For example, the Road product was still at For example, you could let a user choose whether to apply conditional formatting based on profitability or sales growth. Similar to other user interfaces in other tools, the conditional formatting user interface does not provide access to hidden measures. With a little or potentially not so little DAX expression logic, you can embed rich business logic to help users more quickly gain insight from the data being analyzed. Currently the plan for next week is to integrate bookmarks and buttons with expression-based conditional formatting.
