Chapter 1 : International Baccalaureate Diploma Programme (ibdp) In Malaysia

The International Baccalaureate® (IB) Diploma Programme (DP) is for students aged 16-19. Find out more about the Diploma Programme (DP), including information on pathways to university and employment and on who can offer the programme.

The computer science elective courses were moved to Group 4 as a full course from first examinations in 2007. Courses offered at both SL and HL: Environmental systems and societies SL is an interdisciplinary course designed to meet the diploma requirements for groups 3 and 4, while Literature and Performance SL meets the requirements of Groups 1 and 6. The externally assessed examinations are given worldwide in May usually for Northern Hemisphere schools and in November usually for Southern Hemisphere schools. Each exam usually consists of two or three papers, generally written on the same or successive weekdays. For example, in Chemistry SL, paper 1 has multiple choice questions, paper 2 has extended response questions. Paper 3 focuses on the "Options" selected by the teacher and data analysis questions. The grading of all external assessments is done by independent examiners appointed by the IB. There may be oral presentations used in languages, practical work in experimental sciences and performing arts, or written work. Internal assessment accounts for 20 to 50 percent of the mark awarded for each subject and is marked by a teacher in the school. A sample of at least five per subject at each level from a school will also be graded by a moderator appointed by the IB, in a process called external moderation of internal assessment. Based on this moderation, the grades of the whole subject from that school will change. Up to three additional points are awarded depending on the grades achieved in the extended essay and theory of knowledge, so the maximum possible point total in the IBDP is 45. Candidates must also receive a minimum of 12 points from their Higher Level subjects and a minimum of 9 points from their Standard Level subjects. The Candidates with Special Assessment Needs publication contains information regarding procedures and arrangements for students with special needs. At the end of the application process, IB conducts an authorisation visit. For the purposes of university admissions in Austria, the IB diploma is considered a foreign secondary school leaving certificate, even if the school issuing the diploma is in the country. Admission decisions are at the discretion of higher education institutions. Students must have either Group 1 or 2 or both at HL; mathematics Standard Level minimum; and at least one science or mathematics course at Higher Level. As of 1 June, IB diploma holders no longer need to pass the University Entrance Examination to be admitted to Spanish universities. The Russian Ministry of Education considers the IB diploma issued by state-accredited IB schools in Russia equivalent to the certificate of secondary complete general education attestat. Most universities in the UK require IB students to take more courses than A-level students—requiring, for instance, four As and two Bs from an IB student, whereas an A-level student will only need an ABB—because each subject taken as a part of the IB gives a less broad coverage of a similar subject taken at A-level. Although every university in Australia accepts the IB diploma, entry criteria differ from university to university. Some universities accept students on their IB point count, whereas others require the points to be converted. However, the Ministry of Education may grant partial equivalence to national diploma for students who have satisfactorily completed the fourth year of high school in the country. University requirements are as follows: In India, the Association of Indian Universities recognises the IBDP as an entry qualification to all universities, provided that the applicants include a document from the IB detailing percentage equivalency and that specific course requirements for admission to medical and engineering programs are satisfied. Fears of a "two-tier" education system further dividing education between the rich and the poor emerged as the growth in IB is driven by private schools and sixth-form colleges. The base cost is considered to be higher than other programs.

Chapter 2 : Diploma Programme - International Baccalaureate®

The International Baccalaureate Diploma Programme (IBDP) is a two-year educational programme primarily aimed at 16 to 18 year olds. The programme provides an internationally accepted qualification for entry into higher education and is recognized by many universities worldwide.

Parent Info Packet IB Diploma Programme 11th and 12th Grade A rigorous integrated curriculum, the prestigious International Baccalaureate Diploma develops critical thinking, global perspective, college writing and research ability. The International Baccalaureate Diploma Programme IB DP is recognized around the world for its challenging curriculum and is welcomed by top universities. Students learn more than a collection of facts. The Diploma Programme prepares students for university and encourages them to: What is in the curriculum? The curriculum contains six subject groups together with a core of three integrated elements. This is illustrated by a circle with the three parts of the core at its center. Students study six subjects selected from the subject groups. Normally three subjects are studied at higher level courses representing teaching hours, and the remaining three subjects are studied at standard level courses representing teaching hours. All three elements of the core—extended essay, theory of knowledge and creativity, action, service—are compulsory and are central to the philosophy of the Diploma Programme. What are the three core requirements? The three core requirements are: It offers the opportunity to investigate a topic of individual interest, and acquaints students with the independent research and writing skills expected at university. Theory of knowledge TOK The interdisciplinary TOK course provides coherence by exploring the nature of knowledge across disciplines, encouraging an appreciation of other cultural perspectives. How are students assessed? At the end of the two-year programme, students are assessed both internally and externally in ways that measure individual performance against stated objectives for each subject. Internal assessment In nearly all subjects at least some of the assessment is carried out internally by teachers, who mark individual pieces of work produced as part of a course of study. Examples include oral exercises in language subjects, projects, student portfolios, class presentations, practical laboratory work, mathematical investigations and artistic performances. Examples include world literature assignments for language A1, written assignments for language A2, essays for theory of knowledge and extended essays. Do universities recognize the IB diploma? The IBO works closely with universities in all regions of the world to gain recognition for the IB diploma. To aid this process, university admissions officers and government officials have direct online access to all syllabuses and recent examinations. To assist IB diploma students in making appropriate choices, the organization holds a database containing contact details of universities around the world together with up-to-date information about their requirements for admission. The curriculum of each class is unlike any other. I learned a lot about real life situations in all of my classes that I believe have really prepared me for college life. It was an intimidating feeling to come into a set of classes I felt unprepared for. However, I learned to manage my time, and to still have a social life while handling multiple leadership roles. Many students worry about the stress and late nights, but I was never up until 2am doing homework, while some of my friends were. IB taught me to really embrace learning, and the different ways of doing it. Receiving the diploma is one of my biggest accomplishments to date that I truly take pride in. She is now headed to the Univ. While at Blair, Stephanie balanced the demands of the Diploma Programme on top of extensive leadership responsibilities. Cadet Lieutenant Colonel Munguia took information from 1SG Turner about upcoming JROTC events in the community, planned their course of action and assigned roles, and learned to delegate and oversee others. I enjoyed the fact that IB was about real people, and learning to understand real situations. Receiving the diploma is one of my biggest accomplishments to date

Chapter 3 : International Baccalaureate - Wikipedia

The International Baccalaureate (IB), formerly known as the International Baccalaureate Organization (IBO), is an international educational foundation headquartered in Geneva, Switzerland, and founded in

What is International Baccalaureate? Is IB right for your child? Learn how International Baccalaureate schools, programs, and classes work for elementary, middle, and high schoolers. Print article

Standing in front of the room, the speaker veers back and forth between two disparate works of literature: In both works, gender roles advance the plot, he says, offering an array of examples to illustrate his point. The speaker “ holding the attention of a couple dozen students “ is a high school junior. In-depth discussion controlled largely by students is what International Baccalaureate IB is all about. Created in Switzerland in for students in international schools, IB is now offered in 3, schools across countries “ with 1, public and private schools and counting in the U. IB has gained popularity for setting high standards and emphasizing creative and critical thinking. IB students are responsible for their own learning, choosing topics and devising their own projects, while teachers act more as supervisors or mentors than sources of facts. But in middle school and high school that may not be the case. Some middle and high schools are percent IB, but not all. For example, at many high schools there is an IB program that kids may opt into, much like attending a school within a school. For one, IB is offered at the elementary and middle school levels. The AP comparison only fits in a high school with an IB diploma program where students are allowed to take one or more IB classes in their strongest subjects. Even then, IB and AP classes tend to differ in teaching method and testing. Some see AP as more focused on rote learning and standardized tests. In contrast, IB classes and assessments tend to involve more research, writing, and hands-on evaluation. A key difference is the final exam. The tests often essays are then sent to one of 6, trained international examiners to be graded alongside work from other IB students worldwide. As a result, many students who take IB courses and exams also take the related AP test but not the class in order to secure college credit. An inquiry-based approach At all levels, IB takes a global approach, looking at big ideas across disciplines, such as examining connections between the early 20th century novel *The Jungle* and communism or considering visual depictions of music. In Yonkers, biology students develop their own experiments “ a process that can leave classrooms stinky at times. This depends partly on how your child learns. In an IB class, your child is less likely to take notes during teacher-led lectures and more likely to work on individual or group projects with the teacher facilitating. IB classes tend to be academically challenging, requiring students to take initiative, organize and complete projects, and speak in front of their classmates. Students who thrive in a demanding environment and like having options like picking research topics and choosing how to present what they learn would probably do well in IB. Others might feel overwhelmed by the intensity of the curriculum. Also, IB can be time-consuming. Children who struggle in school or have serious extracurricular commitments, such as playing a varsity sport or singing in a competitive choir, may not have the requisite time or energy for IB. Questions on every imaginable topic “ from global warming to gay rights “ will be up for debate as teachers challenge students to ask questions and research their answers. As topics arise, the only rules are that questioning is okay and that students seek not only answers but to understand the cultural biases that exist in competing arguments. From preK to graduation For children ages 3 to 12 , IB focuses on six themes: Students examine these ideas through a variety of prisms, by considering works that focus on language, social studies, math, arts, science, and personal, social, and physical education. The interdisciplinary approach continues in the Middle Years Program for students ages 11 to At Yonkers, one student interested in forensics created a fake murder scene. Some schools allow students to take one or two IB courses; others may require students to work toward the full IB diploma. In the two-year diploma program , students must pass IB classes in six areas: At Yonkers, these classes include philosophy, psychology, and social and cultural anthropology, as well as standard high school subjects such as English, Spanish, and biology. To earn their IB diploma, seniors write a 4,word essay on a topic of their choice. The

senior project is designed to prepare graduating seniors for college-level research and writing. Recently, seniors at Yonkers tackled such topics as the ordination of women in the Catholic Church, the U. A local adult usually a teacher supervises, but the final essays are sent to outside examiners who grade the work using criteria that apply to IB students around the world. How will student schedules align for academics, lunchtime, and breaks, for example, and what options do students have if they have trouble acclimating to IB classes? Schools offer different classes to meet IB requirements, so find out which foreign languages, arts, and electives are available. Depending on how the program is financed in your district, students may need to pay for their own tests. Pursuing an IB diploma often costs hundreds of dollars. IB is not a magic bullet. Like any program, its success hinges on the general school atmosphere and the quality of teachers, students, and facilities, so be sure to look at the whole package. What supporters say IB looks at the whole picture. Many IB students say they enjoy their classes, citing teacher involvement and the sense of community. It gets students ready for the next step: A recent study of IB diploma programs in Chicago backs that up: IB fosters global citizens. At least one high school dropped IB in favor of AP after receiving complaints that IB left students too little time for extracurricular activities. The extensive requirements also can conflict with other academic demands. Students are losing out without lectures. Critics have targeted IB for its international approach. In particular, some object to giving taxpayer dollars and control of U. AP may be a better GPA boost. GPA weighting is handled at individual schools, so you can find out when you visit. AP may offer students more college credit. As a result, many IB students take the relevant AP test but not the class to secure college credit. Your best bet is to ask the school how their IB classes and diplomas are evaluated by various colleges. A final word of advice Since IB is offered in different forms in public, private, and religious schools, you need to decide what type of school and IB program best suits your family. Then visit the school and check out the IB offerings for yourself.

Chapter 4 : What is International Baccalaureate? | Parenting

Hoover High to offer International Baccalaureate Diploma Programme. Students will be able to take part in this internationally recognized educational program with the start of the school year.

Chapter 5 : International Baccalaureate / IB Diploma Programme (11th and 12th Grade)

The IB Diploma Programme is our most international programme and is established in over countries around the world. Although most of our DP students choose to continue their university studies abroad, many of them apply to Swedish universities as well.

Chapter 6 : What is the Diploma Programme? | International Baccalaureate® - International Baccalaureate

The International Baccalaureate (IB) Diploma Programme offers Grade 11 and 12 students a challenging and rewarding two-year pre-university academic experience that leads to one of the most widely recognized external qualifications in the world.

Chapter 7 : Home - International Baccalaureate Diploma Programme

The International Baccalaureate Diploma Program is designed as an academically challenging and balanced program of education with final examinations that prepare students for success at university and life beyond.

Chapter 8 : IB Diploma Programme
